**blue origin interview process: The Power of the Past** Jessi Streib, 2015 Drawing upon interviews with adults married to a partner of a different class background, *The Power of the Past* reveals the intimate connections between love and class and how enduring class attributes shape who they love and how their marriage unfolds.

**blue origin interview process: The Six** Loren Grush, 2024-10-22 "Vivid." —The Guardian \* "Engrossing." —Booklist \* "Suspenseful, meticulously observed, enlightening." —Margot Lee Shetterly, #1 New York Times bestselling author of *Hidden Figures* In this account of America's first women astronauts "Grush skillfully weaves a story that, at its heart, is about desire: not a nation's desire to conquer space, but the longing of six women to reach heights that were forbidden to them" (The New York Times). When NASA sent astronauts to the moon in the 1960s and 1970s the agency excluded women from the corps, arguing that only military test pilots—a group then made up exclusively of men—had the right stuff. It was an era in which women were steered away from jobs in science and deemed unqualified for space flight. Eventually, though, NASA recognized its blunder and opened the application process to a wider array of hopefuls, regardless of race or gender. From a candidate pool of 8,000 six elite women were selected in 1978—Sally Ride, Judy Resnik, Anna Fisher, Kathy Sullivan, Shannon Lucid, and Rhea Seddon. In *The Six*, acclaimed journalist Loren Grush shows these brilliant and courageous women enduring claustrophobic—and sometimes deeply sexist—media attention, undergoing rigorous survival training, and preparing for years to take multi-million-dollar payloads into orbit. Together, the Six helped build the tools that made the space program run. One of the group, Judy Resnik, sacrificed her life when the Space Shuttle Challenger exploded at 46,000 feet. Everyone knows of Sally Ride's history-making first space ride, but each of the Six would make their mark. "A spirited group biography...it's hard not to feel awe for these women" (The Wall Street Journal).

**blue origin interview process: The Origin of Sin** Greta Boris, 2019-10-29 Sometimes a picture screams a thousand threats. When Amy inherits a cottage in Capistrano Beach, she sees a chance to escape from the hell of her Machiavellian husband. But black walls, drug paraphernalia, and a greenhouse full of cast-off furniture mean she can't move her young daughter into the house. There is work to be done. There is also an uninvited guest. Every day when she arrives at the property a tableau straight from Dante's lurid vision is sketched on the living room walls. The punishment for each of the seven deadly sins is depicted in graphic detail. The police are less than helpful. Surely it is her husband trying to scare her into returning to him. Or the drug-addled squatter who she displaced is lashing out. Or, just maybe, stress has her slipping to the other side of sanity. Freedom for herself and her child lies just beyond the answer, but she must walk into danger to reach it. If you loved *Spare Room* by Dreda Say Mitchell, you will get a thrill from *The Origin of Sin*, a prequel novella to Greta Boris's *Seven Deadly Sins* series of psychological thrillers. **blue origin interview process: Ask a Manager** Alison Green, 2018-05-01 'I'm a HUGE fan of Alison Green's Ask a Manager column. This book is even better' Robert Sutton, author of *The No Asshole Rule* and *The Asshole Survival Guide* 'Ask A Manager is the book I wish I'd had in my desk drawer when I was starting out (or even, let's be honest, fifteen years in)' - Sarah Knight, New York Times bestselling author of *The Life-Changing Magic of Not Giving a F\*ck* A witty, practical guide to navigating 200 difficult professional conversations Ten years as a workplace advice columnist has taught Alison Green that people avoid awkward conversations in the office because they don't know what to say. Thankfully, Alison does. In this incredibly helpful book, she takes on the tough

discussions you may need to have during your career. You'll learn what to say when: · colleagues push their work on you - then take credit for it · you accidentally trash-talk someone in an email and hit 'reply all' · you're being micromanaged - or not being managed at all · your boss seems unhappy with your work · you got too drunk at the Christmas party With sharp, sage advice and candid letters from real-life readers, *Ask a Manager* will help you successfully navigate the stormy seas of office life.

