• The subject line says it all. I began my

research into climate change with this book and it couldn't have been a better choice. Well-written, to the point, interesting--this book is the perfect start. This will spark your interest in various aspects of climate change and allow you to do more specified research later. If you aren't a well-versed climate expert yet, pick up this book and get a going.

• This book was very interesting. It deals with a lot of important issues that many teens experience today. The Fairy "Mab" gives the book a little wild twist as she flies around with the main character through her adventures and discoveries.
