REVIEW OF HYDROLOGY AND WATER RESOURCES ENGINEERING BOOKS DOWNLOAD

- The main character in this book is a wealthy day trader who has settled into a regimen that involves his day trading 'work', his fitness trainer, nutritionist and other people who are working for him, but not connected to him. When he suddenly experiences intense pain, it's a wake-up call. After calling 911 he's not sure if he should have, because he's so out of touch with himself and his world. The visit to the emergency room is the start of a cascade of changes in his self-contained life. Along the way to become

more real, he encounters a cast of characters including a donut maker, a woman crying in a grocery store, a fitness instructor, a movie star, and a famous author. But most importantly, he manages to start rebuilding connections to his family, connections he lost because of his own neglect. Ultimately, and messily, he manages to start reconnecting with his son. I didn't really connect with the main character because he was clearly wealthy enough to live a fantasy type of life, spending

money with abandon. But his random walk through the world after he effectively woke up in the hospital was a good reminder of how we can become better folks through reaching out and helping folks we encounter. Once I got into the book I found it very hard to put down.

- I have already read several books from this author and find them very informative and it really gives you a insight into what it must have been like during this time.
