## **REVIEW OF SIEMATIC LIGHT MANUAL**

- If I try to think in components as to what makes the princess bride such an unforgettable book, I would fail miserably.. the concept, the style, the plot, the character...I really dont know. It is a book that simply put, comes together beautifully. What makes the book amazing is the fact that you realise that it is so unreal only when you try to describe to someone who hasn't read it,(and fail miserably in the attempt). A review on the book therefore seems presumptuous, but a reaction to the

Princess bride is simply.... well, actually, it's not simple at all.... and that is what will keep it on my bedside for a long long time.

- This is a lovely facimile of a book hours in the bodleian library in oxford. This book of hours was made by "the master of Mary of Burgundy" in the early 16th century. In additon to the 'carpet pages' of this manuscript, various text pages are also reproduced. Many of the illustrated pages have gold leaf on them and an gold ink is used to reproduce this effect. My only complaint with this book is that this ink has in some places

obscured details of the manuscript and made pages look heavier than I think they probably do in the orginal work.If you have read any books on illuminated manuscripts in the past, you might be suprised by the number of pages you will recognise in this book. In size the book is quite small. Quite litrely the size of your palm, and this is a reflection on the actual size of the manuscript in Oxford. The publishers have tried to reproduce the facilmile as close as possible to the orginal where they could.If you are interested in illumanated manuscripts this book is worth having.
