REVIEW OF A VISUAL ANALOGY GUIDE TO HUMAN ANATOMY PHYSIOLOGY

• This book by Pegge Bernecker is a wonderful resource to use any time of the year, any time of your life and probably even more than once during your life as your life cycles. I particularly like the way the author weaves in everyday objects of your life as reflection points to help you deepen your connection to God. She asks some of the tough questions about faith and your relationship to God which beg to be thought about and acted upon. I

also like the fact that while the book could certainly be used as a small group retreat/faith sharing resource, it is quite easy to use as a single person on their own. The insights I have received so far have surprised me. I encourage anyone looking for a way to deepen their spiritual journey and their relationship to God to check this book out and use it. The book begs for more symbols used in the text to air it out.

• In the opinion of a well-informed agricultural scientist pushing 79 who has been exposed to the ideas of conservation and sustainability in ag school more than 60 years ago (in 1943) Diamond's "Collapse" is the most well-documented, sophisticated and yet not overly alarmist book published to date on the subject. Its message is an ominous warning: in the near future (within 25 years or so) human society in the entire world, not merely this or that region (e.g. China) may suffer terrible consequences if continuing universal environmental damage and overpopulation are not radically dealt with. My children and my grandchildren - and yours - will suffer the consequences. Many readers noted that with a good editor the book could be much shorter (I agree). Nevertheless, as it stands, it is brilliant and devastating. Watch out! There are lots of reviews by laymen who ignore the principles of conservation of resources (water, land, fish, fresh air, energy, ores etc.) and those of sustainability. A number of vocal detractors only read passages and a few hardly glanced at the book. Some concentrate on criticizing non-essential errors in the book. I read the book from A to Z and very many reviews. What I have to say has been said. I suggest you START with two early-bird reviews labeled (by Amazon) "Most helpful": that of Ellis O. Jones (Jan 7, 2005) and of J.P.G. Cox. (Jan 3, 2005). Both gave COLLAPSE five stars; by now (August 22, 2005) Jones got 375 out of 406 HELPFUL votes and Cox 261 out of 311. That's an average 86% of helpful-favorable votes from a sample of 717. This value may well be considered as the consensus of the readers.
