cogburn smart property management: *The Turn to Infrastructure in Internet Governance* Francesca Musiani, Derrick L. Cogburn, Laura DeNardis, Nanette S. Levinson, 2016-03-02 This edited volume brings together experts from around the world to provide coverage and analysis of infrastructure's role in Internet governance, both now and in the future. Never in history have conflicts over Internet governance attracted such widespread attention. High-profile controversies include the disclosures about NSA surveillance by intelligence analyst Edward Snowden, controversy over a decision by the US government to relinquish its historic oversight of Internet names and numbers, and countless cybersecurity breaches involving unauthorized access to Internet users' personal data. Much of the Internet governance ecosystem—both technical architecture and coordinating institutions—is behind the scenes but increasingly carries significant public interest implications. An area once concealed in institutional and technological complexity is now rightly bracketed among other shared global issues—such as environmental protection and human rights—that have considerable global implications but are simply incongruous with national borders. This transformation into an era of global governance by Internet infrastructure presents a moment of opportunity for scholars to bring these politicized infrastructures to the foreground.

cogburn smart property management: *Digital Libraries - Current Issues* Nabil R. Adam, Bharat K. Bhargava, Yelena Yesha, 1995-04-19 This volume is the first book coherently summarizing the current issues in digital libraries research, design and management. It presents, in a homogeneous way, thoroughly revised versions of 15 papers accepted for the First International Workshop on Digital Libraries, DL '94, held at Rutgers University in May 1994; in addition there are two introductory chapters provided by the volume editors, as well as a comprehensive bibliography listing 262 entries. Besides introductory aspects, the topics addressed are administration and management, information retrieval and hypertext, classification and indexing, and prototypes and applications. The volume is intended for researchers and design professionals in the field, as well as for experts from libraries administration and scientific publishing.

cogburn smart property management: *Project Management for Information Professionals* Margot Note, 2015-11-03 Aimed at practitioners, this handbook imparts guidance on project management techniques in the cultural heritage sector. Information professionals often direct complex endeavors with limited project management training or resources. Project Management for Information Professionals demystifies the tools and processes essential to successful project management and advises on how to manage the interpersonal dynamics and organizational culture that influence the effectiveness of these methods. With this book, readers will gain the knowledge to initiate, plan, execute, monitor, and close projects. - offers guidance based on real-world experience - prepares readers without prior project management knowledge or experience - provides lean, easy-to-read, and jargon-free instructions - aimed at information professionals working in libraries, archives, museums

cogburn smart property management: *Transforming Education* Unesco, 2011 Este informe cita ejemplos de utilización de las TIC en diferentes regiones del mundo - África, la región árabe, Asia y América Latina - y proporciona un buen ejemplo de los cambios que las TIC aportan a los sistemas y políticas de educación. La gran diversidad que ofrecen los países seleccionados - Jordania, Namibia, Rwanda, Singapur y Uruguay - en términos de desarrollo económico y educativo, sugiere que lo que está en juego no se limitan a un determinado grupo de países privilegiados.

cogburn smart property management: *Coordinating the Internet* Fredrik Lindeberg, 2019-12-10 Många självklarheter i vårt digitala samhälle är beroende av Internet för att fungera. Allt från smarta dörrar för hemtjänster, till självscanningsapparaterna på ICA, till nyare bilar, moderna tillverkningsrobotar, telefoner och affärssystem. Den här licentiatavhandlingen reder ut vad Internet

