Jacqueline Woodson's National Book Award and Newbery Honor winner, now available in paperback with 7 all-new poems. Jacqueline Woodson is the 2018-2019 National Ambassador for Young People's Literature A President Obama "O" Book Club pick Raised in South Carolina and New York, Woodson always felt halfway home in each place. In vivid poems, she shares what it was like to grow up as an African American in the 1960s and 1970s, living with the remnants of Jim Crow and her growing awareness of the Civil Rights movement. Touching and powerful, each poem is both accessible and emotionally charged, each line a glimpse into a child's soul as she searches for her place in the world. Woodson's eloquent poetry also reflects the joy of finding her voice through writing stories, despite the fact that she struggled with reading as a child. Her love of stories inspired her and stayed with her, creating the first sparks of the gifted writer she was to become. Includes 7 new poems, including "Brown Girl Dreaming". Praise for Jacqueline Woodson: A 2016 National Book Award finalist for her adult novel, ANOTHER BROOKLYN "Ms. Woodson writes with a sure understanding of the thoughts of young people, offering a poetic, eloquent narrative that is not simply a story . . . but a mature exploration of grown-up issues and self-discovery."--The New York Times Book Review

FINAL THOUGHT

Amsco's Algebra Two and Trigonometry Helping Children Learn Mathematics

This book covers topics in formal linguistics, intonational phonology, computational linguistics, and experimental psycholinguistics, presenting them as an integrated theory of the language faculty. In this book Mark Steedman argues that the surface syntax of natural languages maps spoken and written forms directly to a compositional semantic representation that includes predicate-argument structure, quantification, and information structure without constructing any intervening structural representation. His purpose is to construct a principled theory of natural grammar that is directly compatible with both explanatory linguistic accounts of a number of problematic syntactic phenomena and a straightforward computational account of the way sentences are mapped onto representations of meaning. The radical nature of Steedman's proposal stems from his claim that much of the apparent complexity of syntax, prosody, and processing follows from the lexical specification of the grammar and from the involvement of a small number of universal rule-types for combining predicates and arguments. These syntactic operations are related to the combinators of Combinatory Logic, engendering a much freer definition of derivational constituency than is traditionally assumed. This property allows Combinatory Categorical Grammar to capture elegantly the structure and interpretation of coordination and intonation contour in English as well as some well-known interactions between word order, coordination, and relativization across a number of other languages. It also allows more direct compatibility with incremental semantic interpretation during parsing. The book covers topics in formal linguistics, intonational phonology, computational linguistics, and experimental psycholinguistics, presenting them as an integrated theory of the language faculty in a form accessible to readers from any of those fields.

Since its initial publication in 1982, CANCER EPIDEMIOLOGY AND PREVENTION has served as the premier reference work for students and professionals working to understand the causes and prevention of cancer in humans. Now revised for the first time in more than a decade, this fourth edition provides a comprehensive summary of the global patterns of cancer incidence and mortality, current understanding of the major causal determinants, and a rationale for preventive interventions. Special attention is paid to molecular epidemiologic approaches that address the wider role of genetic predisposition and gene-environment interactions in cancer etiology and pathogenesis. New and timely chapters on environmental and social-epidemiologic factors include: * The role of social class disparities* The role of obesity and physical inactivity* The potential effects of electromagnetic fields and radiofrequency radiation* The principles of cancer chemoprevention For both seasoned professionals and newer generations of students and researchers, this fourth edition of CANCER EPIDEMIOLOGY AND PREVENTION remains the authority in the field - a work of distinction that every lab, library, student, professional, or researcher should have close at hand.

Early childhood mathematics is vitally important for young children's present and future educational success. Research demonstrates that virtually all young children have the capability to learn and become competent in mathematics. Furthermore, young children enjoy their early informal experiences with mathematics. Unfortunately, many children's potential in mathematics is not fully realized, especially those children who are economically disadvantaged. This is due, in part, to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities. Improvements in early childhood mathematics education can provide young children with the foundation for school success. Relying on a comprehensive review of the research, *Mathematics Learning in Early Childhood* lays out the critical areas that should be the focus of young children's early mathematics education, explores the extent to which they are currently being incorporated in early childhood settings, and identifies the changes needed to improve the quality of mathematics experiences for young children. This book serves as a call to action to improve the state of early childhood mathematics. It will be especially useful for policy makers and practitioners--those who work directly with children and their families in shaping the policies that affect the education of young children.

REVIEW OF LESSON 14 CCLS EQUIVALENT LINEAR EXPRESSIONS WEBLY

- I really liked this book because it made me laugh and I breezed through it. The premise is totally ridiculous (some kind of tropical love bug infects two feuding attorneys after they're involved in a car accident), but if you can get past that it's a fun read. It's a testament to Trish Jensen's abilities that this book in which the two main characters spend 99% of the text in isolation is as captivating as it is.

- Remnick writes eloquently and grippingly. He amazes the reader with one heartbreaking vignette after another. It seems amazing that, though while only spending a few years in Russia, he seemingly met everybody who was anybody and traveled to the remotest parts of the dying empire. Remnick does not try hard, unfortunately, to maintain objectivity. He defies much of the intellectual dissident movement, even repeatedly calling Andrei Sakharov a "saint." Remnick turns Gorbachev into nothing more than a well-meaning Pandora, responsible for and unable to control the breakup of the Soviet Union. Remnick does show what I believe to be responsible for the breakup of the USSR--namely the rot, corruption and inefficiency endemic in the Soviet system--but he seemingly relegates it to symptomatic and not primary status. The empire would have inevitably broken up with or without Perestroika and Glasnost. The book should rank, despite its flaws, among the best books of contemporary history ever written--doing for Russia what *Democracy in America* did for the US.