**blue origin interview process:** Endurance Scott Kelly, 2017-10-17 NATIONAL BEST SELLER A stunning, personal memoir from the astronaut and modern-day hero who spent a record-breaking year aboard the International Space Station—a message of hope for the future that will inspire for generations to come. The veteran of four spaceflights and the American record holder for consecutive days spent in space, Scott Kelly has experienced things very few have. Now, he takes us inside a sphere utterly hostile to human life. He describes navigating the extreme challenge of long-term spaceflight, both life-threatening and mundane: the devastating effects on the body; the isolation from everyone he loves and the comforts of Earth; the catastrophic risks of colliding with space junk; and the still more haunting threat of being unable to help should tragedy strike at home—an agonizing situation Kelly faced when, on a previous mission, his twin brother's wife, American Congresswoman Gabrielle Giffords, was shot while he still had two months in space. Kelly's humanity, compassion, humor, and determination resonate throughout, as he recalls his rough-and-tumble New Jersey childhood and the youthful inspiration that sparked his astounding career, and as he makes clear his belief that Mars will be the next, ultimately challenging, step in spaceflight. In *Endurance*, we see the triumph of the human imagination, the strength of the human will, and the infinite wonder of the galaxy.

**blue origin interview process:** Sustainable Space Tourism Annette Toivonen, 2020-11-11 This book explores the relationship between space tourism and the discourse in sustainability and futures research. It offers comprehensive information on the current understanding of the space tourism industry and assesses the possible impacts of space tourism on the environment, economics, legislation and society. The volume aims to encourage more dialogue and critical examinations of aspects of space tourism related to future sustainability. From data gathered from empirical research, it provides a vision for the future of sustainable space tourism. It will be of interest to students and researchers in tourism, sustainability and futures studies, as well as individual space tourist 'hopefuls', space tourism industry operators and tourism policy regulators.

**blue origin interview process:** *Smart and Gets Things Done* Avram Joel Spolsky, 2007-10-17 A good programmer can outproduce five, ten, and sometimes more run-of-the-mill programmers. The secret to success for any software company then is to hire the good programmers. But how to do that? In *Joel on Hiring*, Joel Spolsky draws from his experience both at Microsoft and running his own successful software company based in New York City. He writes humorously, but seriously about his methods for sorting resumes, for finding great candidates, and for interviewing, in person and by phone. Joel's methods are not complex, but they do get to the heart of the matter: how to recognize a great developer when you see one.

**blue origin interview process:** *Not So Fast* Doug Hill, 2016 There's a well-known story about an older fish who swims by two younger fish and asks, How's the water? The younger fish are puzzled. What's water? they ask. Many of us today might ask a similar question: What's technology? Technology defines the world we live in, yet we're so immersed in it, so encompassed by it, that we mostly take it for granted. Seldom, if ever, do we stop to ask what technology is. Failing to ask that question, we fail to perceive all the ways it might be shaping us. Usually when we hear the word technology, we automatically think of digital devices and their myriad applications. As revolutionary as smartphones, online shopping, and social networks may seem, however, they t into long-standing, deeply entrenched patterns of technological thought as well as practice. Generations of skeptics have questioned how well served we are by those patterns of thought and practice, even as generations of enthusiasts have promised that the latest innovations will deliver us, soon, to Paradise. We're not there yet, but the cyber utopians of Silicon Valley keep telling us it's right around the corner. What is technology, and how is it shaping us? In search of answers to those crucial questions, *Not So Fast* draws on the insights of dozens of scholars and artists who have thought deeply about the meanings of machines. The book explores such dynamics as technological drift, technological momentum, technological disequilibrium, and technological autonomy to help us understand the interconnected, interwoven, and interdependent phenomena of our technological world. In the course of that exploration, Doug Hill poses penetrating questions of his own, among them: Do we have as much control over our machines as we think? And who can we rely on to guide the technological forces that will determine the future of the planet?

**blue origin interview process:** *The Lincoln Highway* Amor Towles, 2021-10-05 #1 NEW YORK TIMES BESTSELLER More than ONE MILLION copies sold A TODAY Show Read with Jenna Book Club Pick A New York Times Notable Book, and Chosen by Oprah Daily, Time, NPR, The Washington Post, Bill Gates and Barack Obama as a Best Book of the Year "Wise and wildly entertaining . . . permeated with light, wit, youth." —The New York Times Book Review "A classic that we will read for years to come." —Jenna Bush Hager, Read with Jenna book club "Fantastic. Set in 1954, Towles uses the story of two brothers to show that our personal journeys are never as linear or predictable as we might hope." —Bill Gates "A real joyride . . . elegantly constructed and compulsively readable." —NPR The bestselling author of *A Gentleman in Moscow* and *Rules of Civility* and master of absorbing, sophisticated fiction returns with a stylish and propulsive novel set in 1950s America In June, 1954, eighteen-year-old Emmett Watson is driven home to Nebraska by the warden of the juvenile work farm where he has just served fifteen months for involuntary manslaughter. His mother long gone, his father recently deceased, and the family farm foreclosed upon by the bank, Emmett's intention is to pick up his eight-year-old brother, Billy, and head to

