REVIEW OF ENVIRONMENTAL ENGINEERING BY DAVIS AND CORNWELL

- Jason, Hey, Wait... (Fantagraphics, 2001) Graphic novel artist Jason made a huge splash with this slim volume when it first came out a few years back. It's pretty easy to see why; with a minimum of dialogue and a lot of abstraction, Jason paints a deeply affecting pastiche. The story concerns two childhood friends who decide to start a fan club. While they're planning out

the initiation, something goes horribly wrong, and the rest of the book deals with one friend's lifelong reaction to a life-changing event. Hey, Wait... is unflinching. If you haven't yet come to the world of graphic novels, this is a great place to start; even the toughest critics of graphic novels, I should think, would be hard-pressed to deny the emotional power of this little tale (and it certainly puts to bed the idea that all comics are for kids). ****

- For Charles Williams Words are everything. Why? We are not God and we don't live in heaven, so Words are the things we must stand by. A Word is much more than an utterance said, or written. It is, for Williams, an act of adoration--or blasphemy. It is the stuff that fills up life and makes it human. Or not. That, I think, is the key to Williams plays. Words do not so much signify as exist. They are bricks. Word upon Word, they build up patterns of being, real or an illusion, something or nothing, an arrangement of truth or lies, fashioned by Words uttered--and lived. God's or yours.
