REVIEW OF DIGITAL MARKETING STRATEGY IMPLEMENTATION AND PRACTICE

- This book, this series, is one of the best books I have ever read. I bought the whole series! I recommend you do the same. If you are a WWII buff, or like the military, you'll adore this series. I like the point of view of the Lizards. Adds sympathy.
- I don't always like Turtledove- he can be long-winded at times. But this one I did enjoy. I believe science fiction is best when it only minimally changes reality- you get one or two allowances for impossible things, and then work from there. This is what Turtledove does- assume WWII, and assume alien invaders at that time. Both are possible- it just didn't happen. And the neat addition- the alien invaders aren't really that advanced. In fact, if they were to have arrived when we humans were another 50 years advanced, they'd be technologically inferior. But they don't, and thus the conflict of the story. Turtledove writes the characters quite well, and I remained interested in all of them. You feel the real emotions of these characters; you want to see what they will do next; you understand why they respond to these problems because part of you would respond the same way. Sometimes you see a long list of characters at the beginning of a novel (such as *War and Peace* or the never-ending *Wheel of Time* series), and you think, "Oh, no- I'll never be able to keep them all straight!" In this case, each character is clear, distinct, and easily remembered. Thus Turtledove pulls us from the Russian steppes to Nazi Germany to alien space craft to the radar

detectors of Britian and the battlefields of Chicago- and we eagerly follow along to see how next the world can stem off invasion. Or participate with it.
