Educating Public Health Professionals for the 21st Century Jones & Bartlett Publishers

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Community and Public Health Nursing SAGE

Public Health Nursing: Practicing Population-Based Care explores the scientific discipline of public health and in particular public health nursing. This public health nursing perspective is applied throughout the chapters and demonstrates how public health nurses use various interventions based on best evidence in their practice, both to protect and enhance the health of the public. This innovative text includes key topics such as a discussion of historical evidence in coming to know the meaning of the terms used to describe public health nursing; the exploration of the use of technology in public health; social epidemiology as well as the traditional content on epidemiology; and an innovatively designed assessment tool that uses Healthy People 2010, A Systematic Approach to Health Improvement, as its framework. The highlight of this text is the focus on the 17 intervention strategies identified in the Population-Based Public Health Nursing Practice Intervention Wheel including a discussion of how these interventions may be applied to the three levels of practice: individual/family, community, and systems.

Public Health Nursing Routledge

Public health nurses focus on population health through continuous surveillance and assessment of multiple health determinants to promote health and wellness, prevent disease, disability and premature death, and improve the quality of life. These RNs address population health priorities through identifying, implementing, and evaluating universal and targeted evidence-based programs and services that provide primary, secondary, and tertiary preventive interventions. Public health nursing practice emphasizes primary prevention with the goal of achieving health equity. The American Nurses Association convened a workgroup of nurse experts to create a definitive resource that addresses the interrelated issues of professional accountability, autonomy, and responsibilities of the public health nurse. With input from across the nursing profession, the workgroup developed Public Health Nursing: Scope and Standards of Practice, 2nd Edition. This comprehensive, up-to-date delineation of the competent level of nursing practice and professional performance of public health nurses applies in all

practice levels and settings. The publication's scope of practice addresses what is expected of all public health nurses by specifying the who, what, where, when, why, and how of their practice. The detailed discussion of that scope of practice gives the context—the underlying assumptions, characteristics, environments and settings, education and training requirements, key issues and trends, and ethical and conceptual bases of the specialty—needed to understand and use the public health nursing standards of practice. All public health nurses are held accountable to these 17 standards, which provide a framework for evaluating outcomes, goals, and their specialty practice. The set of specific competencies accompanying each standard serves as evidence of minimal compliance with that standard. While this foundational volume is primarily for those directly involved with public health nursing practice, education, and research, other nursing and allied healthcare providers, researchers, and scholars will find value in this content. In addition, it is a resource for employers, insurers, lawyers, regulators, policy makers, and stakeholders. About ANA's Specialty Nursing Standards Since the late 1990s, ANA has partnered with other nursing organizations to establish a formal process for recognition of specialty areas of nursing practice. This includes the criteria for approving the specialty itself and the scope statement and an acknowledgment by ANA of the standards of practice for that specialty. Because of the significant changes in the evolving nursing and healthcare environments, ANA's approval of specialty nursing scope statements and its acknowledgment of specialty standards of practice remain valid for five years, starting from the publication date of the documents. The standards in this publication are based on language from ANA's Nursing: Scope and Standards of Practice, Second Edition, a helpful supplement to this specialty text, which in turn is of optimal use with two complementary ANA texts: Nursing's Social Policy Statement The Essence of the Profession and Guide to the Code of Ethics for Nurses: interpretation and Application. These three books are also available as a set, ANA's Foundation of Nursing Package, to guide nursing practice, thinking, and decision-making. The set is proving useful as a professional reference. Nursing, Health, and the Environment Hay House, Inc

America's nurses, an estimated 2 million strong, are often at the frontlines in confronting environmental health hazards. Yet most nurses have not received adequate training to manage these hazards. *Nursing, Health, and the Environment* explores the effects that environmental hazards (including those in the workplace) have on the health of patients and communities and proposes specific strategies for preparing nurses to address them. The committee documents the magnitude of environmental hazards and discusses the importance of the relationship between nursing, health, and the environment from three broad perspectives Practice--The authors address environmental health issues in the nursing process, potential controversies over nurses taking a more activist stance on environmental health issues, and more. Education--The volume presents the status of environmental health content in nursing curricula and credentialing, and specific strategies for

incorporating more environmental health into nursing preparation. Research--The book includes a survey of the available knowledge base and options for expanding nursing research as it relates to environmental health hazards.

Revised edition of the best-selling memoir that has been read by over a million people worldwide with translations in 29 languages. After too many years of unfulfilling work, Bronnie Ware began searching for a job with heart. Despite having no formal qualifications or previous experience in the field, she found herself working in palliative care. During the time she spent tending to those who were dying, Bronnie's life was transformed. Later, she wrote an Internet blog post, outlining the most common regrets that the people she had cared for had expressed. The post gained so much momentum that it was viewed by more than three million readers worldwide in its first year. At the request of many, Bronnie subsequently wrote a book, *The Top Five Regrets of the Dying*, to share her story. Bronnie has had a colourful and diverse life. By applying the lessons of those nearing their death to her own life, she developed an understanding that it is possible for everyone, if we make the right choices, to die with peace of mind. In this revised edition of the best-selling memoir that has been read by over a million people worldwide, with translations in 29 languages, Bronnie expresses how significant these regrets are and how we can positively address these issues while we still have the time. *The Top Five Regrets of the Dying* gives hope for a better world. It is a courageous, life-changing book that will leave you feeling more compassionate and inspired to live the life you are truly here to live.

A Population-Based Approach National Academies Press

Highlighting the long unacknowledged role of a group of pioneering professional women, *The Public Health Nurses of Jim Crow Florida* tells the story of healthcare workers who battled racism in a state where white supremacy formed the bedrock of society. They aimed to serve those people out of reach of modern medical care.

- I use *Women Who Run With The Wolves* as my bible. My therapist recommended I read this over 12 years ago. It's educated me on how and why women are the way they are in a loving and fascinating way. I laughed and cried and rejoiced at the stories both familiar and not. No wonder we are so fabulous. It's time we remembered it! I recommend this to anyone who wishes to truly embrace the wonderful wild nature of women.
- The book is in good condition and came in a timely manner, I just can't read it because the print is so very small. Other than that it's fine if you can handle the tiny print
