REVIEW OF MLT CERTIFICATION STUDY GUIDE

- really no need to write sth about this "cult" novel... in a couple of years everything written by this genius man will come true..i should say this book was the reason why i studied molecular biology and genetics for four years..and it turned out to be the only thing i can work on...to clone myself...(maybe FBI will read this and i will be dismissed from the scientific community hehe:)) i wouldnt care the least...i ordered this by amazon.com coz i couldnt find the complete original text in Turkey unfortunately..this invaluable work of art will stay next to another breakthrough work of art by Orwell, of course 1984, in my library...where would i be now if i hadnt met these i dont know...(the explicit lyrics by PULP!! those of you will remember:))
- First of all I'm not really into Sci-Fi or any things from that sort I would much rather spend time reading about ordinary people with ordinary lives and ordinary problems (like what people suffer from in our world today) I think its much more interesting than reading a book with the Star Wars Robot/alien themes, They just sound so incredibly unbelievable and immature to me. However this Book is not your typical Sci Fi nonsense books that are only written for the purpose of entertainment alone, what makes this book different is that the author had a moral lesson behind it, which makes it a rather interesting read. This Book was assigned

for my English class and I had to read it as analyze the characters and the themes of the book which made it easier for me to understand. I feel that having English as my second language & the fact that this book has been written in the early 20th Century made it for me and for modern readers who don't speak English as their first language hard to understand and follow with the story. The writing style is the only issue I've found in this book that made it painful and frustrating for me to go through it, otherwise I think it would've been a more enjoyable read. The Book has a really good plot line though.The setting is in the future, people are living in what seems to be a Utopia (flawless community) at least from their POVs. People are kept under control by upper powers who uses sex and religion as ways to control people & keep them from getting a rebellion or knowing too much. People are divided into stages (classes) with certain names, duties and each stage has a certain intelligence and held a certain job (nether to say each person is programmed to do certain things according to his stage). People are almost turned into robots (they are brain washed to believe that books are poisonous & so is flowers and its ok for them to sleep with as many people as they want etc.. So to say the moral standards of their lives is different than us but most importantly people are MADE in factories instead of being BORN they are even taught that mentioning the words mother and father are just like saying the F bomb, people have NO families and makes NO families since its believed to be incredibly bad & shameful to have a family, after the death of someone he/she is just thrown away just like throwing an old vacuum who've been worn out by many years of use & no one feels sorry for the loss of it because it can

always be replaced. Love or rather feelings is not something the people of this world possess, since they are brought up to be quite promiscuous they don't know the meaning of commitment or loyalty to one person. However everything falls out of place when one of the lower classes gets pregnant and gives birth to a son (John) who is fathered by one of the upper world controllers who left her on a savage island while they were on a vacation because he thought she was dead. Away from the perfect world John is brought up in the island of the savages, he sees his mother sleep with as many men as she can and that causes the people of the village to whip her as well as call her a slut because of her misdeeds, unlike the other people in the Perfect world he doesn't

belong to any category (class) therefore his brain isn't programmed like the others he has emotions just like a normal human being and he also learns to read, he reads books by Shakespeare that talk about Love, war and Loyalty & dreams that one day he will find the love of his life. However one day as two people from the perfect world are vacationing on the islands they discover him and his mom and they bring them along as they return to their Utopia. This much doesn't surprise his mother since she grew up there but for John it's amazingly shocking to know how different the life in the Perfect world is than the life he has had while living with the savages. The Book talks about how he feels he doesn't fit in & eventually the shocking end (I personally didn't see it coming)
