cjis ncic certification test answers: *The Fingerprint* U. S. Department Justice, 2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

cjis ncic certification test answers: *Gun Control Legislation* William J. Krouse, Congress has continued to debate the efficacy and constitutionality of federal regulation of firearms and ammunition, with strong advocates arguing for and against greater gun control. While several dozen gun control-related proposals have been introduced in recent Congresses, only a handful of those bills received significant legislative action. The 109th Congress, for example, passed two bills with firearms-related provisions that were enacted into law. P.L. 109-72 prohibits certain types of lawsuits against firearm manufacturers and dealers to recover damages related to the criminal or unlawful use of their products by other persons, and P.L. 109-295 includes a provision that prohibits federal officials from seizing any firearm from private persons during a major disaster or emergency, if possession of that firearm was not already prohibited under federal or state law. Nevertheless, the 110th Congress could possibly reconsider several gun control proposals that were considered as part of appropriations and crime legislation in the previous Congress. During the 109th Congress, the House amended the Children's Safety Act of 2005 (H.R. 3132) to prohibit the transfer or possession of a firearm to or by any person convicted of a sex offense against a minor. The House also amended Secure Access to Justice and Court Protection Act of 2005 (H.R. 1751) to authorize certain federal court judges and officials to carry firearms for personal protection. The Senate passed a different version of H.R. 1751 that included similar provisions, as well as provisions designed to clarify and expand the Law Enforcement Officers Safety Act (P.L. 108-277) -- a law that gives concealed carry privileges to qualified on-duty and retired law enforcement officers. None of those provisions were enacted into law, however. In addition, the House Judiciary considered four gun-related bills: the ATFE Modernization and Reform Act of 2006 (H.R. 5092), the Firearms Corrections and Improvement Act (H.R. 5005), the Firearm Commerce Modernization Act (H.R. 1384), and the NICS Improvement Act of 2005 (H.R. 1415). H.R. 5092 was passed by the House. The 109th Congress, moreover, maintained a fee prohibition for Brady background checks and other funding limitations and conditions related to gun enforcement in the FY2006 DOJ appropriations (P.L. 109-108). Those limitations and conditions have been continued into FY2007 under continuing resolutions. They are often referred to as the Tiahrt amendment, for their sponsor in the FY2004 appropriations cycle, Representative Todd Tiahrt. Issues addressed in those bills, as well as the Tiahrt funding limitations and conditions, could be reconsidered in the 110th Congress. Senator Charles Schumer, for example, has introduced a bill (S. 77) that would repeal portions of the Tiahrt amendment that limit the sharing of firearm trace data. Other gun control-related issues that may reemerge in the 110th Congress include (1) retaining Brady background check records for approved transactions to enhance terrorist screening, (2) more strictly regulating certain long-range fifty caliber rifles, (3) further regulating certain firearms previously defined in statute as assault weapons, and (4) requiring background checks for firearm transfers at gun shows. This report will

updated to reflect legislative action.

cjis ncic certification test answers: The Cambridge Handbook of Surveillance Law David Gray, Stephen Henderson, 2017-09-30 Surveillance presents a conundrum: how to ensure safety, stability, and efficiency while respecting privacy and individual liberty. From police officers to corporations to intelligence agencies, surveillance law is tasked with striking this difficult and delicate balance. That challenge is compounded by ever-changing technologies and evolving social norms. Following the revelations of Edward Snowden and a host of private-sector controversies, there is intense interest among policymakers, business leaders, attorneys, academics, students, and the public regarding legal, technological, and policy issues relating to surveillance. This handbook documents and organizes these conversations, bringing together some of the most thoughtful and impactful contributors to contemporary surveillance debates, policies, and practices. Its pages explore surveillance techniques and technologies; their value for law enforcement, national security, and private enterprise; their impacts on citizens and communities; and the many ways societies do-and should-regulate surveillance.