är, hur det styrs och vad det har för praktiska konsekvenser. Tidigare forskning finns bland annat inom telekommunikation där Internet liknas vid andra telekommunikationstjänster, så som kabel-TV eller mobiltelefoni, och inom digitalisering både inom management och informationssystem där Internet i det närmaste tas för givet som teknisk infrastruktur. Här tar jag en ansats där jag förklarar Internet ur ett kombinerat tekniskt och organisatoriskt perspektiv. Studien är principiellt uppdelad i tre delar. Den första delen fokuserar på att begreppsmässigt hitta ett sätt att diskutera Internet utan att essentiella aspekter faller bort, såsom styrningen eller konsekvenser av den tekniska designen. Jag landar i att Internet är både ett tekniskt och ett organisatoriskt fenomen. Tekniskt i bemärkelsen att det handlar om digital paketbaserad kommunikation (dvs att olika paket kan ta olika väg och att det inte finns ett beroende på en viss specifik väg, eller "krets"), vilket kan särskiljas från exempelvis kretskopplad kommunikation (dvs en specifik väg från sändare till mottagare) eller rent analog kommunikation. I denna tekniska dimension är Internet förhållandevis likt klassisk telekommunikation såsom kabel-TV och mobiltelefoni, och förlitar sig på best-effort paketbaserad kommunikation. I den andra dimensionen, styrning och organisation, är Internet ett explicit bottom-up fenomen som styrs med andra principer och ideal än klassisk telekommunikation. Till sin utformning är denna minsta möjliga koordination som krävs för att möjliggöra koordinering av de tekniska unika identifierare som behövs för att Internet ska fungera (dvs idag DNS- och BGP-flororna av protokoll för användning av namn och nummer på Internet). Båda dimensionerna, de organisatoriska och tekniska, följer samma designprinciper, och generellt är det meningsfullt att se Internet som en ekologi av aktörer snarare än en organisation i strikt teoretiska termer (exempelvis finns ingen tydlig övergripande strategi, organisationsnummer eller löneutbetalare). Det är dessa designprinciper, som ligger väl i linje med systemarkitektursprinciper för datorsystem, som är orsaken till Internets lager-design där man (generellt) inte ska bry som om vad som händer på andra lager än sitt eget (beskrivet som "separation of concerns" eller i dubbel negation "high cohesion" i texten) samt att ha en minimalistisk ansats till koordinering och enbart koordinera eller skapa beroenden mellan enheter (både tekniskt och organisatoriskt) när det verkligen behövs (beskrivet som "minimum coordination" eller "low coupling" i texten). Den andra delen fokuserar på hur Internet kan socialt påverkas eller förändras till något annat, eller till något med en annan funktion sett som en styrd organisation. Jag använder begreppet social robusthet, som motpol till teknisk robusthet som i hur man tekniskt kan förstöra Internet, för att diskutera dessa aspekter. Slutsatserna här mynnar ut i att Internets explicita bottom-up och problemsuppdelnings-design gör det märkbart svårt för någon att medvetet påverka Internet för att ändra dess beskaffenhet, och dessutom visar jag att även om man praktiskt lyckas ta över de formellt beslutande råden (exempelvis ICANNs och IETFs styrelser) så finns det inga formella eller praktiska hinder för att bara ignorera dem (dvs switching costs för just ICANN eller IETF är låga, om än tekniskt omständligt med att konfigurera om rötter och routing-tabeller, och betydligt enklare än att gå från IPv4 till IPv6 då utrustning kan behöva ersättas och därmed en betydligt högre switching cost). Med andra ord, det är enklare att byta ut Internets koordinerare än att byta ut Internet mot något som fungerar annorlunda. Däremot är den rådande politiska världsordningen ett hot mot Internet, eftersom den regelstyrda och koordinerade världsordningen inte längre är lika självklar som den varit tidigare. Den tredje och sista studien fokuserar på nätneutralitet, dvs rätten nätverksoperatörer har att fånga värde i andra dimensioner än trafikmängd, som en praktiskt effekt av hur Internet styrs och fungerar. Det primära praktiska bidraget är att nätneutralitet inte får ses som enbart en reglerings och lagstiftningsfråga utan det är mer relevant att prata om i termer av nätneutralitet i praktiken. I den bemärkelsen är lagstiftningens vara eller inte vara mindre intressant än praktisk nätneutralitets vara eller inte vara och en tyngdpunktsförskjutning i den offentliga debatten hade fört diskussionen närmare hur Internet fungerar. Sammanfattningsvis ger Internets designprinciper att marknadskrafter, och ej direkt reglering, ska möjliggöra nätneutralitet. För att förtydliga, tanken är att det ska finnas konkurrens inom de flesta nivåer eller lager, och att det är av vikt att det finns konkurrens rakt igenom så att en kundvilja för paketneutralitet på tjänstenivå även påverkar nätägar- och infrastrukturnivå, så att det är användarnas efterfrågan som