California where they can start their lives anew. But when the warden drives away, Emmett discovers that two friends from the work farm have hidden themselves in the trunk of the warden's car. Together, they have hatched an altogether different plan for Emmett's future, one that will take them all on a fateful journey in the opposite direction—to the City of New York. Spanning just ten days and told from multiple points of view, Towles's third novel will satisfy fans of his multi-layered literary styling while providing them an array of new and richly imagined settings, characters, and themes. "Once again, I was wowed by Towles's writing—especially because *The Lincoln Highway* is so different from *A Gentleman in Moscow* in terms of setting, plot, and themes. Towles is not a one-trick pony. Like all the best storytellers, he has range. He takes inspiration from famous hero's journeys, including *The Iliad*, *The Odyssey*, *Hamlet*, *Huckleberry Finn*, and *Of Mice and Men*. He seems to be saying that our personal journeys are never as linear or predictable as an interstate highway. But, he suggests, when something (or someone) tries to steer us off course, it is possible to take the wheel." – Bill Gates

**blue origin interview process: NASA Spaceflight** Roger D. Launius, Howard E. McCurdy, 2017-10-11 This book presents the first comprehensive history of innovation at NASA, bringing together experts in the field to illuminate how public-private and international partnerships have fueled new ways of exploring space since the beginning of space travel itself. Twelve case studies trace the messy, risky history of such partnerships, exploring the role of AT&T in the early development of satellite technology, the connections between the Apollo program and Silicon Valley, the rise of SpaceX, and more. Some of these projects have succeeded, and some have failed; all have challenged conventional methods of doing the public's business in space. Together, these essays offer new insights into how innovation happens, with invaluable lessons for policymakers, investors, economists, and members of the space community.

**blue origin interview process: Between professions and countries. Highly skilled Latin American migrants and the negotiation of cultural capital** Ilana Nussbaum Bitran, 2020-11-10 The migration of highly skilled individuals brings together two important and well-developed institutional systems: on the one hand, the organization of professions and, on the other hand, the state and its migration and integration regime. Therefore, professional migrants move between two levels of regulation. The first one applies to their specific professional group and regulates the acquisition of knowledge as well as the participation in the labor market. The second one controls the access to and settlement in a given country. Taking the examples of medicine and the information technologies (IT) in Germany and Chile, the present research asks how different institutional settings shape the cultural capital negotiation strategies of highly skilled Latin American migrants. Using Bourdieu's relational theory and especially his concepts of field and capital, this book seeks to understand professions as fields and to follow the trajectories of highly skilled Latin American migrants within two transnational professional fields. Using a reconstructive praxeological approach, this book presents three typologies, showing how the interaction between (transnational) professional fields and national regulations creates different possibilities for highly skilled migrants to negotiate their capital and the strategies they develop to reach a good position in their host country's labor market.

**blue origin interview process: Be Prepared** Robert E. Kirsch, Emily Ray, 2024-12-31 Doomsday prepping has gone mainstream. Survivalists star in reality TV shows; celebrities hawk emergency gear; and ordinary people stockpile essentials in the hope that they can outlast a slew of threats, real and imagined. The ideology behind prepping, however, is no passing fad but a persistent feature of American life. *Be Prepared* reveals the surprising ways prepping is woven into the fabric of American institutions—and shows its significance for understanding the fault lines of liberal democracy. Robert E. Kirsch and Emily Ray trace the beliefs and practices that underlie survivalism, from the rise of the Boy Scouts of America to Cold War fears of nuclear devastation through present-day Silicon Valley dreams of space colonization. They argue that prepping is rooted in long-standing anxieties over industrialization, urbanization, and immigration and steeped in the

histories of colonial expansion and militarization. To grasp its political implications, Kirsch and Ray develop the concept of “bunkerization”: not simply building physical bunkers but building a society symbolized by the bunker. In such a society, individual vigilance and survival become the organizing principles of everyday life. People opt out of collective projects and retreat into personal responsibility for preparedness, expressed through acts of consumption. Shedding new light on the persistence of antidemocratic politics, from white supremacy to neoliberalism, *Be Prepared* also considers how to escape the solitary fate of life in the bunker and instead meet collective problems together.

