Since the publication of the Institute of Medicine (IOM) report Clinical Practice Guidelines We Can Trust in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion, and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under

this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development

process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in

making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.

REVIEW OF COMPENDIUM OF THERAPEUTIC CHOICES 7TH EDITION

- Not really a page turner, but it's an OK book. I'd recommend it for someone who likes her other books.
- "All's Fair in Love, War, and High School" is like a fictional manual on grades, boys, high school elections, cheerleading pros and cons and how to become a better person before your last year of high school.

sat down to do some light reading with one of my new favorite authors, Janette Rallison, and I found myself tumbling into the academic days and disastrous date nights of high school junior, Samantha Taylor. Remember, I said "like" a fictional manual; don't worry, it's not written in a textbook format or littered with lists of do's and do not's in the world of high school popularity. It's a story that's told from Samantha's point of view about her transition from a teenage insult aficionado into a political candidate, perfect prom date, and queen of the SAT. Is it a love story? Yes, but not just boy meets girl. You will find several boy meet girl mini-plots; however, the

true love story is the one about self-love. Samantha's character was written in a manner that led me on a mixed emotional trail. I liked her, didn't like her, wanted to smack her, wanted to hug her, and in the end - I wanted to be her. This is contemporary fiction at its best and I loved the way Janette used subtle as well as in-your-face humor to flavor this story. Wait until you read the part

about the drooling cat that goes on a date with Samantha - it's one of those laugh out loud and kind of snort chapters. If you've ever been an underdog, known a cheerleader, wanted to be class president, or just wanted to be someone that other people liked, this is the perfect read. And . . . maybe, if you don't want to be any of those things and just want to read a really great book - this is also the perfect read.
