The Earth receives 174 Petawatts (PW) of incoming solar radiation at the upper atmosphere. Approximately 30 % of its radiation is reflected back to space while the rest of 71 % (124 PW) is absorbed by clouds, oceans and land masses. The world cumulative solar PV installed capacity reached almost 398 Gigawatts (GW) in 2018. This is only about 0.3 % of solar energy utilization from the sun. There is a wide gap of utilization is noticed due to lack of technology. In 1931 selenium cell efficiency of 1% invented then in 1980 thin films cell efficiency of 6-7% introduced. After 2013, efficiency of 18 to 21% achieved by crystalline silicon technology. In India, the installed capacity of till 2018 is of 350 GW which includes renewable and non-renewable energy sources. In that the cumulative installed solar capacity is only about 25 GW. By 2022, India wants to install 175 Gigawatt (GW) of renewable power capacity which corresponds to around

half of its total electricity production. To achieve this capacity by improving solar cell efficiency from 20 % to 40 %, augmentation of grid infrastructure, massive subsidies and skilled manpower of 3 lakhs persons for the next three years to achieve the planned target. Most of the world's population lives in areas with solar insolation levels of 150 to 300 watts/m² or 3.5 to 7.0 kWh/m² per day. In India, the per capita electricity consumption from 2017 to 2018 was around 1150 to 2000 kWh. The electricity demand in the country will grow at 7 % between FY 2017 and FY 2022 and 57 % of the total electricity capacity will be generated from renewable sources by 2027 as per Central Electricity Authority (CEA). In 2011, a report by the International Energy Agency (IEA) found that solar energy technologies such as photovoltaic, solar hot water and concentrated solar power could provide a third of the world's energy by 2060.

A guide for mining the imagination to find powerful new ways to succeed. We need imagination now more than ever—to find new opportunities, rethink our businesses, and discover paths to growth. Yet too many companies have lost their ability to imagine. What is this mysterious capacity? How does imagination work? And how can organizations keep it alive and harness it in a systematic way? The Imagination Machine answers these questions and more. Drawing on the experience and insights of CEOs across several industries, as well as lessons from neuroscience, computer science, psychology, and philosophy, Martin Reeves of Boston Consulting Group's Henderson Institute and Jack Fuller, an expert in neuroscience, provide a fascinating look into the mechanics of imagination and lay out a process for creating ideas and bringing them to life: The Seduction: How to open yourself up to surprises The Idea: How to generate new ideas The Collision: How to rethink your idea based on real-world feedback The Epidemic: How to spread an evolving idea to others The New Ordinary: How to turn your novel idea into an accepted

reality The Encore: How to repeat the process—again and again. Imagination is one of the least understood but most crucial ingredients of success. It's what makes the difference between an incremental change and the kinds of pivots and paradigm shifts that are essential to transformation—especially during a crisis. The Imagination Machine is the guide you need to demystify and operationalize this powerful human capacity, to inject new life into your company, and to head into unknown territory with the right tools at your disposal.

Over the past decade, businesses have faced relentless change on multiple dimensions, and the list of the world's largest companies has changed enormously. The keys to success are likely to be just as different for the new decade. Winning the '20s analyzes the new competitive environment that businesses face and outlines what will it take to win in the 2020s. To stay ahead of the trends that are reshaping business, leaders need to rethink existing assumptions and retool their companies. Both traditional incumbents and younger digital giants will face very different but equally critical challenges in the 2020s—and would do well to learn from each other's strengths. This book discusses the new dimensions of competition that will affect corporate strategy in the next decade and how leaders can reinvent their organizations to be better suited for the new environment. The companies that succeed in the 2020s will look very different than they do today—they will have evolved their businesses to harness new technologies and reshaped their external relationships,

organizations, and approaches accordingly. Winning the '20s will help business professionals as well as academics and students with an interest in strategy and leadership answer this critical question for the start of this decade: How should you prepare your company to avoid being left behind and emerge as a winner in a rapidly evolving business landscape?

This book, in a short space, covers an extensive ground of Hindu teachings. It provides a panoramic view of a Hindu approaches to religion, philosophy, science, politics, mythology, art, the role of women, and the past and the future of humanity.—Dr. David Frawley Redundancy of the idea of religion seems to be growing in an age in which any mystery can be demystified by science. It also seems as if patronising religion is outdated in today's so-called progressive world. However, adaptability and progressiveness have been the basic requisites of Hindu philosophy. Hence it requires its followers to evolve with change. Through this book, the authors have tried to endorse the role of Hinduism in the formation and development of human society. They have looked back at the conception, evolution and sustenance of Indian society through the lens of Hinduism, and have tried to explain this process through short Hindu mythological tales. We believe decoding folklore is also a source of understanding the history of any given period. Different tales spanning different ages and times bring forth a completely different picture of the mores and morality of our society, which still abide with the constant basic principles of Hinduism. This signifies the adaptability of this great religion with changing times. The reader will discover that, eventually, the core values of Hinduism remain the same and support its relevance today and will continue to do so for eternity. The universe is made up of stories, not of atoms.—Muriel Rukeyser, Writer and Poetess

REVIEW OF MPPKVCL RECRUITMENT 2018 APPLY FOR MPEB 196 TA OA VACANCIES

- Herbert Lockyer's painstaking collection of famous death bed professions and confessions are both inspiring and disturbing. Apparently, when death is approaching both saints and sinners alike will reveal their true thoughts and beliefs. Hatsoff to yet another Herbert Lockyer best seller. (If not it should be). Read this book if you are a Christian and see what self examination will bring. If you are not a believer by all means read it anyway.
- This is a classic work of historical research. It is a must for any student of English history. It is concise and to the point. I especially enjoy the early centuries.