**blue origin interview process:** *The Cosmos Economy* Jack Gregg, 2021-05-17 If man’s next big step is to live and work in space, then what will everyone do out there that is so different from what we are now doing here on Earth? As the future of space comes into focus it is clear that profit and power are the core elements of the new space economy. This entertaining and informative book looks at human settlement in space as a mainstream business opportunity for investors, entrepreneurs and far-sighted individuals seeking to secure their place in the innovative commercial space sector. Dr. Jack Gregg presents a unique 5-phase development roadmap that shows how space will grow from a frontier economy to a mature integrated market. Written in simple, non-technical language, this book answers such questions as: • What is the new industrial space economy? • What are the challenges and roadblocks on the way to a robust space economy? • How will the rapid growth of the new space economy impact commerce back on Earth? • How can one best invest in profitable space-related enterprises? *The Cosmos Economy* is for readers who hope to be better equipped and more informed about the new space economy; and Investors, entrepreneurs, and futurists who wants to learn how to take part in the business opportunities of the new high frontier of commercial space.

**blue origin interview process:** *Programming Challenges* Steven S Skiena, Miguel A. Revilla, 2006-04-18 There are many distinct pleasures associated with computer programming. Craftsmanship has its quiet rewards, the satisfaction that comes from building a useful object and making it work. Excitement arrives with the flash of insight that cracks a previously intractable problem. The spiritual quest for elegance can turn the hacker into an artist. There are pleasures in parsimony, in squeezing the last drop of performance out of clever algorithms and tight coding. The games, puzzles, and challenges of problems from international programming competitions are a great way to experience these pleasures while improving your algorithmic and coding skills. This book contains over 100 problems that have appeared in previous programming contests, along with discussions of the theory and ideas necessary to attack them. Instant online grading for all of these problems is available from two WWW robot judging sites. Combining this book with a judge gives an exciting new way to challenge and improve your programming skills. This book can be used for self-study, for teaching innovative courses in algorithms and programming, and in training for international competition. The problems in this book have been selected from over 1,000 programming problems at the Universidad de Valladolid online judge. The judge has ruled on well over one million submissions from 27,000 registered users around the world to date. We have taken only the best of the best, the most fun, exciting, and interesting problems available.

**blue origin interview process: Why Am I Taller?** Dr. Dave Williams, Elizabeth Howell, PhD, 2022-11-01 What happens in space that causes the body to change? Learn about life in space from astronauts Is the human body built for Mars? NASA's studies on the International Space Station show we need to fix a few things before sending people to the Red Planet. Astronauts go into space with good vision and come back needing eyeglasses. Cognition and DNA expression could be affected for years. And then there's the discomfort of living in a tight space with crewmates, depression, and separation from the people you love. Space doctors are on the case. You'll meet the first twin to spend a year in space, the woman who racked up three physically challenging spacewalks in between 320 days of confinement, and the cosmonaut who was temporarily stranded on space station Mir while the Soviet Union broke up underneath him. What are we learning about the human body? As astronauts target moon missions and eventual landings on Mars, one of the major questions is how the human body will behave in "partial gravity." How does the human body change on another world, as opposed to floating freely in microgravity? What can studies on Earth and in space tell us about planetary exploration? These questions will be important to the future of space exploration and to related studies of seniors and people with reduced mobility on Earth.

