REVIEW OF TSI ASSESSMENT STUDY GUIDE

- I was coaxed by my father to read this book as a sophomore in high school. Now, six years later, I go back all of the time to reread this book. It is one of those books that forces you to step back and take a look at your own life, to see the insanity of your own existence. The scene where John finds his mother dying in the hospital and children are going through death desensitization is so disturbing and difficult that I find myself in tears by the end of the chapter. This book is a masterpiece, the best of its kind.

- In Brave New World, freedom is curtailed not merely on account of a totalitarian government, but by large because of human nature. The story follows Bernard Max, an Alpha-caste member possessing great intelligence but the looks of someone from Beta or lower caste, and John the Savage, who, having grown up in a remote reservation, was finally rescued but came to despise the civilization he's found. Following an apocalyptic "Nine Years War," mankind decided to forego competition in order to foster an environment, namely the World State, in which suffering is minimized. Its citizens are biologically or otherwise altered to actually enjoy belonging to whichever caste/occupation group that they are members of. Moreover, as a result of advanced technologies, guilt, reflection, and other inquiries have become irrelevant and are frowned upon. This insidious yet coercive abolition of pain suits many, but John and Bernard, as well as their confidant Helmholtz Watson, were keenly aware of the cost--a general ignorance of freedom and the inability to choose pain or pleasure for yourself. They ran into conflict not only with other members of the insulated society, such as Lenina who was John's love interest, but also with their own desires, weaknesses, and, in John's case, upbringings. In the end, Bernard was exiled to an island, where a small group of free-thinkers like him lived. John, however, of great experimental interest to the "Controllers" of the World State, was forced to stay; he eventually killed himself, unable to reconcile the difference between himself and the new world. Intentionally or not, Huxley raises the question of whether nature--including human nature--is itself a dictator. In other words, maybe only a small amount of freedom is able to exist in this universe, the rest of which must be made of qualities resistant to change. Such appears to be the case in many societies people have built.
