#### REVIEW OF FALCON GUIDE PC BUILDING

• I read this book for fun (yeah, some of us still do that, even in the 9th grade), and it turned out to be one of my all time favorites. I love science fiction novels, and this is one that hits me on many levels. A totalitarianistic future where everything you do is monitored, even your thoughts. One wrong thought, and you could end up in Miniluv (Newspeak for the Ministry of Love). Orwell creates a world so believable that I have dreamt about societies like that. Read this book, and always remember, Big Borhter is watching.

• I first read this book in high school because it was required. Needless to say, I have read it a few more times on my own since then. Why? Because it's worth it. Orwell offers eerily accurate correlations to a hypothetically world that places heavy reliance on media. Not only do people begin to forget how to think for themselves, but a world of pure uniformity and lack of individuality begins to develop. One will be shocked at the little things that will remind you of devices that exist in our culture today and perhaps spark a bit of motivation to embrace one's flaws and unique attributes. After all, Orwell essentially warns in this novel that if we conform the ending won't be good. I guarantee one will complete this novel in record time because it's simply one you can't put down until your questions are answered.