**blue origin interview process: Once Upon a Time** Avik Bakshi, 2024-08-26 About the Book: "Once Upon A Time" follows the protagonist's journey through his past, twenty years ago. An educated young man, he resigns from his job as a schoolteacher due to a romantic entanglement with the headmaster's daughter. He becomes an estate manager in eastern India, initially struggling with isolation but gradually embracing the forest life. He befriends a young fisherman, learns horse riding and fishing, and survives various forest adventures. Fascinated by tales of a black leopard, he visits the village of Kuhika, where he encounters a mysterious old man who guides him to find the black orchid to cure a local villager's strange disease. Despite twists and challenges, he discovers the true purpose of his life and love. The story concludes with his return to his hometown, honoring his lost love and acknowledging the pivotal roles played by destiny and courage in shaping one's life. About the Author: Avik Bakshi is a management professional and writer originally from Kolkata in India. **blue origin interview process: Grandmother Fish** Jonathan Tweet, 2016-09-06 Where did we come from? It's a simple question, but not so simple an answer to explain—especially to young children. Charles Darwin's theory of common descent no longer needs to be a scientific mystery to inquisitive young readers. Meet Grandmother Fish. Told in an engaging call and response text where a child can wiggle like a fish or hoot like an ape and brought to life by vibrant artwork, Grandmother Fish takes children and adults through the history of life on our planet and explains how we are all connected. The book also includes comprehensive backmatter, including: - An elaborate illustration of the evolutionary tree of life - Helpful science notes for parents - How to explain natural selection to a child

**blue origin interview process: The Vital Question** Nick Lane, 2015-04-23 Why is life the way it is? Bacteria evolved into complex life just once in four billion years of life on earth-and all complex life shares many strange properties, from sex to ageing and death. If life evolved on other planets, would it be the same or completely different? In The Vital Question, Nick Lane radically reframes evolutionary history, putting forward a cogent solution to conundrums that have troubled scientists for decades. The answer, he argues, lies in energy: how all life on Earth lives off a voltage with the strength of a bolt of lightning. In unravelling these scientific enigmas, making sense of life's quirks, Lane's explanation provides a solution to life's vital questions: why are we as we are, and why are we here at all? This is ground-breaking science in an accessible form, in the tradition of Charles Darwin's The Origin of Species, Richard Dawkins' The Selfish Gene, and Jared Diamond's Guns, Germs and Steel.

**blue origin interview process: Above and Beyond** Louis Brennan, Loizos Heracleous, Alessandra Vecchi, 2018-05-15 The global space sector has always been regarded as a cutting-edge field, futuristic and at the forefront of innovation. In recent years, the sector has undergone massive change, giving rise to a high-technology niche worth over \$330 billion in revenues worldwide and growing. That process, encompassing a greater and more diverse set of actors, has been described as the democratization of space. *Above and Beyond: Exploring the Business of Space* provides a comprehensive and current overview of the business of space and its distinctive competitive dynamics. The book explores the commercialization of space, taking the reader on a journey from the era of the Space Race up to the present and beyond. Focusing on both state and commercial actors, the book provides an exhaustive panoramic view of an area of growing human endeavour and ambition that is both informative and fascinating. As the business of space continues to develop and grow at a remarkable pace, the book offers a thoughtful and timely analysis of its past, present and future scenarios. While providing a critical assessment of the business of space, this book offers valuable insights to academics, policy makers and anyone with a keen interest in the sector, as well as useful lessons from emerging commercial and traditional space actors that have broader applicability to other industries and their managers.

**blue origin interview process: Rise of the Nerds: How a Technocratic Elite Manipulates Your Life and Gambles With Your Future** Steffen Blaese, We are at a dangerous moment in history; something started to go wrong with the digital revolution. An ever-expanding array of new technologies is infiltrating our lives. Only now we are beginning to understand the far-reaching consequences. The excessive use of electronic devices threatens our physical, emotional, and spiritual health. The warning signs are everywhere. But although all of us see the same picture, we interpret it in different ways. The technophiles promised us greater leisure, comfort, and wealth. But we got internet addiction, obesity, loneliness, and anxieties. Powerful companies have more access to our private matters than ever before. Reality goes beyond Orwell. Artificial intelligence is all around us without many people being aware of it. Sophisticated algorithms can predict our behavior with increasing accuracy. Some extreme futurists are fantasizing about a «superintelligence,» smarter than humans. Machines are taking away jobs, rewarding their owners richly. The global economy is plagued by a persistent unemployment and growing income inequality. Millions of people live from paycheck to paycheck and can hardly keep their heads above water. What will happen if their labor is no longer needed? The concentration of wealth and power in the hands of a small elite is eroding democracy. The changes are not only technical in nature, but also transform us humans. Genetic engineering and human enhancement therapies gamble with the basis of our existence. Are we ready to hand over our future to these improvers of mankind? Like priests at the altar, the technodeterminists are pushing their agenda with evangelical fervor. Technology-friendly literature can be found like sand on the beach. It's not a surprise that those people who benefit most from technology celebrate it. This book is different because it approaches the matter from a skeptic's point of view. It throws crucial light on the question of who will be the winners of the transformations and who the losers. It puts current issues in a historical perspective and presents some people behind today's influential technology.

