REVIEW OF BOEING 767 STUDY GUIDE

- Readers of Russian politics and world peace will find Biowarrior: Inside the Soviet/Russian Biological War Machine to be an intriguing insider's look at the Soviet biological war machine, written by a leading Russian scientist who worked for decades at the heart of the program. Igor Domaradskij was a dedicated scientist who was often in conflict with military approaches: he became a specialist in epidemic bacterial infections, and was responsible for plague control within the former USSR, and also helped design the Soviet military's bio-weapons program. A chilling account, Biowarrior is a welcome and informative addition to the growing body of Cold War Era information that has come to light since the downfall of the old communist empire.

- In ChiRunning (and its other marketing permutations, including workshops) Dreyer advocates a running technique that is used by many world-class runners. It has to do with particular physical postures while running such as a forward lean. Dreyer didn't develop the technique nor was he the first to write about it. But to his credit, he did recognize that the technique works and adopted it in his own running. However, Dreyer was undoubtedly confronted with a challenge when he sat down to write his first book - how does a woodworker (his vocation for 15 years) who began running ultramarathons as an adult sell books and workshops on running in a culture that wants to know what your credentials are? The answer is add a pinch of Eastern mysticism (Tai Chi) and voila, ChiRunning! Understand that the running technique that Dreyer advocates did not arise out of Tai Chi. Rather, Dreyer resorts to referring to a Tai Chi master he bumped into while running as someone who is supportive of the running technique Dreyer advocates. Dreyer (and many others before him) already used the technique; this particular Tai Chi master has now also given his benediction. In fairness to Dreyer, he does use Tai Chi principles (such as "going with the flow" and "the path of least resistance") in his mental and spiritual approach to running. But these principles are separable from the running technique. You don't, for example, need to "tap into your Chi" to begin running with a forward lean. Not surprisingly, Dreyer's explanations for why the technique works are a hodge podge. Lacking a background in physiology, anatomy, biomechanics, or physics, his explanations of the mechanics of running movements are, at best, amateurish. As a result, the reader is confronted with absurd section headings such as "The stages of learning effortless, injury free running." The most technically efficient runner in the world expends plenty of effort while running (and trains accordingly). And even Dreyer admits he took 3 and years to prepare for his first ultramarathon. In these instances Eastern mysticism serves as a smokescreen for Dreyer's lack of expertise regarding the fundamental physical forces and principles at work while a person runs. The book is also woefully short on drills for implementing the changes most runners will have to make to implement the physical techniques Dreyer recommends. As anyone who has ever participated in a sport knows, learning even basic techniques requires concerted effort and practice. Dreyer's short list of drills includes such admonitions as concentrating on rotating your pelvis from the T12/L1 spinal column level (ever tried that one?) and to have someone shout at you to "Stop Running!" to make you mindful of how you move when you are trying to move fast but can't run. ChiRunning will introduce you to a more efficient technique for running. But if you want to have a substantially similar technique explained by someone who actually knows about the mechanics of running and has a more systematic program for incorporating recommended changes, I would recommend Dr. Nicholas Romanov's Pose Method of Running. Romanov is a Russian trained sports scientist who has coached Olympic athletes and has the sports and running expertise Dreyer lacks.
