REVIEW OF CISCO CCDP ARCH

- One of the most embarrassing secrets in my life has finally ceased to exist. Until last week i had never read 1984. But now i have...Most certainly a harrowing dystopia, by which i was deeply affected. Orwell is a visionary of a rare quality. The links to this present age are evident in nearly every page of the masterpiece.

- 1984 does not live up to it's reputation. I'll grant that Orwell had a point (that _western_ societies, as well as soviet society were headed toward his future). However, Orwell is not a great novelist -- excellent essays, poor novels. Almost the entire plot is stolen from an earlier russian work (We, by Yevgeny Zamyatin), which is far superior. If you're interested in Orwell's political thinking (yes, he's a socialist), check out his essays. If you're looking for a good allegory, DON'T get 1984...
