REVIEW OF JAZZ PIANO MASTERCLASS THE DROP 2 BOOK CHAPANORE

- this book was awesome, you have to get it!!! being a francesca lia block fan, i am definitely not disappointed :)this book is mainly about barbie, a beautiful and deep girl who loves nature, a model, who always wanted to be a photographer instead, she gets molested by one of her photographer during her early teenage years. she survived through her mum's constantly trying to control her life, her dad abandoning her by meeting a little pixie/faerie/insect (lol)when she's 16, she meets a guy called todd and his friend griffin, that has gone through the same thing as she has, and they both went to the same photographer before.barbie finds courage and live in the end, this is a really beautiful book, and the writing again, is typical francesca lia block's, lyrical, poetic, enthralling. you cannot put this book down! thanks to this book, i practically failed my exams :pa must read for especially block fans!!!

- Tim Flannery's account of man made changes in our climate is a book which will appeal to a wide audience. Scientists, meteorologists, and others with a professional interest in climate and the weather will appreciate the broad range of expertise Flannery demonstrates throughout this work. A scientist and conservationist himself,

Flannery obviously knows what he is talking about. Readers without such a scientific background will enjoy this work because Flannery, like Jared Diamond, is able to write about what could be mind-numbingly complex issues with a wit and clarity that holds one's interest. As an Australian, Flannery writes from the perspective of a citizen of one of the nations which is most heavily environmentally stressed. And it is vital for humanity in Australia and elsewhere to become more conversant with the issues Flannery covers so well.The Weather Makers describes the many effects human activities have had on our planetary climate, beginning with the development of agriculture and proceeding on to the most recent headlines. Flannery analyzes the probabilities of catastrophic climate changes, stressing that this is not really a question of "If" but "When." He is alarming but not alarmist, not stooping to the level of "The Day After Tomorrow" for example, but also making it clear that even though drastic weather changes will not happen tomorrow, they certainly will within our life times and those of our children unless action is taken.Flannery is clear about what action needs to be taken. Although not overly enthusiastic about the Kyoto Accord, for example, he does herald it as a good first step. He provides suggestions for individual actions in a "green checklist" at the end of the book, and describes exciting possibilities, including those already well known such as hybrid cars and nuclear or geothermal power sources and intriguing new ones like the mini-cats: compressed air vehicles being developed in Europe.Its encouraging to see Tony Blair's name, among others in the chorus of enthusiastic responses to The Weather

Makers on its back cover blurb. Perhaps Blair and others intelligent enough to recognize that Flannery knows what he is talking about can make some headway against other "leaders" more obtuse than they!