cjis ncic certification test answers: Digital Evidence and the U.S. Criminal Justice System Sean E. Goodison, Robert Carl Davis, Brian A. Jackson, 2015 This report describes the results of a National Institute of Justice (NIJ)-sponsored research effort to identify and prioritize criminal justice needs related to digital evidence collection, management, analysis, and use. With digital devices becoming ubiquitous, digital evidence is increasingly important to the investigation and prosecution of many types of crimes. These devices often contain information about crimes committed, movement of suspects, and criminal associates. However, there are significant challenges to successfully using digital evidence in prosecutions, including inexperience of patrol officers and detectives in preserving and collecting digital evidence, lack of familiarity with digital evidence on the part of court officials, and an overwhelming volume of work for digital evidence examiners. Through structured interaction with police digital forensic experts, prosecuting attorneys, a privacy advocate, and industry representatives, the effort identified and prioritized specific needs to improve utilization of digital evidence in criminal justice. Several top-tier needs emerged from the analysis, including education of prosecutors and judges regarding digital evidence opportunities and challenges; training for patrol officers and investigators to promote better collection and preservation of digital evidence; tools for detectives to triage analysis of digital evidence in the field; development of regional models to make digital evidence analysis capability available to small departments; and training to address concerns about maintaining the currency of training and technology available to digital forensic examiners.

cjis ncic certification test answers: Law Enforcement Intelligence David L. Carter, Ph D David L Carter, U.s. Department of Justice, Office of Community Oriented Policing Services, 2012-06-19 This intelligence guide was prepared in response to requests from law enforcement executives for guidance in intelligence functions in a post-September 11 world. It will help law enforcement agencies develop or enhance their intelligence capacity and enable them to fight terrorism and other crimes while preserving community policing relationships. The world of law enforcement intelligence has changed dramatically since September 11, 2001. State, local, and tribal law enforcement agencies have been tasked with a variety of new responsibilities; intelligence is just one. In addition, the intelligence discipline has evolved significantly in recent years. As these various trends have merged, increasing numbers of American law enforcement agencies have begun to explore, and sometimes embrace, the intelligence function. This guide is intended to help them in this process. The guide is directed primarily toward state, local, and tribal law enforcement agencies of all sizes that need to develop or reinvigorate their intelligence function. Rather than being a manual to teach a person how to be an intelligence analyst, it is directed toward that manager, supervisor, or officer who is assigned to create an intelligence function. It is intended to provide ideas, definitions, concepts, policies, and resources. It is a primera place to start on a new managerial journey. Every law enforcement agency in the United States, regardless of agency size, must have the capacity to understand the implications of information collection, analysis, and intelligence sharing. Each agency must have an organized mechanism to receive and manage intelligence as well as a mechanism to report and share critical information with other law enforcement agencies. In addition, it is essential that law enforcement agencies develop lines of communication and information-sharing protocols with the private sector, particularly those related to the critical infrastructure, as well as with those private entities that are potential targets of terrorists and criminal enterprises. Not every agency has the staff or resources to create a formal intelligence unit, nor is it necessary in smaller agencies. This document will provide common language and processes to develop and employ an intelligence capacity in SLTLE agencies across the United States as well as articulate a uniform understanding of concepts, issues, and terminology for law enforcement intelligence (LEI). While terrorism issues are currently most pervasive in the

current discussion of LEI, the principles of intelligence discussed in this document apply beyond terrorism and include organized crime and entrepreneurial crime of all forms. Drug trafficking and the associated crime of money laundering, for example, continue to be a significant challenge for law enforcement. Transnational computer crime, particularly Internet fraud, identity theft cartels, and global black marketeering of stolen and counterfeit goods, are entrepreneurial crime problems that are increasingly being relegated to SLTLE agencies to investigate simply because of the volume of criminal incidents. Similarly, local law enforcement is being increasingly drawn into human trafficking and illegal immigration enterprises and the often associated crimes related to counterfeiting of official documents, such as passports, visas, driver's licenses, Social Security cards, and credit cards. All require an intelligence capacity for SLTLE, as does the continuation of historical organized crime activities such as auto theft, cargo theft, and virtually any other scheme that can produce profit for an organized criminal entity. To be effective, the law enforcement community must interpret intelligence-related language in a consistent manner. In addition, common standards, policies, and practices will help expedite intelligence sharing while at the same time protecting the privacy of citizens and preserving hard-won community policing relationships.~

cjis ncic certification test answers: Ministry of Justice - Code of Practice for Victims of Crime
Great Britain: Ministry of Justice, 2013-10-29 This Code of Practice for Victims of Crime forms a key part of the wider Government strategy to transform the criminal justice system by putting victims first, making the system more responsive and easier to navigate. Victims of crime should be treated in a respectful, sensitive and professional manner without discrimination of any kind. They should receive appropriate support to help them, as far as possible, to cope and recover and be protected from re-victimisation. It is important that victims of crime know what information and support is available to them from reporting a crime onwards and who to request help from if they are not getting it. This Code sets out the services to be provided to victims of criminal conduct by criminal justice organisations in England and Wales. Criminal conduct is behaviour constituting a criminal offence under the National Crime Recording Standard. Service providers may provide support and services in line with this Code on a discretionary basis if the offence does not fall under the National Crime Recording Standard (NCRS) (see the glossary of key terms found at the end of this Code). Non-NCRS offences include drink driving and careless driving. This Code also sets a minimum standard for these services. Criminal justice organisations can choose to offer additional services and victims can choose to receive services tailored to their individual needs that fall below the minimum stand

