Sorted is a successful Fresh Expression of church based in Bradford, which has now sent out pioneers using the lessons learnt to begin planting a fresh expression in Thamesmead, London and begin a pioneering project in Nairobi, Kenya. The Fresh Expressions story has been well-told, but there have been relatively few attempts to relate the experiences and methodologies the author and his team have learnt over 10 years of pioneering Sorted (3 fresh expressions of church), so that pioneers, missionaries and the wider Church may be better equipped and informed when pioneering fresh expressions, mission communities and church plants in a whole range of different contexts. Relevant and timely, this book aims to share these lessons and methodologies using the Sorted story.

This book supports a turn in the leadership paradigm: from environment to system, from manager to employee. It offers an introduction to essential managerial instruments for the improvement of Performance, like Staff Dialogue, Upward Feedback, Executive Coaching, or Business Ethics. Different leadership styles and techniques are explained as well as international and intercultural dimensions of Human Resources Management. Furthermore an innovative approach is developed to utilize System Theory and its interdisciplinary results in evolutionism, biology, physics, philosophy, cognition science and therapy for the design of Systemic Leadership. By this approach, readers will achieve a higher level of comprehension of how leadership actions may affect - or why they do not affect - the behavior of individuals or groups in enterprises and organizations. The book is intended - as a source of new ideas and creative proposals for Executives and Personnel Managers who, in their enterprises, want to put into practice an Extended Catalogue of Management Tools, and - for Students to accompany lectures in Business Administration with focus on Personnel Management. "In today's complex business environment, we urgently need a systemic approach to management and leadership. Cyrus Achouri's book is an important contribution to this new field. I am sure that readers seeking a deeper understanding of leadership will find it helpful and inspiring." Fritjof Capra, author of "The Web of Life" and "The Hidden Connections"

The past two decades of politics in Washington have seen increased partisanship, prolonged stalemates, and numerous scandals. For today's teenagers and young adults, years of ineffective and inefficient political leadership have completely eroded any sense that politicians or government have the ability to do good or effect positive change. Worse, the mean-spirited, dysfunctional political system that has come to characterize American politics has turned young people off to the idea of running for office. With more than 500,000 elected positions in the United States, what will happen when this generation is expected to take the reins of political power? Through an original, national survey of more than 4,000 high school and college students, as well as more than 100 in-depth interviews, Jennifer L. Lawless and Richard L. Fox find that young Americans feel completely alienated from contemporary politics and express little ambition or aspiration to run for office in the future. The overwhelming majority see nothing particularly noble about those currently in office, viewing most as dishonest, self-interested, and disinterested in helping their constituents. These young people want to improve their communities and enact change in the world; but they don't think politics is the way to achieve these goals. In fact, they look disdainfully upon the prospects of growing up to be a mayor, governor, senator, or even president of the United States. *Running from Office* explores young people's opinions about contemporary politics and their political ambition (or lack of it). The book paints a political profile of the next generation that should sound alarm bells about the long-term, deeply embedded damage contemporary politics has wrought on U.S. democracy and its youngest citizens. As disheartening as their conclusions sound, Lawless and Fox end with practical suggestions for how new technologies, national service programs, and well-strategized public service campaigns could generate political ambition in young people. Today's high school and college students care deeply about improving the future, and it's not too late to ensure that they view running for office as an effective way to do so.

This book presents the raging debate on one of the most brutal political realities that India has confronted in recent years: the rising conflict between Maoist insurgent groups and the Indian State. With some of the finest writings on the subject, it brings together articles and interviews from leading authors, politicians, journalists, intellectuals, filmmakers and legal practitioners. The volume straddles between two apparently irreconcilable perspectives: (a) the view that the Maoist movement threatens the very core of democratic foundations, and should be perceived as a violent law & order situation justifying severe retaliatory measures, and (b) the counterview where Maoists are fiercely defended as revolutionaries and comrades of resistance, and the movement seen as the last-ditch struggle by those who have been abandoned over years by the State in its developmental process. The essays probe whether armed struggle is avoidable, whether the desperate desire for peace has simply been overtaken by political ideologies, and whether an inclusive developmental State policy may help restore faith in its democratic ethos. The book will be of interest to academics and students of politics, sociology, social anthropology and law. It will also be extremely useful to social workers, policymakers, politicians, bureaucrats, as well as the general reader.

