## **REVIEW OF NETWORK SECURITY MONITORING BASICS FOR BEGINNERS**

- Lauren Willig is all about mixing the genres on mystery, historical fiction and romance. I actually read the second book (The Masque of the Black Tulip) first and only liked it so-so. However, this first one is much better. The author makes the mixing of genres work in this book, where she didn't in the other. The

romance wasn't too ridiculous, the characters fun and likable, the historical context appropriate (though ONLY the context is non-fiction, the story is entirely made up) and the mystery remain an undercurrent in the book without the other pieces taking over. Willig remembers each piece of book (romance, mystery and history) and balances them well.

- To write her dissertation on the great spies, the Scarlet Pimpernel and the Purple Gentian, Eloise Kelly goes to England. While there she meets Mrs. Selwick-Adderly, a relative of the Purple Gentian who allows her to go through a trunk of old letters and papers relevant to her search. Unfortunately,

her nephew Colin doesn't approve but in the end, Eloise wins out. And what a treasure trove it is. And the characters are absolutely wonderful! Amy who wants to become part of the Purple Gentian's league of spies, her sidekick cousin Jane and my personal favorite, Miss Gwen - their chaperone. These 3 travel to France in the hopes of finding the Purple Gentian and having great adventures. This book has so much humor - I think you could read it more than once and pick up more nuances. It's absolute fabulous, not to mention suspenseful and surprising. The identity of the great spy, the Pink Carnation, comes completely out of the blue! The Pink

Carnation will have more adventures and I will be the first in line to get the next one. I hope you will enjoy this book as much as I did.
