## REVIEW OF LIST OF IEC STANDARDS FOR PROJECTS IN ELECTRICAL POWER

- iris origo really has something here, and her poetic biography of the great giacomo leopardi is a classic in itself. the darkness and despair of leopardi's verse is probably one reason for leopardi's obscurity and little known philosophical works, but the overwhelming sense of nothingness and meaninglessness that his work conveys is no reason to put him aside. we do not necessarily have to agree with an author about everything to enjoy the aesthetic brilliance and the passion present in his essays and poetry. anyone who gets a dark thrill (as i do) from philosophy and poetry that focuses on the more shadowy and sad side of existence will devour leopardi's work. he would undoubtedly gotten along with and befriended the two other great literary prophets of doom, samuel beckett and arthur schopenhauer, and unconsciously shares their philosophy and really disturbing reflections about the emptiness of human life and it's accidental and contingent origin. leopardi was a quite genuine pessimist, unlike schopenhauer who betrayed through his lifestyle and even occasionally in his work itself a love and passion for life and art, and his gloom is not simply temperamental or tongue in cheek as it with arthur, but is very serious and profoundly felt. leopardi's work openly refers to the poetic imagination and man's feelings of divinity or supremacy in the universe as "beautiful illusions", which is all the more infuriating to those who have them because does not violently condemn them or even make an effort to disprove them objectively, but just dismisses them offhandedly as the obvious products of wishful thinking and fanciful self delusion. despite the depressing and sometimes unbearable bleakness of his work, i think giacomo leopardi is unjustly obscure and the best italian poet since dante. all of his work is a must read for students or lovers of philosophy and poetry.

- It had to be New Orleans because the plot meandered around the city like the chronicles of a certain vampire-loving raconteur from the Big Easy. Don't misunderstand me, I admire the detail, but get on with the story. If I wanted excessive minutia, I'd read Crichton. Too many details derail the rising action and sidetrack the attention span. These characters burn tissue thin except for the side show freaks including Deucalion. He deserved the story and not the two dimensional, reiterated clones that became as soulless as their flat egotistical creator (I guess Helios meant that he is the center of the solar system and not just this world). I hope if I live 200 years I will not become as concerned with humanity that I find the need to control it through a B-movie motivation. Helios deserved more. Mr. Sinister in Marvel Comics played more convincing than Helios. I wanted to like this novel since I adored the Modern Prometheus and the Dune prequels, but where was the story? More matter and less art next time! I won't be tagging along for the extended tour of New Orleans for the next book. Sorry.