Your Church Can Influence the World History has shown that great leaders have the ability to reach beyond the walls of their churches to influence cultures for Christ. We've seen it in the Pentecostal/Charismatic movement, in the explosive growth of house churches in Communist China, in the expansion of the Southern Baptist Convention, and in the worldwide rise of praise and worship music led by Hillsong Church, among other phenomena. In *The Ten Most Influential Churches of the Past Century*, Dr. Elmer Towns presents evidence of the powerful influence of these churches and how their innovative strategies and faith accomplish these goals. Then he tells how you can apply these principles to your church. You will learn how some of the most influential leaders in Church history became conduits for your future ministry and how your church can experience exponential growth. Most importantly, you will see that the great results in these ten churches grow out of the power of the Word of God, the ministry of many dedicated lay workers, the faith-producing ministry of great leaders—all under the anointing of the Holy Spirit.

This book provides a comprehensive treatment of the role of the private sector in accelerating the transition to a low-carbon, climate-resilient, and inclusive world. In the lead up to and since the historic Paris Agreement on climate change, more than 6,000 companies from 120 countries representing more than \$36.5 trillion in revenue have made climate commitments. Examining this trend, *The New Corporate Climate Leadership* provides a clear synthesis of the relationship between the real economy and climate change and offers a state-of-the-art assessment of corporate initiatives that focus on greenhouse gas emissions reductions and the management of climate risk through enhanced resilience. It debates the relative merits of incremental and sequenced ambition versus radical systems change - including a critique of the prevailing capitalist approach to climate change - and provides an actionable guide to skills development for change-makers in the shift toward a low-carbon world. Drawing on perspectives from leading thinkers inside the private sector, across government, and within civil society to truly interrogate the scale, scope, and speed of progress, this book provides a clear vision for what the next generation of corporate climate leadership should look like. Optimistic in tone, this book will be of great interest to students, scholars, and practitioners of climate change and sustainable business.

REVIEW OF 20 MOST INFLUENTIAL YOUNG PEOPLE IN TANZANIA JAMIIFORUMS

- This is a book that I feel I can hardly praise highly enough. It is no less, I feel, than the greatest tragedy in history. One's ranking can of course change with one's very next book, but at the time of writing I can hardly think of a more rewarding and yet more harrowing read. The Americas seem to represent a cornucopia of revelations and overturned expectations. For a start, palaeontologists seem to have underestimated, probably by a factor of 3 to 5, the duration of inhabitation of the continents. In fact, it seems that humans have been there long enough that the famous Bering land bridge could not have been open, leaving some mystery as to how and when people physically reached the hemisphere. At any rate, they have been there and been building civilisations for so long that the old and slightly pejorative "New World"- "Old World" dichotomy must be overturned. Jared Diamond's arsenal of guns, germs and steel must perhaps also be revised. While South America had never seen cavalry, this author reports that their cloth armour and light boats were so superior that the conquistadors immediately adopted them, while native arrows had greater range and penetration than the firearms of the day. So why were the Spanish still so effortlessly the victors? Well, it seems that germs get the genocidaire's accolade. Smallpox, influenza and measles, the germs of the Europeans and of the Europeans' pigs, had raced before the victors and left them kicking down the doors of societies already shattered and filled with people suffering an immune bottleneck from their small party of settling ancestors. The noble savage of the North was not living a timeless existence in harmony with nature - he had just staggered into the wilderness as his civilisation died behind him. There is surprise after surprise in this book. The Inka, far from having no metals, wrought exquisitely fine work in gold, silver and copper and were advanced metallurgists. They did not use metal for structures and weaponry, however. Their entire technological civilisation was an inversion of that of the Europeans, and based on the tensions in textiles. Across the continent on the unforgiving karst of the Yucatan, a writing system based on the weave and warp of textiles was perhaps the most sophisticated system of its day, only recently recognised as an alphabet at all and embodying some of the binary character of digital computer code. The Inka, in another inversion, apparently pursued a state-directed command economy - one that produced a burgeoning of surplus! Even the Amazon itself may be, in effect, a vast, extended orchard. Environmentalists generally recognise today that human-managed ecosystems tend to be richer and more diverse, but the Amazon seems to occupy a blind spot. Perhaps that will now be corrected. This is a staggering, wonderful read to which I will have to return. Neither the drab monochrome of Amazon's pages nor the spare serifs of its fonts can truly convey its majesty, no matter how I strive to praise it. It requires 3-D and 24-bit colour!

- Upon returning back to the states after my second trip to Israel I was completely captivated once again by the breath taking beauty of the country. Alas, once again I was also confused and confounded over my feelings of pride and anguish. "The Israelis : Ordinary People in an Extraordinary Land" by Donna Rosenthal, has helped to put some of my issues to rest. This is really a fabulous book.
