## REVIEW OF WESTMINSTER MATH EXAMS

- "The Traveler" by Antal Szerb is a book relating the difficult life of Mihaly, the journey he goes through being a teenager dealing

with suicidal thoughts, alcohol consumption, and even drug consumption. In this book, Mihaly is relating his life to her wife Erzsébet telling her about his adventures, games, and love stories of his teenage years, not knowing that this will fill Mihaly's head with thoughts of "what would have been if?" questions. So in the middle of his honeymoon in Italy he starts the search of all the questions he had left unanswered leaving her newly wife alone, and also not knowing that this search will put him in danger and just in the door of death. This book will have you literally hooked wondering what will happen next, if you like suspense this book is

the right for you I myself read it in just two days that's how good it is.

- This book contains some great information for the initial architecture of a site, however, if you are not a librarian by trade the overwhelming references to this profession become extremely annoying. The basic info also seems to ramble on and get restated rather than expounded upon. Overall the book does hit on some interesting points, but the lessons could have been condensed and more case studies could have been added.
