This book brings together recent research on interpersonal relationships in education from a variety of perspectives including research from Europe, North America and Australia. The work clearly demonstrates that positive teacher-student relationships can contribute to student learning in classrooms of various types. Productive

learning environments are characterized by supportive and warm interactions throughout the class: teacher-student and student-student. Similarly, at the school level, teacher learning thrives when there are positive and mentoring interrelationships among professional colleagues. Work on this book began with a series of formative presentations at the second International Conference on Interpersonal Relationships in Education (ICIRE 2012) held in Vancouver, Canada, an event that included among others, keynote addresses by David Berliner, Andrew Martin and Mieke Brekelmans. Further collaboration and peer review by the editorial team resulted in the collection of original research that this book comprises. The volume (while eclectic) demonstrates how constructive learning environment relationships can be developed and sustained in a variety of settings. Chapter contributions come from a range of fields including educational and social psychology, teacher and school effectiveness research, communication and language studies, and a variety of related fields. Together, they cover the important influence of the relationships of teachers with individual students, relationships among peers, and the relationships between teachers and their professional colleagues.

Beyond that, they offer clear guidelines for effective public communication. Public Relations Review This book discusses the strategy of targeted communication and explains the steps necessary to plan and implement an effective information program. Selnow and Crano both place their recommendations in a communication theory and research perspective and show them to have practical application in real-world programs. They deal not only with the how to's, but with the why's as well.

REVIEW OF DISADVANTAGES OF INTERPERSONAL COMMUNICATION

- If you collect Hot Wheels Variations, this is the book you want! Real prices,

real cars, no rumor cars and more information than you could ever want! Great book for any collector. I followed Micks' web page for years and now it's in a book. You couldn't ask for more. Color pictures of cars I have never seen, all kinds of stuff. Great book.

- I have read most of the rest of Silver's books, and have for the most part gone "past" her style, etc. However, THIS book was a definite surprise, as it's a much less "buddy-buddy" writing, and is a more thruroughly researched, "thesis" sort of work. Check out her bibliography, it's REALLY impressive!
