REVIEW OF CELL STUDY GUIDE GRADE 5

- I saw the film years ago and loved it. I've read most of the Mothman books, so I'm surprised that I always felt a strange mental block against reading this actual book for so long (Keel

might have said this was the MIB putting a thought block in my head). I am an enormous lifelong fan of both horror/scifi and ufology, as well as cryptozoology. I give this book a highly favorable review for several reasons. First off, I completely agree with the reviewers who said the book is disjointed and has the feel of Keel having slapped together his notebooks. However, Keel has such an engaging prose and an ability to take an almost objective stand on this controversial stuff, that I never got confused. Part of Keel's art is that he thoroughly convinces the reader that he saw these things and furthermore believes most of the witnesses, yet just at the right points in the narrative, he interjects a comment to the effect that everyone has it all wrong, there are no UFOs (as people understand them) and much of it is really chicanery, enough so that the reader wonders what the truth is. Perhaps this tactic is appropriate: how can we know what is real and what is not? Keel certainly doesn't profess to, and he was apparently neck-deep in it. To fans of the Richard Gere/Laura Linney movie, note that there are many differences. But you probably expected that. Everyone knows Hollywood has to intertwine a romance into everything (and they do it quite well in the film, in my opinion). But in the end I found that the spirit and the terror of the movie are all in the book as well. I will truthfully admit that for two nights in a row, I was unable to sleep with the light off in my safe, suburban home with everyone around me. The climactic tumult revolving around the terrifying Mothman and the horrid sense of doom that Keel and other contactees felt during its reign in Point Pleasant, WV prevented me from sleeping in the dark. If you love suspense and foreboding, inexplicable

horror, this book ought to be a gem for you. I could not get out of my head the account of a teenage girl who saw a grinning man standing over her bed in the middle of the night! The second half is very much a delving into Keel's personal world of madness. After establishing the connection between UFOs, Mothman and mysterious Men in Black, Keel's world unravels. Suffice it to say that he feels he is being pursued and harangued relentlessly by the Men in Black. Paranoia? Draw your own conclusions. On a personal note, I was astounded and overwhelmed with excitement to see how much my native Long Island, NY figured into this book. I always assumed it would take place only in WV, but Keel actually lives in Manhattan and takes frequent trips out not just to the Island, but to my hometown of Huntington, where local legend Sweet Hollow Road and Mt. Misery figures prominently into the web of confusion spun by the ETs. Having been to that site many, many times and experienced the powerful fear in the air there, this book was sealed in my psyche as a great Fortean read. Enjoy "The Mothman Prophecies". Don't blame me if you have to sleep with a nightlight on and the curtains drawn.

- The Viking lander in the 70's proved there was no life on Mars. If you just forget that while reading this book you will enjoy it from beginning to end. Gods of Mars takes place ten years after the first John Carter Mars book, A Princess of Mars, but you really don't have to read it to enjoy this one. Another note, this there is a John Carter of Mars movie in the works due out some time in 2006-(7?). Check out this imdb link to learn more:<http://www.imdb.com/title/tt0401729/>
