A “gorgeous novel” of two upper-class Pakistani families and the complicated love that develops between their children, by the author of Home Fire (Los Angeles Times). Raheen and her best friend, Karim, share an idyllic childhood in upper-class Karachi. Their parents were even once engaged to one another’s partners, until they rematched in what they call “the fiancée swap.” But as adolescence distances the friends, Karim takes refuge in maps while Raheen searches for the secret behind her parents’ exchange. What she uncovers reveals not just a family’s turbulent history, but also a country’s—and now a grown-up Raheen and Karim are caught between strained friendship and fated love. A love story with a family mystery at its heart, from an author named as one of the Orange Prize’s “21 Writers for the 21st Century,” Kartography transports readers to a world not often seen in fiction: vibrant, dangerous, sensuous Pakistan. “[Shamsie] has been described as a young Anita Desai, and her third book, about childhood, love, life and high society in Karachi during the turbulent 1990s, is worth all the prepublication fuss.” —Harper’s Bazaar “[Shamsie] packs her story with the playful evidence of her high-flying intelligence.” —San Francisco Chronicle “E. M. Forster’s famous plea—‘only connect’—reverberates passionately throughout this forceful tale of childhood, love and the power of story-telling.” —The Independent (UK) “Deftly woven, provocative . . . Shamsie’s blistering humor and ear for dialogue scorches through [a] whirl of whiskey and witticisms.” —The Observer (UK) “A shimmering, quick-witted lament and love story . . . Rich in emotional coloratura and wordplay.” —Publishers Weekly, starred review “Its artful uncovering of how people hide from themselves and

one another . . . echoes Arundhati Roy’s The God of Small Things.” —Kirkus Reviews

When young Iqbal is sold into slavery at a carpet factory, his arrival changes everything for the other overworked and abused children there. It is Iqbal who explains to them that despite their master's promises, he plans on keeping them as his slaves indefinitely. But it is also Iqbal who inspires the other children to look to a future free from toil...and is brave enough to show them how to get there. This moving fictionalized account of the real Iqbal Masih is told through the voice of Fatima, a young Pakistani girl whose life is changed by Iqbal's courage.

The process of user-centered innovation: how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy. Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. These innovating users—both individuals and firms—often freely share their innovations with others, creating user-innovation communities and a rich intellectual commons. In Democratizing Innovation, Eric von Hippel looks closely at this emerging system of user-centered innovation. He explains why and when users find it profitable to develop new products and services for themselves, and why it often pays users to reveal their innovations freely for the use of all. The trend toward democratized innovation can be seen in software and information products—most notably in the free and open-source software movement—but also in physical products. Von Hippel's many examples of user innovation in action range from surgical equipment to surfboards to software security features. He shows that product and service development is concentrated among "lead users," who are ahead on marketplace trends and whose innovations are often commercially attractive. Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users. He points to businesses—the custom semiconductor industry is one example—that have learned to assist user-innovators by providing them with toolkits for developing new products. User innovation has a positive impact on social welfare, and von Hippel proposes that government policies, including R&D subsidies and tax credits, should be realigned to eliminate biases against it. The goal of a democratized user-centered innovation system, says von Hippel, is well worth striving for. An electronic version of this book is available under a Creative Commons license.

#### **Harmonizing the Body's Subtle Energy Exchange With the Environment** Springer Nature

Based on over 45 years of research, BioGeometry Signatures are linear diagrams that help balance the subtle energy of body organs. The organ subtle energy patterns are accessed through BioGeometry Signatures placed externally in the body's energy fields to create a connection through Resonance of Shape. "This is a book that will change the way you think about your body and your health. It shows that we are not separate from the shapes, angles and proportions that surround us all the time, and that these shapes create energetic patterns that can introduce equilibrium and harmony into our own biological makeup. This is a modern science of energy balancing that provides the key to the hidden ancient knowledge of great civilizations. With BioGeometry, Dr. Ibrahim Karim has demonstrated how powerful simple shapes can be in altering the functioning of our physical, mental, and spiritual worlds. This has been frequently demonstrated in architectural and design projects, environmental balancing solutions including the mitigation of the effects of electro-pollution and geopathic stress, in health and wellness projects, and in the efforts of individuals in their personal spiritual development. In this book on BioGeometry Signatures, once again you see how powerful certain carefully created shapes can be in altering the physical functioning of organ systems, in supporting healing, and in changing physical and mental states. Work with them, let them touch you, and feel how they can assist

you in your own search for harmony." Michael J. Maley, Ph.D. Instructor in BioGeometry

