Angela Brown, 2016-03-09 Start a house cleaning business with this step-by-step guide and be up and running in one week. Back in the olden days before the internet was really popular and you could Google search anything, there was trial and error. If you wanted to start a house cleaning business from scratch you could, but it was rarely an overnight success for anybody. Big success was tossed to the cleaning service franchisees who could afford the fancy training, and well-built brands, while the mom and pop cleaning services were left to figure it out on their own. Good news - times have changed. As an independent house cleaner, you no longer have to wade through endless Pinterest boards for tips and ideas on how to start a house cleaning business. Angela Brown built from scratch one of the most successful independently owned and operated house cleaning companies in the Southeastern United States. If you are serious about success in the cleaning service industry, you should sign up for her free tips, tricks and time saving hacks by joining the Savvy Cleaner email list at: savvycleaner.com/tips and you follow her blog at:

(There is a reason they call Angela Brown The House Cleaning Guru.) If you're here because you have an interest in house cleaning or in upgrading your life and you want to start a house cleaning business, welcome. House cleaning business is a 49 billion dollar a year industry that is nearly recession proof - when times get hard, people work more hours to pay the bills, they have less time at home to clean, so they outsource their cleaning - which means more business for you and me. Another awesome reason to start a house cleaning business is this: unlike a regular 9 to 5 job if you get fired, you're not out of work. You simply add another customer into your new available time slot and keep going. And you will learn here how to do such an amazing job, that you will never get fired, and your clients will never want you to leave. Franchise or Start a house cleaning business? She saved her tips in the glove compartment, and set aside a few quarters every week for truck stop showers for her and the kids. With startling humor and

honesty, Kennedy describes the frustration of never having enough money for a security deposit on an apartment—but having too much to qualify for public assistance. Without A Net is a story of hope. Michelle Kennedy survives on her wits, a little luck, and a lot of courage. And in the end, she triumphs.

cleaning business license in florida: Running a Food Hub: Volume Two, a Business Operations Guide James Matson, Jeremiah Thayer, Jessica Shaw, 2015-09-17 This report is part of a multi-volume technical report series entitled, *Running a Food Hub*, with this guide serving as a companion piece to other United States Department of Agriculture (USDA) reports by providing in-depth guidance on starting and running a food hub enterprise. In order to compile the most current information on best management and operations practices, the authors used published information on food hubs, surveyed numerous operating food hubs, and pulled from their existing experience and knowledge of working directly with food hubs across the country as an agricultural business consulting firm. The report's main focus is on the operational issues faced by food hubs, including choosing an organizational structure, choosing a location, deciding on infrastructure and equipment, logistics and transportation, human resources, and risks. As such, the guide explores the different decision points associated with the organizational steps for starting and implementing a food hub. For some sections, sidebars provide "decision points," which food hub managers will need to address to make key operational decisions. This illustrated guide may assist the operational staff at small businesses or third-party organizations that may provide aggregation, marketing, and distribution services from local and regional producers to assist with wholesale, retail, and institution demand at government institutions, colleges/universities, restaurants, grocery store chains, etc. Undergraduate students pursuing coursework for a bachelor of science degree in food science, or agricultural economics may be interested in this guide. Additionally, this reference work will be helpful to small businesses within the food trade discipline.