cjis ncic certification test answers: *Disproportionate Minority Contact* Nicolle Y. Parsons-Pollard, 2011 In *Disproportionate Minority Contact*, Parsons-Pollard provides a broad look at DMC and the complexities of attempting to reduce its impact. This edited volume features the writings of prominent scholars and practitioners in the field who provide a well-organized and wide-ranging review of the literature, case studies, and current policies and practices impacting disparate treatment in the criminal justice system. Parsons-Pollard has assembled a team of contributors who are experts in the subject matter--disproportionate minority contact. She and her colleagues plow into the issues, providing a rich, provocative, well-written, issues-driven text that

presents ample material for many courses, including special topics and senior seminars. The importance of the topic, the caliber of the contributors, and the quality of the writing makes this text a must-read for those currently in the field and anyone else who has an interest in criminal justice. -- Laura Moriarty, Vice Provost for Academic and Faculty Affairs at Virginia Commonwealth University

Parsons-Pollard and the authors of *Disproportionate Minority Contact* have made a major contribution to academicians, policy makers, practitioners and community members involved in efforts to reduce the disproportionate representation of youth in the juvenile justice system. They do this in part through the exploration of the research in this area, including the complexities of the Relative Rate Index and analysis of the impact of decision points on disparate treatment and the overall rate of disproportionality. Their investigation, however, does not end there. They lift up the need for the collection of data that will inform this work at the local level and the need for transparency in sharing and analyzing it. Further, they examine the relationship of school policies and the disproportionate representation of children of color in the child welfare system and the need for a cross systems approach to successfully reduce rates of disproportionate minority contact. The picture painted in this thoughtful treatment is one of hope, but also one filled with great challenges; that there are no easy answers or low hanging fruit as we work in this area. The authors make clear, however, that our efforts are absolutely essential in ensuring fairness, equity and full opportunity for youth of color in our society. They are to be commended for shining this bright, illuminating light on such an important social issue. -- Shay Bilchik, Founder and Director of the Center for Juvenile Justice Reform at Georgetown University Public Policy Institute I know of no other source of information on disproportionality in criminal and juvenile justice that is as comprehensive or thorough as this book. It will immediately become the definitive authority on the subject. -- Judge Jerrauld C. Jones, Norfolk Circuit Court, 4th Judicial Circuit of Virginia [*Disproportionate Minority Contact*] should be an adopted book for 21st century juvenile and criminal justice courses and integrated into course curriculum at the undergraduate and graduate level ... By reading the book, juvenile and criminal justice students will learn how their role as citizens and professionals can impact DMC [disproportionate minority contact]. -- ACJS Today A teacher's manual is available electronically on a CD or via email. cjis ncic certification test answers: *Caseflow Management* David C. Steelman, John Goerdt, James E. McMillan, 2004 To reduce and avoid delay, American courts have developed a set of principles and techniques since the 1970s that we refer to as caseflow management ... The main premise of this book is that caseflow management is more than just a way to reduce or avoid delay, however. In fact, caseflow management is the conceptual heart of court management in general. We can fully understand courts as organizations only if we understand the requirements of caseflow management. In managing a court, the chief judge and court managers should focus first on caseflow management - not just because it addresses problems of delay or backlog, but more importantly because it is the very foundation of court management in general. -- from the Introduction, p. xi.

cjis ncic certification test answers: *Electronic Crime Scene Investigation* David E. Learner, 2009 This book is intended to assist State and local law enforcement and other first responders who may be responsible for preserving an electronic crime scene and for recognising, collecting, and safeguarding digital evidence. It is not all inclusive but addresses situations encountered with electronic crime scenes and digital evidence. All crime scenes are unique and the judgement of the first responder, agency protocols, and prevailing technology should all be considered when implementing the information in this guide. First responders to electronic crime scenes should adjust their practices as circumstances -- including level of experience, conditions, and available equipment -- warrant. The circumstances of individual crime scenes and Federal, State, and local laws may dictate actions or a particular order of actions other than those described in this guide. First responders should be familiar with all the information in this guide and perform their duties and responsibilities as circumstances dictate. This is an edited and excerpted edition of
