Seminar paper from the year 2012 in the subject English - Grammar, Style, Working Technique, grade: 1,0, Humboldt-University of Berlin, language: English, abstract: Since English and German belong to the West Germanic family, both languages are - considered from a historical perspective - closely related. However, English and German have developed in entirely different ways over time. While English was strongly influenced by many foreign languages, such as French, German remained closer to the language group both originally derived from. Precisely these divergent developments make a contrastive analysis between the two major languages particularly interesting. Within this paper, English and German will be compared with regard to the passive voice, one form of the grammatical category voice that is, according to König & Gast (2009: 123), easy to identify in English and German and rather unproblematic to compare. In its general meaning, the term voice is used interchangeably with diathesis. In this sense, the concept of voice relates to the argument structure of predicates, i.e. the relationship between thematic roles like Agent, Patient, Instrument and grammatical functions like subject and object, as well as to the alternations found between different argument structures. (ibid.). While diathesis appears to be a characteristic of any verb, voice - in the more restricted understanding of the word - "means the form of a [...] verb which shows whether the person or thing denoted by the subject acts or is acted upon" (Xavier 2008: 50). The narrower concept of voice, thus, differentiates between the active and the passive. In the course of my studies, the grammatical phenomenon of voice has been used several times to exemplarily compare English with German. The system of voice in English and German has been (re-)introduced in the course of this semester's seminar English in Contrast. Therefore, my interest in this topic was already raised before the seminar and I found it particularly interesting to learn more about the differences of English and German passives. As a future teacher of both of these major languages, I consider this an excellent opportunity to gain a detailed inside into this matter. This term paper aims at figuring out in how far the passive voice is different in English and German. Despite both languages' very same origin, it is assumed that, due to language change, English and German show considerable differences in the passive voice. The work by König & Gast (2009) will be taken as the basis for a discussion on this question...

This book investigates the evolution of economic discourse from fully specialised texts towards popularisation. Popularising texts on economics and business-related matters has hitherto been a neglected and under-explored area of enquiry, and yet it deserves attention and study on account of the new fascinating insights it offers into specialised language and discourse. The present book explores this under-researched area via the qualitative analysis of a modern genre, namely

newspapers on the web. In particular, it scrutinises authentic extracts principally drawn from The Guardian Online in order to show, on the one hand, the popularising effect of the Internet on business and economic discourse, and, on the other hand, the realistic vocabulary currently used in economic and professional jargon. The introductory chapter discusses the popularisation of specialised text at large and of new media discourse in particular. It describes this phenomenon as a 'reformulation process' whereby specialised knowledge is transformed into everyday or lay knowledge, and also as a 'recontextualisation process' whereby popularisation discourse is adapted to the appropriateness conditions of the new genres and to the constraints of the media employed. Popularisation, it is claimed, implies relevant changes not only in terms of terminological simplifications and adaptations to the public's prior knowledge, but also in terms of the roles undertaken by the participants in the communicative event. The remaining chapters are organised into thematic units whose topics range from global economy, economic growth, and financial crisis to business management, employment, and sales. This part provides an in-depth investigation of various topics related to the economics and business worlds, combined with systematic explanations of linguistic phenomena at various language levels, from morphology to syntax, semantics, and the lexicon. In this book, the lexicon of ESP is offered in a fresh, less formal style, which will attract younger and non-expert readers alongside experts and professionals. The book is of considerable interest to students at undergraduate and postgraduate levels, lecturers, professors, entrepreneurs, specialists, and to those scholars who investigate ESP and its popularisation.

Head-Driven Phrase Structure Grammar (HPSG) is a constraint-based or declarative approach to linguistic knowledge, which analyses all descriptive levels (phonology, morphology, syntax, semantics, pragmatics) with feature value pairs, structure sharing, and relational constraints. In syntax it assumes that expressions have a single relatively simple constituent structure. This volume provides a state-of-the-art introduction to the framework. Various chapters discuss basic assumptions and formal foundations, describe the evolution of the framework, and go into the details of the main syntactic phenomena. Further chapters are devoted to non-syntactic levels of description. The book also considers related fields and research areas (gesture, sign languages,

computational linguistics) and includes chapters comparing HPSG with other frameworks (Lexical Functional Grammar, Categorical Grammar, Construction Grammar, Dependency Grammar, and Minimalism).

REVIEW OF PASSIVE VOICE 1 ONLINE GRAMMAR AND VOCABULARY EXERCISES

- I think that Ray Bradbury did a fantastic job on this book. The detail and the wording was unlike anything I've read before. There were some phrases that were hard to follow, but most of them were amazing detail with some extravagant crosses nightmarish. I've read one other poem of Ray Bradbury's and that too was very nightmarish. Both though were incredible pieces of writing. The basic plot is that the world is in a futuristic state where the cars go over 100's of mph, about everything is electronic, there are TV programs that you play a character in a soap, and firemen don't put out fires. Yes, that is right firemen don't put out fires they start them, and they start them by igniting books. The only way to describe what having books in the book is like if someone in our society was to murder someone. In the book if you have a book it is considered a felony and firemen come and burn books. Not only do they burn the books the person who is caught with them are sent to jail. The reason these books are being burnt is because they figure that the root cause of anger and prejudice so if there was a book that was controversial then bam it's gone, and eventually all the books were ruled against. Guy Montag a normal man for his job skin slightly burnt with black smudges, fairly large, with the fireman look. He had never questioned his jobs or what he was supposed to do. Until one day when he meets Clarisse McClellan a seventeen-year old girl; who tells him about what United States was before, and what the job of firemen were before the book burning era. Montag's life takes a dramatic change from the point when Clarisse enters. Clarisse talks about living a life and looking around and smelling flowers and opening you mouth and catching raindrops in your mouth. Montag first thought Clarisse was absurd and crazy to do all these things because doing these things were no accustom to this generation, it was fun to be with the "family" this family isn't the traditional family it's a soap opera where the person plays a part in it. Montag learns the truth of what firemen use to do before the book burning age. Montag thinks it's total nonsense but soon learns better. Clarisse disappears one day, and Montag can't find out why she is gone then his

wife tells him that last week she had died, and her family had left. Montag then remembers the only other person he had ever met that was like Clarisse was Faber. Faber is a retired professor; there is no need for professors because there are no books. Faber is willing to help Montag, because Montag is the only one who recognizes that there is a problem, and the only one who wants to make a difference. Montag takes what Faber has called alternate brain and puts it in his ear and can hear Faber's voice. Montag headed to the station, Montag had just settled in when they got a call that would change his life forever. This was one of the most amazing books that I've ever read and all of

the twists and great action kept me reading until the very end. I think it would be very interesting if someone would write a sequel to Fahrenheit 451 after the big ending it leaves some space to make a sequel.

- I admit it was strange reading at first and a slightly different writing style that I am used to...but considering this book was written 1953....AMAZING! A book definitely before its time and can be truly applied and understood today. This is something I would definitely want my children to read!
