What is Vintage Innovation? Vintage Innovation redefines innovation not as "new and flashy" but as "better and different." It isn't a rejection of new approaches or cutting-edge technology so much as an embrace of the old and the new. It's the overlap of the "tried and true" and the "never tried." It's a mash-up of low-fi tech and new tech. It's the idea of finding relevance by looking back and looking forward. It's a focus on timeless skills in new contexts. It's the idea that innovation happens when teachers take a both/and approach as they empower their students in the present to prepare them for an uncertain future. If you are a teacher, you are an innovator. You are the experimenter trying new strategies. You are the architect designing new learning opportunities. Apps change. Gadgets break. Technology grows obsolete. But one thing remains: teachers change the world. And one way to do this is through a vintage innovation approach. With vintage innovation, teachers ask: How do I innovate when I don't have the best technology? How can I use vintage tools, ideas, and approaches in new ways? How can I use constraints to spark creativity? How do I blend together the "tried and true" with the "never tried?"

Unlike other packaging titles, which simply provide templates to copy, this book enables designers of all packaging types to create 3-D packaging forms that are specific to their needs rather than based on an existing design. It teaches a simple 'net' construction system - a one-piece 2-D configuration of card seen when a 3-D package is opened out and flattened - which enables the designer to create a huge number of very strong 3-D packaging forms that are both practical and imaginative. Each chapter concludes with photographs and net drawings of 6-10 creative examples of packaging designs made using the principles outlined in the preceding chapter. Structural Packaging gives the reader an understanding of the underlying principles of packaging construction and the technical knowledge and confidence to develop a greater number of their own unusual and innovative designs than any comparable book. REVIEW OF 3D PAPER POP UP TEMPLATES PORALU

- Miss Silver is wonderful in this, standing up to the rich and headstrong Mr. Bellingdon. The solution to this mystery isn't difficult or complicated but the story of Paulina Paine and her ability to read lips which leads to knowledge of a impending robbery which leads to murder. The threads are gathered by Miss Silver and she is the leading force behind the discovery of the culprit. Another great. Mostly I enjoy how Wentworth makes people come to life for me. I hope you enjoy.

- This is a great sturdy little resource book to throw in your pack while you're hiking or exploring, and in any country. The photography is outstanding, and the different types of rocks are discussed and displayed, along with the hardness scale. The National Audubon Society has turned out another top-notch book in its nature series. I also enjoyed a few of the others on flowers, birds and insects. Buy it!
