## **REVIEW OF BUILDING WIRELESS SENSOR NETWORKS WITH ZIGBEE XBEE ARDUINO AND PROCESSING**

- The Hobbit takes place in a fantasyland called Middle-Earth. The story is about a hobbit that goes on an adventure with a group of dwarves to steal their treasure back from a dragon

who stole it from the dwarves a long time before this. The main character is Bilbo, a hobbit that lives in the Shire. Other main characters are Thorin, leader of the dwarves and heir to the gold that a dragon named Smug stole from his family, and Gandalf, a wizard that added Bilbo to the group and helped them as much as he could on their adventure. The story is about Bilbo, who gets stuck with an adventure being a thief. Which is funny because he has no clue how to be a thief or even to steal from someone. He and a group of 13 dwarves lead by Thorin go on an adventure and steal the dwarve's gold from a dragon. The whole trip across the mountains led them to many little adventures, with trolls and goblins and other creatures of Middle-Earth. My favorite character is Gandalf

because he is very smart and knows everything about everything (well pretty much, anyway). At one time I was much like Bilbo. Not really afraid to have any adventures, just saw no reason for them. Then I got to High School and that all changed. Much like how Bilbo did, with a friend showing him the way. Gandalf started him on his adventure and a friend named Bobby started me on mine. Bobby taught me that taking a risk every once in a while wouldn't do much harm and that changed my whole life around. Much like how Bilbo met Gandalf, I met my friend. Bobby was a friend of one of my family members. Just like Gandalf was Took's friend, who is one of Bilbo's family members. Right when I met him he began changing me. He showed me many adventures and changed my life

much like Gandalf did for Bilbo. When I first opened the book I thought it might be a little strange, but the book was amazing. It is now my favorite book. It is very hard to pick a favorite part in this book because there is so many, but if I had to pick, the part where Bilbo starts killing all the spiders and names his sword Sting. Tolkien writes so well I could see this part taking place in my head. And if I had to change one thing I would change the lack of information. I want to know more about Beorn and the Necromancer. I think if someone likes to read; they will like this book. It is so much more than a fantasy, more like a life lesson. But you have to be willing to let your imagination go. I would recommend this book to anyone.

- The Hobbit is an exiting fantasy tale

about Bilbo Baggins, a hobbit. A hobbit is a small creature who walks around with hairy, bare feet. Bilbo lives a normal, everyday life in the village of hobbits called the Shire, until he is pushed out of his comfortable life by 13 dwarves to join them on a quest to reclaim stolen gold. In the beginning Bilbo has little confidence in himself but as the story goes on he discovers courage in himself that he never believed he had. Their adventure takes many twists and turns as they get closer to their destination, the lair of the dangerous and greedy dragon, Smaug. Bilbo and the dwarves encounter many obstacles along the way including their run-in with three hungry trolls, and their skirmish with a group of huge spiders. If you are curious to find out the fate of Bilbo and the rest of the

unforgettable characters, you have to read this book. I thought it was very fun to read and understand more of JRR Tolkien's "Middle Earth" after being familiar with the Lord of the Rings trilogy. I recommend this book to children and adults, and especially to anyone who loves reading adventure tales filled with fantasy characters and suspense.