**blue origin interview process: *Left Theory and the Alt-Right*** Jeffrey R. Di Leo, Sophia A. McClennen, 2023-08-23 The alt-right movement in the United States has actively been endorsing the use of left theory to achieve its ends—and with varying degrees of success. Tracing occasions where figures on the alt-right reference left theory, this volume asks if the alt-right's reference of left theory is just bad reading, or are there troubling ways that certain types of left theory encourage such interpretations? What if the connections between left theory and the alt-right lie in the shared disdain for certain types of institutions, structures of power, and the status quo? Are there lessons to be learned in what can often appear as an overlapping desire to deconstruct concepts like truth, justice, freedom, and democracy? Drawing on the longer history of right-wing readings of left theory, this volume seeks to unpack these recent developments and consider their impact on the

future of theory.

**blue origin interview process: Daddy** Emma Cline, 2020-09-03 'Taut, beautiful and savage' Guardian A man travels to his son's school to deal with the fallout of a violent attack and to make sure his son will not lose his college place. But what exactly has his son done? And who is to blame? A young woman trying to make it in LA, working in a clothes shop while taking acting classes, turns to a riskier way of making money but will be forced to confront the danger of the game she's playing. And a family coming together for Christmas struggle to skate over the lingering darkness caused by the very ordinary brutality of a troubled husband and father. Subtle, sophisticated and displaying an extraordinary understanding of human behaviour, these stories from the best-selling author of *The Girls* are unforgettable. \_\_\_\_\_ PRAISE FOR DADDY: 'It is her piercing understanding of modern humiliation that makes these stories vibrate with life...brilliant' Brandon Taylor 'Razor-sharp' Evening Standard 'Cline's talent at uncovering the seedy and somehow bringing it to beautiful light is brilliant' Daisy Johnson 'Something about Cline's intimate tone, her talent for conjuring the feeling of being alive, is entirely and uniquely her own' Rachel Kushner 'A stunning collection of stories that plunges deep into the dark corners of the human experience' Dazed

**blue origin interview process: Inventing Adolescence** Joseph Adelson, 2017-07-05 There is a widespread and deep awareness that all is not well with American public education nor with the students, educators, and administrators who are charged with making citizens literate. Joseph Adelson's work has gained considerable prominence in this ongoing reevaluation. Writing with force, verve, and the tools of advanced study, Adelson's book provides what might be the most comprehensive look at American education since the work of Diane Ravitch. The materials include revised and updated versions of essays that caused a real stir when they first appeared in the pages of *Commentary*, *Daedalus*, *The American Scholar*, and *The Public Interest*, among other places. The work goes against the grain of rhetoric but quite with the grain of the best in social science: That the erosion of trust in the American young has been far less severe than in the American old, that the degree of pathology, alienation, and rebelliousness in the American adolescent population is far from alarming. On the whole, each and every serious research study shows the vast majority of teenagers to be competent, purposeful, at ease with themselves, and closely bonded to their families and their values. This is, however, no Pollyannaish version of American education, but a tough-minded critique of educators and administrators who prefer ideological generalities to empirical truths, and whose vested interests are not in the requirements of learning, but ultimately in its subversion. The invention of adolescence was a search for a problem child more nearly detected in problematic adults.

**blue origin interview process: Race to the Bottom** Michael V. McGill, 2015-04-03 How did the country that invented the modern public school end up embracing policies that weaken it? What alternatives are there to current corporate reform policies? How can we give America's children an education that will truly prepare them and our nation for the challenges of tomorrow? In *Race to the Bottom* McGill successfully traces the emergence of corporate reform and describes how its tenets run counter to what he believes are the key elements of a high-quality education. McGill draws from a wealth of experience as a school superintendent for over 40 years, including his tenure in Scarsdale during the 2001 district-wide boycott of New York State standardized tests. Showing how strong leaders working with teachers and the community have been able to strengthen schools, the author offers a model of school reform that will prepare students for the 21st Century.

