REVIEW OF TRADING OPTION GREEKS HOW TIME VOLATILITY AND OTHER PRICING FACTORS DRIVE PROFITS

- Masaru Emoto, a Japanese scientist has his heart in the right place. He photographed crystals formed in frozen water that had been exposed to either positive or negative vibrations via words or images. The photos are remarkable. His conclusion is that love and gratitude can transform you and the world. This conclusion results from his findings that molecules of water exposed to those words and thoughts produced very vibrant and beautifully formed symmetrical patterns. In contrast, molecules exposed to negative forces produced incomplete images with dull colors. Since the human being is mostly water, Emoto claims that his research suggests that we create our world and how we feel by the language we use to label ourselves and our experiences. His bottom line is to treat yourself and others well by expressing love and gratitude. The science is somewhat questionable, but the message is important.

- A terrific book that plays upon the stereotypes of pulp fantasy. I highly recommend this book! Find

a copy, even if it's used; you'll enjoy it.
