REVIEW OF OWL MOON

- Loved it, never read it before and was well worth the read, another classic, no wonder but it can stand the test of time
- Considering the average hypnosis book. Nothing, and I mean nothing is more amazing than the Hypno-Cybernetics system. Sure the method is simple. (Three steps) But in the few days that I've had this book. Wow is just the bottom of the barrel describing Dr. Petrie & Dr. Stone's system of sdubconscious programming. I did the chair and suconscious signal finger raising and subconscious command excercise, (the core of the three steps I was talking about) and the results were just amazing. And on my first day doing it. I recently went on Dr. Petrie's website for his hypnosis institute. Know that this book was written in 1973, you can only wonder what they can do now in one day. I believe and know that their claims are true and real about being able to cure certain phobias and ailments in one day because of the powerfully instant results I had with this book. This review is as for real as "a house on fire". Believe me, when I say that this book is an amazing read and practice -- I mean you read it, you do it, then you experience the incredible results.Captain Josh.
