## REVIEW OF DESENHO TECNICO LUIS VEIGA DA CUNHA

- Hegel's Philosophy of History is his easiest book to read. He angered some people by saying that History is Freedom, and so those countries which did not have Free States (in 1821, the year he wrote his book) were not truly part of History but part of the Pre-historic period. He begins with a narrative of Africa in 1821 which was steeped in Slavery, both internal and external. He stated that all nations were once at this level of Pre-history, where no king could last more than a year. But China was the first nation to make One but only

One Person free, namely, the Emperor. This was the beginning of History. From this point Hegel traces those nations which increased Freedom slowly - from Egypt to Assyria to Babylon to Persia to Greece to Rome to Spain and then Europe as we know it today. The Idea of a Free Republic was born in Greece, but was first made material in Rome. Caesar opposed the Republic because he knew that the fullness of time had not yet come for it; so he opened up barbarian Europe instead.
