REVIEW OF CHAPTER 9 LEARNING PRINCIPLES AND APPLICATIONS

• Wow. I wanted to buy a noteworthy book that was definitive re: old USSR. I looked to award winning books on the subject and then, as always, checked with Amazonian's ratings. Before I started the book I assumed I would read some, scan some and re-educate myself on the subject. It was GREAT READING. A book that describes despair, fear and degradation of an entire nation of people. One asks oneself, again and again throughout history, what conditions of the mind must exist that have throughout time enabled those in power to justify the destruction of the human spirit. Of course that begs the question as to how those STAY in power for decades on end. Author Remnick writes wonderfully and easily of tough experiences and yet they are not so horrific when laid on the page by this author, rather this book does read like a novel and thus it is easlily digested and hard to stop reading. Fascinating stuff which includes how the book itself was researched and written. Read this book, you won't be sorry. I would love to find another non-fictional account on any subject matter that rivals this. I'd love to know if there are any good suggestions.

• This book is based on a BBC documentary of the same name. The book is written so that any history freak can read and enjoy it. Many, Many pictures and maps make it more understandable. Some of the pictures are even re-enactments and are very interesting to look at.
