## **REVIEW OF 12 CHAPTER 6 SHODHGANGA**

- St. Augustine's immortal classic is incredibly long and very, very hard to follow at times. When I set out to read this a

few years ago, I had no idea what I was getting into. I read it because a professor I had in college that I greatly respected told me he'd never been able to read it all the way through, and I thought my reading it would impress him, or something. It took me forever, but I read it from cover to cover, and it was a rewarding experience. The book is essentially a very long examination of Christian theology, contrasted sharply with Roman paganism. There are very few theological questions that aren't at least touched upon; many of the ideas that would vex Christian philosophers for centuries are first addressed here. Augustine brings a fine, lucid mind and

good instinct for argument and rhetoric to the discussion. This book is a must-read for anyone who takes the intellectual component of their Christian faith seriously. Highly recommended.

- These audubon guides are good basic guides. We got them to identify butterflies, insects and spiders in our midwestern back yard. It is often difficult to find the bugs we are looking for. We've had much more luck with Kenn Kaufman's "Field

Guide to Insects of North America". In some ways it's more user friendly, with lots of bugs photos on one page and descriptions that are on the opposing text page. The Audubon guide is set up so that you have to flip back and forth between images in one section and text/description in another - which can be tedious - however, the Audubon descriptions are much more thorough than Kaufman's.
