REVIEW OF PHYSIOLOGICAL BASIS OF AGING AND GERIATRICS FOURTH EDITION

- I really liked this book. It covers the Java language in detail, albeit very quickly. As others said it isn't for true beginners. It may be for Java newbies who have delved into other languages, but not true newbie programmer (for that I would recommend *Head First Java*). It seems like that it was almost intended for beginners because the first chapter starts with hello world, but it quickly picks up from there. I read other reviews so I knew what I

was getting. I have been programming in java (not professionally) for about a year and have read some other books and dabbled in the language. I would say it is great for someone in-between beginner and intermediate as this is where I am and I feel like it is perfect for me. I just can't see a true beginner being able to follow some chapters, because it moves very quickly. In short great book, but not for true beginners.

- This terrific little book tells a mix of traditional folktales and the

author's own experiences as an Inupiat Eskimo of Northwest Alaska. Paul Green lived from the end time of the traditional Eskimo culture ca. 1900 into the 1970s and seems to have been cheerfully comfortable and confident in both. A plus: the book is written in Village English, the curious and charming dialect spoken by older Alaska Natives all over the state, even today. Another plus: sketches by George Ahgupuk, a famous Eskimo pen-and-ink artist.