**blue origin interview process: Latino Peoples in the New America** José A. Cobas, Joe R. Feagin, Daniel J. Delgado, Maria Chávez, 2018-12-07 Latinos are the largest group among Americans of color. At 59 million, they constitute nearly a fifth of the US population. Their number has alarmed many in government, other mainstream institutions, and the nativist right who fear the white-majority US they have known is disappearing. During the 2016 US election and after, Donald Trump has played on these fears, embracing xenophobic messages vilifying many Latin American immigrants as rapists, drug smugglers, or gang bangers. Many share such nativist desires to build enhanced border walls and create immigration restrictions to keep Latinos of various backgrounds

out. Many whites' racist framing has also cast native-born Latinos, their language, and culture in an unfavorable light. Trump and his followers' attacks provide a peek at the complex phenomenon of the racialization of US Latinos. This volume explores an array of racialization's manifestations, including white mob violence, profiling by law enforcement, political disenfranchisement, whitewashed reinterpretations of Latino history and culture, and depictions of good Latinos as racially subservient. But subservience has never marked the Latino community, and this book includes pointed discussions of Latino resistance to racism. Additionally, the book's scope goes beyond the United States, revealing how Latinos are racialized in yet other societies.

**blue origin interview process:** Poso Wells Gabriela Alemán, 2018-08-21 Celebrated Ecuadorian author Gabriela Alemán's first work to appear in English: a noir, feminist eco-thriller in which venally corrupt politicians and greedy land speculators finally get their just comeuppance! In the squalid settlement of Poso Wells, women have been regularly disappearing, but the authorities have shown little interest. When the leading presidential candidate comes to town, he and his entourage are electrocuted in a macabre accident witnessed by a throng of astonished spectators. The sole survivor—next in line for the presidency—inexplicably disappears from sight. Gustavo Varas, a principled journalist, picks up the trail, which leads him into a violent, lawless underworld. Bella Altamirano, a fearless local, is on her own crusade to pierce the settlement's code of silence, ignoring repeated death threats. It turns out that the disappearance of the candidate and those of the women are intimately connected, and not just to a local crime wave, but to a multinational magnate's plan to plunder the country's cloud forest preserve. Praise for *Poso Wells*: The story is a condemnation not only of the corrupt businessmen and the criminal gangs that rule Poso Wells but also of the violence against women that plagues Latin America's real slums.—The New Yorker One part Thomas Pynchon, one part Gabriel García Márquez, and one part Raymond Chandler, Alemán's novel contains mystery, horror, humor, absurdity, and political commentary ... A concoction of political thriller and absurdist literary mystery that never fails to entertain.—Kirkus Reviews A wild, successful satire of Ecuadorian politics and supernatural encounters. ... Alemán's singular voice keeps the ride fresh and satisfying.—Publishers Weekly *Poso Wells* is ironic, audacious, and fierce. But what is it, exactly? A satire? A sci-fi novel? A political detective yarn? Or the purest reality of contemporary Latin America. It's unclassifiable—as all great books are.—Samanta Schweblin, author of *Fever Dream* *Poso Wells* is brilliant, audacious, doubtlessly playful and at the same time so dark and bitter. A truly unforgettable book.—Alejandro Zambra, author of *Multiple Choice*

**blue origin interview process: On the Origin of Mind** Martin Wurzinger, 2007 'On the origin of Mind' is a detailed description of how the mind works. It explains the dynamics from the neuronal level upwards to the scale of group behaviour, society and culture.—Publisher's website.

**blue origin interview process:** *Postdigital Ecopedagogies* Petar Jandrić, Derek R. Ford, 2022-06-08 This book conceptualizes ecopedagogies as forms of educational innovation and critique that emerge from, negotiate, debate, produce, resist, and/or overcome the shifting and expansive postdigital ecosystems of humans, machines, nonhuman animals, objects, stuff, and other forms of matter. Contemporary postdigital ecosystems are determined by a range of new bioinformational reconfigurations in areas including capitalism, imperialism, settler-colonialism, and ontological hierarchies more generally. Postdigital ecopedagogies name a condition, a question, and a call for experimentation to link pedagogical research and practice to challenges of our moment. They pose living, breathing, expanding, contracting, fluid, and spatial conditions and questions of our non-chronological present. This book presents analyses of that present from a wide spectrum of disciplines, including but not limited to education studies, philosophy, politics, sociology, arts, and architecture.
