REVIEW OF ESSENTIALS OF DISCRETE MATHEMATICS 3RD EDITION

- Everyone needs to read this for the story, characters, detail, and amazing things that Tolkien did to make this masterpiece a masterpiece. This is much better than the "Fellowship.." with much more action and excitement that makes you wanting more. If you're a fan of the first book then pick this one up right away.
- My favorite book series of all time is the Lord of the Rings Trilogy. As a side note, it is also my favorite movies series. My favorite book of the trilogy is probably the third one, "The Return of the King". It ended the series on an excellent note. I personally identified with many of the characters, particularly Sam, Aragorn, and Eowyn. Here is a summary of the book. The first half of the book

chronicles the attack on Minas Tirith, the capital city of the country Gondor. The book opens with the wizard Gandalf and the hobbit Pippin arriving at Minas Tirith. The city is preparing for war, and they have lit their signal beacons to call for help. They go into the city and meet Denethor, the Steward of Gondor. Denethor is nowhere near the moron that the movie version makes him out to be. However, he is starting to go crazy as he uses dark magic to discover just how powerful Sauron is. He is mourning the death of his oldest son, Boromir. Boromir died in the previous book, in an attempt to protect Pippin and his friend Merry from the Orcs, or Goblins. Pippin tells Denethor this, and offers himself into Denethor's service. Pippin becomes part of the tower guard. Sauron's Orcs invade Gondor. In the battle, Faramir, Denethor's youngest son, is seriously wounded. Denethor, thinking Faramir is beyond saving, gets ready to burn himself and Faramir together. Meanwhile, in Rohan, king Theoden is rallying his armies to come and help Gondor. Aragorn, a Ranger, decides to go to enlist the aid of a group of undead traitors who live in the Paths of the Dead. He is accompanied by Legolas, Gimli, and a group of Rangers. Back at Gondor, Sauron's armies have surrounded Minas Tirith. They are led by the Witch-King, the king of the Nazgul. However, Sauron's army is defeated by Theoden and the Rohirrim, who arrive just in time. The Nazgul king is killed by Eowyn, with the help of the hobbit Merry. The attacking fleet of Corsair ships arrives, but is revealed to have been taken over by Aragorn, the rangers, and the army of the undead. Sauron's army is crushed. Denethor burns himself to death, but Faramir is saved by Gandalf, Pippin, and the guard Beregon. Gandalf and Aragorn decide to march on Mordor, Sauron's country. They want to create a diversion to allow Sam and Frodo a chance to get through Mordor unseen. Frodo has Sauron's ring. If the ring is destroyed, then Sauron will likewise be destroyed. A battle ensues in front of the gates of Mordor. The second half of the book chronicles the journey of Frodo and Sam. And the end of the previous book, Frodo was captured by a group of Orcs, and imprisoned in a tower. Sam enters the tower in and rescues him. The two of them then continue their journey through Mordor. The ring, possessing its own consciousness, weighs heavy on Frodo in an attempt to wear him down. After several adventures and narrow escapes, Frodo and Sam reach Mount Doom, where they hope to destroy the ring. Frodo has the chance to destroy the Ring, but at the last minute is corrupted by its power. Just then, Gollum appears. Gollum is a creature who possessed the ring for five hundred years. It drove him insane, and now he wants to have it back. He attacks Frodo, and bites off Frodo's finger in his determination. Gollum jumps up and down in his joy at possessing the ring once again, and accidentally loses his balance and falls into the fire. He is destroyed, along with the ring. He has unintentionally done Frodo's job for him. Sauron is destroyed, and his armies run away. Frodo and Sam are reunited with Aragorn and the rest of the characters, and the four hobbits are proclaimed heroes. Aragorn is then crowned king of Gondor, and marries the elf Arwen. After many long farewells, the hobbits journey back to the shire. To their surprise, they find it has been taken over by a group of men, working for someone named Saruman. Using what they have learned in their travels, the hobbits lead a revolt and drive the men out of the Shire. Saruman is then revealed to be Saruman, a wizard who had allied himself with Sauron. He had lost his powers in the previous book. He is murdered by his servant, Grima Wormtongue. Over time, the Shire is healed. However, Frodo cannot heal from his wounds. He was stabbed by the Witch-King in the first book, poisoned by the spider Shelob in the Second book, and had his finger bitten off by Gollum in the third book. He

decides to go to the undying lands with the remnant of the elves. My love of this book has to do with my love of many of the characters. My three favorite characters are Sam, Aragorn, and Eowyn. First of all, Sam. Sam is simple, unintelligent, and loyal. He is much like other hobbits, in that he has never ventured far from the Shire. He decides to become Frodo's servant on the long journey to Mordor. Sam is in my opinion the most important character of the story. His simple love for Frodo is what gives Frodo the strength to carry out his task. Throughout the whole trilogy, but particularly in the third volume, Sam's simple courage is what keeps Frodo going. Towards the end, Frodo is completely worn out from carrying the ring. Sam decides to carry Frodo the last leg of the journey, up until they are just in sight of the doorway to the mountain. Sam's loyalty is what ends up saving Middle earth in the long run. Another good character is Aragorn. He is the heir to the throne of Gondor. For many centuries, the country has been ruled, not by a king, but by a steward. The stewards serve as substitutes for the king, ruling in his absence. By this time, however, many people consider the rule of kings over, chief among them the current steward, Denethor. Aragorn is the last surviving member of his line, and he is the only one who can claim the throne and unite the kingdom. He has no wish to do this. He prefers to live as a ranger, hunting the Nazgul and living in solitude. In the end, though, he accepts his responsibility and puts his personal desires aside. He is

descended from a family blessed with long life. He and Arwen rule Gondor for one hundred years, before he finally dies. My last important character is Eowyn. She is the niece of king Theoden, and she wishes to go into battle and earn valor. She falls in love with Aragorn after he helps the wizard Gandalf to heal her uncle. When she asks Aragorn to allow her to go into battle with him, he refuses, saying that she needs to care for her people and rule in place of her uncle. He also tells her that he does not return her love. Crushed, Eowyn says that her greatest fear is "a cage", and that she fears that she will be forced to "stay behind bars until use and old age accept them, and all chance of great deeds is gone beyond recall or desire". She fears that she will die of old age before she has the chance to gain valor. She ends up disguising herself as a soldier and rides with the army to the Battle outside Gondor. There, she is able to defeat the King of the Nazgul. Now, the Nazgul king is a very fearful presence. He has the power to cause the bravest, most courageous man to run from him in terror. When the Nazgul is about to kill Theoden, it is her love for her uncle, not her bravery, that allows her to stand and fight against the Nazgul. In conclusion, The Return of the King is my favorite book of all time largely due to my love and admiration for the characters. I admire Sam's strong spirit, which enables Frodo to complete the task set before him. I admire Aragorn's selflessness in taking up the crown when it is the last thing in the world he wishes to do. And I admire Eowyn's love which enables her to kill the Nazgul king and most likely win the battle of the Pelennor Fields.
