With her sort-of boyfriend Marcus calling it quits and her ex-boyfriend Andrew showing up out of the blue, Kathleen has more than enough drama to deal with—and that's before a local theatre festival relocates to Mayville Heights. Now the town is buzzing with theatre folk, and many of them

have their own private dramas with the director, Hugh Davis. When Davis is found shot to death by the marina, he leaves behind evidence of blackmail and fraud, as well as an ensemble of suspects. Now Kathleen, with a little help from her feline friends Owen and Hercules, will have to catch the real killer before another victim takes a final curtain call.

Librarian Kathleen Paulson and her inquisitive cats find themselves in a jam when a musician turns up dead, in the newest installment of this New York Times bestselling series. It's summer in Mayville Heights, and Kathleen Paulson and

her detective boyfriend, Marcus, are eager to attend the closing concert of the local music festival. The concert is a success, but then one of the band members is discovered dead shortly after it. At first it's assumed the death is a robbery gone wrong, but Kathleen suspects foul play--and she's certain that she, along with her trusty side-cats, Owen and Hercules, can help solve the murder. Before his death, Kathleen had noticed the victim in the library researching his genealogy, and when she and Marcus take a closer look at the man's family tree, they begin to think a previous death of one of his relatives now seems suspicious. The more Kathleen thinks

about it, the more this murder feels like it could be an encore performance. Kathleen and her cats will need to act fast and be very careful if they want to stay off of a killer's hit list.

It turns out that Roscoe's owner has a new girlfriend who's put the poor cat on a deprivation diet—and that's not the only bad news in *Brimful Coffers*. There's been a fatal hit-and-run and escalating tensions—and before she knows it, the mystery writer will be investigating a real-life murder case . . . REVIEW OF CURIOSITY THRILLED THE CAT A MAGICAL CATS MYSTERY

- One of the best computer books ever. If you use Unix, you must have this book.

Emacs is one of the fastest and best text editors available, but it is difficult to learn how to use it. This book is clearly written and has an excellent index which points you right to what you are looking for. The reference card is also very convenient. Buy this book!

- There's a reason all the famous web-design folks recommend this book. It's still about the only book that addresses the design of `_information_`, and it still does the job very well. O'Reilly has become justifiably famous with its user-friendly technical volumes, but this one is a bit of a departure. There isn't anything in here about how to code anything; there are no handy lists of functions or commands for easy reference.

What there is is a thorough, focused but wide-ranging discussion of the issues facing someone who wants to make electronic information usable and accessible via a website. (That includes database design, by the way. There isn't all that much detail and it's in the context of making websites searchable, but there's good discussion of e.g. controlled-vocabulary terms and how users actually look for information.) The overall approach is refreshingly big-picture: the authors emphasize, for example, navigation `_systems_` and labelling `_systems_` (rather than just "labels"), and they devote an entire chapter to "conceptual

design." No wonder, three and a half years after its initial publication, it's still the standard reference work in a field that usually puts books out of date overnight. And no wonder Jakob Nielsen thinks well enough of it to write the foreword. If you know who Nielsen is, you probably already have this book; but since none of the information on this page credits his contribution, it can't hurt to let readers know. Ostensibly devoted to websites but generally applicable to any context in which electronic information has to be organized, this book should be somewhere on the shelf of every IT professional. If you like Steve Krug's *Don't Make Me Think!* (as I do), you'll like this one too -- maybe better. (Krug's book is a good one to show your boss; this is a good one to read whether your boss sees it or not.)
