A story of awakening to remarkable shamanic powers, teachings, and techniques • Describes the author's work with plant spirits, entheogens such as ayahuasca, and indigenous shamans during his 20 years of fieldwork in the Peruvian Amazon • Explores the practice of soul retrieval and shamanic work with feathers, stones, and sound • Includes techniques for exploring non-ordinary reality, exercises for expanding sensory perception, and practices to open your creative artistic visionary potential After surviving a serious elevator crash in London, Howard G. Charing found he had developed healing touch as well as the ability to hear voices and experience visions--just as a healer in Italy had predicted only a week before the accident. He began using his abilities to heal but felt he needed more guidance and training. He first connected with a national spiritual healing organization, only to be told he was doing everything wrong. Then, through a friend, he discovered shamanism. Sharing

profound teachings and extraordinary experiences from his more than 30 years of shamanic healing work, Charing explains how he accidentally became a shaman and completely changed the course of his life. He describes his work with plant spirits, entheogens such as ayahuasca, and indigenous shamans during his 20 years of fieldwork in the Peruvian Amazon, including his studies with the late visionary artist Pablo Amaringo. Investigating altered states of perception, he provides visionary techniques for exploring non-ordinary reality, exercises for expanding sensory perception, and practices to open your creative artistic visionary potential. Detailing the practice of soul retrieval, the author discusses why it is one of the most effective and profound spiritual healing practices and shares emotionally charged stories of successful shamanic healings he has attended. He also includes shamanic wisdom on working with feathers, stones, and sound and compares current research in physics with the vast body of experiential knowledge from indigenous spiritual traditions. From the accident that started his journey to the many remarkable spiritwork encounters that have happened since, Charing's story will empower readers to begin exploring the realms of consciousness and energy that surround us and welcome the dissolution of the boundary between the physical and the spiritual.

An investigation into experiences of other realms of existence and contact with otherworldly beings • Examines how contact with alien life-forms can be obtained through the "inner space" dimensions of our minds • Presents evidence that other worlds experienced

through consciousness-altering technologies are often as real as those perceived with our five senses • Correlates science fiction's imaginal realms with psychedelic research For thousands of years, voyagers of inner space--spiritual seekers, shamans, and psychoactive drug users--have returned from their inner imaginal travels reporting encounters with alien intelligences. Inner Paths to Outer Space presents an innovative examination of how we can reach these other dimensions of existence and contact otherworldly beings. Based on their more than 60 combined years of research into the function of the brain, the authors reveal how psychoactive substances such as DMT allow the brain to bypass our five basic senses to unlock a multidimensional realm of existence where otherworldly communication occurs. They contend that our centuries-old search for alien life-forms has been misdirected and that the alien worlds reflected in visionary science fiction actually mirror the inner space world of our minds. The authors show that these "alien" worlds encountered through altered states of human awareness, either through the use of psychedelics or other methods, possess a sense of reality as great as, or greater than, those of the ordinary awareness perceived by our five senses.

Singing to the Plants Springer Nature

"With the original unabridged text of *Supernatural*, I offer the reader an investigation that explores the human experience with psychedelics from the Stone Age to the Space Age and the role of these extraordinary plant medicines as tools to investigate the nature of reality itself."—Graham Hancock *Discover the pathway to the gods. Less than 50,000 years ago mankind had no art, no religion, no sophisticated symbolism, no innovative thinking. Then, in a dramatic and electrifying change, described by scientists as "the greatest riddle in human history," all the skills and qualities that we value most highly in ourselves appeared already fully formed, as though bestowed on us by hidden powers. In *Visionary*, Graham Hancock sets out to investigate this mysterious "before-and-after moment" and to discover the truth about the influences that gave birth to modern human mind. His quest takes him on a journey of adventure and detection from the stunningly beautiful painted caves of prehistoric France, Spain, and Italy to remote rock shelters in the mountains of South Africa, where he finds a treasure trove of extraordinary Stone Age art.*

Hancock uncovers clues that lead him to travel to the depths of the Amazon rainforest to drink the powerful plant hallucinogen ayahuasca with Indian shamans, whose paintings contain images of "supernatural beings" identical to the animal-human hybrids depicted in prehistoric caves and rock shelters. Hallucinogens such as mescaline also produce visionary encounters with exactly the same beings. Scientists at the cutting edge of consciousness research have begun to consider the possibility that such hallucinations may be real perceptions of other "dimensions." Could the "supernaturals" first depicted in the painted caves and rock shelters be the ancient teachers of mankind? Could it be that human evolution is not just the "blind," "meaningless" process that Darwin identified, but something more purposive and intelligent, something that we have barely even begun to understand? Previously published as *Supernatural*, this definitive edition includes a new Introduction by Graham Hancock as well as restored chapters that were omitted from the original paperback release.

The spiritual malaise regnant in today's disenchanted world presents a picture of "a polar night of icy darkness," as Max Weber wrote already a century ago. This collective dark night of the soul is driven by climate change-related disasters, rapid technological innovations, and opaque geostrategic realignments. In the wake of what policy analysts refer to as "Westlessness," the postmodern age is characterized by incessant distractions, urgent calls to responsibility, and in-humanly short deadlines, which result in a general state of exhaustion and burnout. The hovering sense of living in a time frame that is post-histoire induces states of confusion on a personal level as well as in the realm of politics. Totally missing is a grand narrative to guide humanity's vision in the midst of a world crisis. Thinkers, scholars, and Jungian analysts are increasingly looking to C.G. Jung's monumental oeuvre, *The Red Book*, as a source for guidance to re-enchant the

REVIEW OF AYAHUASCA VISIONS

- An excellent collection of short fiction. Each tale is as compelling, as it is entertaining. Conrad is one of the best short story writers ever he is like a darker Stevenson who delves into the human psyche.
- Here is a convenient little mystery similar to some that you probably have already read, but most enjoyable. It fits nicely in the genre commonly known as the English Country House style of mystery. I think that I have already said enough about this delightful story, but that will not stop me from rambling on. There is a get-together at the country house of a pompous Earl and his level-headed wife. The attendees to this soiree are totally incompatible socially. The Earl's brother is with the Foreign Office and he was looking for a remote place for some diplomatic negotiations which need to be carried on in strict confidence. He asked his brother if his home could be used. That brought on diplomats, interested security people,

foreign ministers from the country of interest and some shady characters who would like to disrupt these talks (we do not know who these shady characters are until we get into the final chapters of the book). The daughter of the Earl asks an old friend to spend the weekend at that same house and the Earl himself invites some folks in. It seems that the Earl has an amazing firearm collection and he wants to show it off to some excruciatingly wealthy Texans (are there any other kind?) known for their own collection. The wife of the Texas couple has a fantastic diamond necklace which she insists upon wearing during the weekend. You now have the setup for the weekend and can make some guesses by now. In the end, it is found that the house is now populated with thieves, espionage agents, jewel thieves, blackmailers, murderers and other

characters who make perfect denizens of a mystery book. By the end of the book, nobody seems to be who we thought they were with their identities changing (sometimes more than once). The house has, of course, a library, drawing room, dressing rooms separate in each suite, a music room and naturally a secret passage. During the course of the evening (actually early morning) of the crimes (yes that is a plural) the house is dark and nobody seems to be sleeping but moving surreptitiously down the corridors, stairways, breakfast room, picture gallery and the arms collection room. I will stop here and say only one single thing more. The police investigator who shows up is somewhat of a cross between Hercule Poirot and Columbo. Oh, yes! I almost forgot, there is that bloodstained egg cosy, but I have already said too much, you will have to discover that yourself.
