without the requirement for a web connection.

Beginning discovering the globe of PDF Leica Geo Office V8 3 0 0 13017 today and unlock the capacity for a richer, a lot more satisfying discovering experience.

REVIEW OF LEICA GEO OFFICE V8 3 0 0 13017

- My rating of the book is 4 stars because I am avid reader of early to rise and had been exposed to many of the concepts Michael Masterson details in the book before. I would say about 50% of the book is stuff you would have already read in the newsletter and the

other 50% provides a more in depth look at the ideas Masterson believes most passionately in such as investing in real estate to boost your wealth. I still think the book is worth reading if you subscribe to the newsletter because exposing yourself to the ideas presented more than once is certainly not a waste of time. If you are not an Early to Rise reader and are looking for some practical and implementable wealth building advice the book is worth 5 stars because it presents a detailed system that has worked to make many people financially independent. While I do not disagree with Masterson's advice regarding stocks especially since he

makes it clear in the book he has written a how to guide of the principles that worked for him. I do think he missed the boat on one very beneficial way to invest in stocks in your wealth building activities, via your 401(k). If you have a 401(k) available to you to invest in and you focus on investing in a way that seeks to minimize loss as opposed to maximizing gain I think it is a very practical way to maintain liquidity and still put your money to work building wealth while taking full advantage of a nice tax break and a "free" salary increase if your employer offers a match. I base this on my own current experience. I am currently working a full time job while starting a side business and I prefer spending my time on that as opposed to learning about and investing in real estate. With just a few hours a month I have been able to do well enough with the options in my 401(K) plan to outperform a portfolio of just bonds by 5 - 10%. The reason I mention this is that I was exposed to all of the advisors I rely upon in early to rise and as expected they provide excellent advice on how to make the stock market work for you. I think listing these advisors in the part of the book were he mentions that he knows some people who are able to beat the market would have been helpful for those people who would want to invest a certain

portion of their money in stocks to maximize their salary and reduce their taxes because of a situation similar to mine. This is a minor

grievance however and overall the book is well worth anyone's time.

- I find it a very useful book, make the map of your plan, a must.
