## REVIEW OF SYSTEM SOFTWARE LELAND L BECK SOLUTION MANUAL

- This was my first book in the Exam Cram series, and I'm truly stunned over the absolute rubbish this book contains. Luckily someone else has reviewed and posted most of the stuff that is highly questionable in this title, so I can soon throw it away and get on with my life...It's packed with syntactical errors, wrong answers, typos, ambiguous and subjective scenarios that doesn't rely on facts and blatant statements that are just not true...'There is no such thing as a unique clustered index'..???! almost fell out of my chair reading that explanation in one of the answers...The authors also apparently have no knowledge of SQL Server's security model, as they fail to recognize that one of their 'correct' answers regarding the usage of a view, would not work because of a broken ownership chain..and on and on and on...I can't recommend this title to \*anyone\* - it's so bad that if I could I'd be tempted to sue for mental damage...

- I am in the middle of this book right now. I read the Eye of the World all the way through and I found it kind of slow in the beginning but I kept going and the last half was great. The Great Hunt had none of that slowness in the beginning. I like this book series because it is imaginary and good against evil and even has some romance in it ^\_^ (Nynaeve and Lan, Rand and Egwene) I LIKE Rand. Everyone's like " I find him annoying... I LIKE him. I hope the books don't get bad after the 5th book. That's a whole lot of reading. ahhhhhh....