A comprehensive and multidisciplinary view of the emerging paradigm of user and open innovation, offering both theoretical and empirical perspectives. The last two decades have witnessed an extraordinary growth of new models of managing and organizing the innovation process that emphasizes users over producers. Large parts of the knowledge economy now routinely rely on users, communities, and open innovation approaches to solve important technological and organizational problems. This view of innovation, pioneered by the economist Eric von Hippel, counters the dominant paradigm, which cast the profit-seeking incentives of firms as the main driver of technical change. In a series of influential writings, von Hippel and colleagues found empirical evidence that flatly contradicted the producer-centered model of innovation. Since then, the study of user-driven innovation has continued and expanded, with further empirical exploration of a distributed model of innovation that includes communities and platforms in a variety of contexts and with the development of theory to explain the economic underpinnings of this still emerging paradigm. This volume provides a comprehensive and multidisciplinary view of the field of user and open innovation, reflecting advances in the field over the last several decades. The contributors—including many colleagues of Eric von Hippel—offer both theoretical and empirical perspectives from such diverse fields as economics, the history of science and technology, law, management, and policy. The empirical contexts for their studies range from household goods to financial services. After discussing the fundamentals of user innovation, the contributors cover communities and innovation; legal aspects of user and community innovation; new roles for user innovators; user interactions with firms; and user innovation in practice, describing experiments, toolkits, and crowdsourcing, and crowdfunding. Kosher sushi, kebab stands, a secondhand bookstore, and a bar: the 19th arrondissement in Paris has all the trappings of a cosmopolitan melting pot—a place where multiethnic citizens live, love, and worship alongside one another. But dark passions are brewing beneath the seemingly idyllic vision of peacefully coexisting ethnicities. Ahmed Taroudant is an archetypal French

Arab-non-observant, unable to reconcile his conflicting identities, and troubled by the past. A crime fiction connoisseur, Ahmed is engrossed in his latest book when he finds blood dripping from his upstairs neighbor's apartment. There, Laura Vignole is found brutally murdered, with a joint of pork placed near her body, prompting the obvious conclusion that the killer had religious motives. As the neighborhood erupts into speculation and gossip, Ahmed finds himself first among many suspects. Detectives Rachel Kupferstein and Jean Hamelot attempt to untangle the complex web of events leading up to Laura's death, but truth is hard to come by, with each inhabitant—an Armenian anarchist, a Turkish kebab-shop owner, and a Hasidic Rastafarian—reluctant to reveal anything. Determined to clear his name, Ahmed joins the detectives as they investigate the connection between a disbanded hip-hop group and the fiery extremist preachers clamoring for attention in the streets. Meanwhile, an ecstasy variant called Godzwill is taking the district by storm. In his debut novel, Karim Miské demonstrates a masterful control of setting, as he moves effortlessly between the sensual streets of Paris and the synagogues of New York to reveal the truth behind a horrifying crime.

- The sustaining characters in M Karim Solution Class 11th Physics publication additionally play a crucial function in the tale, with every one adding depth and intricacy to the story.
- From the protagonist's devoted buddy to the mysterious complete stranger the villain befriends, the supporting cast aids to bring the globe of the tale to life.

Overall, the personality growth in this publication is just one of its toughness. Each character is well-crafted and adds to the general story, making for an absolutely satisfying read.

#### **REVIEW OF M KARIM SOLUTION CLASS 11TH PHYSICS**

- I ordered this for a friend and she loved it. It arrived on time and in great shape. She found it to contain exactly what she wanted and is using it as a daily guide. In the future she wants more books by this author.

- The setting is strong and the characters are interesting. This series has been given accolades for a quarter-century, and I know it has promise, and I know I'll keep reading. Even with all this, the sophomore entry in this series was a let-down in tension. Tension doesn't have to be big sea battles between military-grade warships, but it does have to be engaging and threaten the protagonist. Other than a somewhat minor relationship issue between Jack and Sophie and Diana the only real novel-length theme was Jack's continuing struggles with his finances. As a chronicle of the life in opening of the nineteenth century it is a great book. It demonstrated the core of military power - the Navy and it's ongoing internal political struggles as well as a rivalry with the Army. More interesting than Jack Aubrey and his money troubles is the revelations in this volume of the hidden life of Stephen Maturin, land-heir and intelligence spy - but for whom? His mini-adventures and influence keep one interested in the book and keep one guessing. It's a serviceable book in the series, which put it above many author's best work. - CV Rick, February 2008
