REVIEW OF PRODUCT NEWS VOITH TURBO

POWER TRANSMISSION

- There tend to be two levels of achievement in everything we do: the functional level, and the superb level. In school, we are taught the functional level; in life, we admire the superb level. Drivers education will not make you a race car driver, and your english class will not make you a good writer. In this book, however, are the skills and techniques necessary to take your writing and expression beyond the current level. Since I've read the words in that book, the words in my papers have suddenly been lining up for me and saying things in clever ways. The book talks about specific ways, and gives specific examples, of how good writers write. There is no bull in this book. If you read it, apply it, and write a lot - you will improve your writing. It used to take me about eighteen hours to write a single page paper because my mind would go off in so many directions trying to get my idea on paper. It now takes me about twenty minutes, because I am able to think through an entire paper before I write it. It sounds rather fanciful, but in reality it isn't. The book helps select what literary methods to use. It is your caddy. In your bag are many tricks which you use to drive ideas home or push thoughts along. Each trick, like a golf club, is useful in certain situations. The caddy helps you pick them. Most other books give you the clubs but not the caddy. This book is different because it tells you how and when to use them - and it knows. This is not your pimple-faced 12 year old caddy... Oh no, this is the real deal. This is the caddy that will get you off of the torn up local greens and onto your neighbors TV screen... Leave the functional and join the superb. This book will help you get there.

- Like all of Sandra Boynton books, Pajama Time is a wonderful sing-song bedtime read. My daughter loves singing along and made up her own rendition.
