## **REVIEW OF THE INDUSTRIAL REVOLUTION A VERY SHORT INTRODUCTION VERY SHORT INTRODUCTIONS**

- Los Angeles: Where Anything Is Possible by Larry Brownstein is a marvelous, full-color, photographic showcase of the brilliant diversity of Los Angeles. Celebrations, sunsets, amazing

architecture, outlandish costumes and much more fill this dazzling visual tribute. The text is very simple and brief, and offers brief and basic information concerning the festivals and other aspects captured on film. Especially recommended as a souvenir book for vacationers or armchair travelers, Los Angeles: Where Anything Is Possible could well serve as a template for photography celebrations of other major American communities.

- I use "High Wizardry" for an 8th grade interdisciplinary unit on astronomy. Besides being a gripping fantasy, Duane weaves in most of the concepts taught by our science teacher. It could be used for a computer unit, since it deals with them also. It's a tough read for some 8th graders; I'd like to see an audio book published. My kids love this book.
