REVIEW OF RUMUS PENUKAR PANAS

- Black South Africans have been deprived of educational system for a very long time. Reading this autobiography I'm inspired to teach as much as I've learn to others less fortunate. And I may end up being a career academic like Booker T as well. Having started a career in public speaking before

reading this book I feel even more inspired to continue this pursuit because its such an effective tool. Booker T was a master orator from his own accounts. Surely all the invitations received (with no marketing or self-promotion) is a testament to his skill as an orator. Slow but sure progress is made. The language is easy to understand yet the structure is complex because there are lessons to be learnt on many levels. I highly recommend this book to all non-white South African especially those of mixed decent and black people in general. Booker T was what is called in modern South Africa a "coloured" person. He has a white father and a black mother.

- Booker T. Washington had every reason to complain and be resentful. He was born a slave, and although national manumission occurred while he was still a boy, very few opportunities offered themselves to the newly emancipated. He fought against the odds to get an education and while he was away at school, his beloved mother died. His biological father was a slave owner who never expressed any interest in his son's life. When he was asked to be headmaster of the Tuskegee Institute, he found himself faced with empty land in a poverty-stricken area. Married three times, his first two wives died very young. His first spouse left him a single father with a young child, and the second time he faced widowhood he had three small children to raise all by himself. He could certainly have cursed fate and just given up; in stead his autobiography is the work of an unspeakably grateful and patriotic American. Washington could not find enough good things to say about nearly everyone he encountered in life or the country he felt blessed to call his home. He worked very, very hard and success followed all his endeavors. Rather than boast of his many accomplishments, he seemed to feel unworthy of the nationwide respect he earned. He humbly described his friendships with Presidents Grover Cleveland and William McKinley, talked of his constantly sought after speeches throughout the United States and Europe, and detailed his phenomenal money-raising skills that brought the Tuskegee Institute up from a converted hen-house to a campus of over 40 buildings. Throughout all his trials and successes, he constantly advocated forgiveness, humility, and gratitude. Not only did he recommend these three virtues, he lived a life that embodied them. Perhaps that's why a person born with no realistic chance at getting ahead, died one of the most admired and well-known individuals of his day.
