REVIEW OF COMPLEX VARIABLES W APPLICATIONS EOIHAM

- This book was fantastic. I had only read one of Haydens books previous to this one but you can be assured that I will have to get my hands on her whole collection.
- Forensic anthropologist, Dr. Temperance Brennan is asked by the Catholic Church, to exhume the body of a nun, buried in the precincts of a convent in the 19th century, for the first stages of beatification, in the process of declaring her to be a saint. The weather in Montreal is below freezing point which makes the work difficult and, when the job is done, the news that she must impart to the church authorities is somewhat startling. She is then called upon to work at an horrific arson site where an entire family, including babies, has been butchered and incinerated. The victims were members of a secretive and sinister cult and the story becomes more involved as further bodies are discovered and horrific practices uncovered. It's all a tad gruesome for my taste as I'm getting sick (literally) of reading specific details of forensic investigations and of tv shows of this ilk also.