leder till nätneutralitet (om den användarviljan finns). Dock kan det mycket väl vara så att man som användare inte är intresserad av nätneutralitet och då ska tjänsteleverantörer, nätägare och infrastrukturoperatörer inte heller tvingas vara neutrala genom lagstiftning då det går stick i stäv med designprinciperna. Inte heller ska en grupps vilja kring nätneutralitet påverka andras möjligheter att välja. Genomgående identifierar jag två kolliderande världsbilder, den distribuerade regelstyrda och koordinerade ordningen i sitt perspektiv med sina förkämpar, och den mer integrerande och suveräna världsordningen med sitt perspektiv och sina förkämpar. Rent praktiskt uppfyller Internet en önskad funktion i den tidigare men ej i den senare, då Internet designmässigt är byggt för att tillåta snarare än kontrollera och bestämma. Exempelvis finns det inte inbyggda (tekniska) mekanismer i Internet för att till exempel möjliggöra statlig övervakning eller kontroll av material som finns tillgängligt, och då ligger det mer i statens intresse att ha kontrollerade telekommunikationstjänster, såsom kabel-TV, mobiltelefoni och liknande lösningar där man inte helt enkelt kan lägga på ett "extra lager" för att uppnå kryptering, anonymitet eller tillgång till andra tjänster. I texten använder jag perspektiven tillsammans med teknologi, marknader och byråkrati för att fånga upp dynamiken och strömningarna i Internet-ekologin och jämför med tekniska samhällsförändringar, som exempelvis järnvägsnät, postverk och finansiella marknader. Jag konstaterar att Internet har varit styrt av teknologiskt baserade värderingar, till skillnad från de andra exemplen som i huvudsak har utformats av dynamiken mellan byråkrati och marknad. I denna mån förelår jag att teknologi kan användas som strömning och motperspektiv till den klassiska uppställningen med byråkrati och marknad för att beskriva fenomen i digitaliseringens tidsålder. Avhandlingen sätter även pågående trender i ett bredare perspektiv mot både organisation och teknik, och trycker på vikten av att förstå delarna var för sig och tillsammans för att på ett rikare sätt måla upp helheten. The modern society is to a large extent Internet-dependent. Today we rely on the Internet to handle communication for smart doors, self-scanning convenience stores, connected cars, production robots, telephones and ERP-systems. The purpose of this thesis is to unbundle the Internet, its technology, its coordination, and practical and theoretical consequences. Earlier research has, in telecommunications, focused on the Internet as one of many potential telecommunications services, such as cellphones or cable-TV, and the management and information systems field has by and large treated the Internet as black-boxable infrastructure. This thesis explains the Internet from the combined perspectives of technology and coordination. This text contains three empirical studies. The first is focused on conceptualizing and discussing the Internet in a meaningful way using both technology and coordination frameworks. I unceremoniously conclude that the Internet is both a technological and a coordination phenomenon and neither of these aspects can be ignored. The Internet is technological in that it concerns digital packet switched digital communication (as opposed to circuit switched) or purely analog communications. The technological dimension of the Internet is similar in its constituency to classical telecommunications networks, and has best-effort mechanisms for packet delivery. In the other dimension, coordination, the Internet is an explicit bottom-up phenomenon minimally coordinated (or governed) by other ideals than classical telecommunications networks and systems. At its core this least necessary coordination concerns technical unique identifiers necessary for inter-network communication (in practice today manifested as naming with the DNS protocol suite, and numbering with the BGP protocol suite). Both dimensions follow similar design characteristics; the design of the technical Internet is similar to the design of the coordination of the Internet. These design principles, which are well aligned with software design principles, is the cause of the Internet's layered design ("separation of concerns" in practice) and minimal view of coordination (the "least coordinated Internet"). In general terms it is fruitful to view the Internet and involved actors as an ecology, rather than one organization or entity in need of governance or control. The second study looks at the social resilience of the Internet. That is, is it possible through social means to change what the Internet is or can be viewed as. I use social resilience as a counterpart to technical resilience, i.e. resilience to technical interference. In essence, the bottom-up and separations of concerns design of the coordination aspect of the Internet minimizes possible influence of actors

intent on mission disruption. I also practically show that even a take-over of the central councils have little effect the constituency of the Internet, since these councils are not invested with formal powers of enforcement. This thesis suggests that the cost of switching from ICANN and IETF to another set of organizations is quite low due to the nature of the coordination of the Internet, compared to for example, switching all equipment to IPv6 capable equipment. However, the current political situation is a threat to the current Internet regime, since an international and rule-based world order is no longer on all states' agendas. The final empirical study focus on the practical and theoretical implications of the Internet on the case of net neutrality. The primary contribution is that de facto and de jure net neutrality differ in practice, and as such de facto net neutrality deserves more attention. Also, I suggest that any regulation, either for or against net neutrality, is problematic, since such regulation would interfere with the inherent coordination mechanisms of the Internet. As such regulation should focus on providing the necessary markets for Internet function given the coordination and design of the Internet. As a net neutrality example, net neutral Internet access options should exist as part of a natural service offering if wanted by customers, not due to direct regulation. Throughout the thesis I identify two colliding world orders, both in terms of digital communication networks and terms of organizing society in general: the rule-based and coordinating order with its champions, and the integrated or sovereign order with its champions. In practical terms, the Internet can be considered a want in the former (the distributed perspective), but not the later (the integrative perspective), since the Internet lacks inherent (technical) controls for surveillance and content control which are necessary in a world order where borders are important. Regardless of if that importance stems from state oversight or intellectual property rights legislation. I use these perspectives together with technology, markets and bureaucracy to catch the dynamics of the Internet ecology. I then compare these dynamics with other technological and societal phenomena, such as railway networks, postal services and financial markets. And conclude that the Internet (as conceptualized in this thesis) can best be explained by technological values, in opposite to the other examples which can best be explained by the dynamics of markets and bureaucracies without any real influence of the values of technology. As such, I suggest that the classical frame of markets and bureaucracy can fruitfully be expanded with technology to better explain the Internet and similar digitization phenomena. This thesis puts current trends in a broader perspective based on technology and organization, where the two perspectives together better can draw the full picture in a rich fashion.

cogburn smart property management: *Bitcoin and Beyond* Malcolm Campbell-Verduyn, 2017-11-28 Since the launch of Bitcoin in 2009 several hundred different 'cryptocurrencies' have been developed and become accepted for a wide variety of transactions in leading online commercial marketplaces and the 'sharing economy', as well as by more traditional retailers, manufacturers, and even by charities and political parties. Bitcoin and its competitors have also garnered attention for their wildly fluctuating values as well as implication in international money laundering, Ponzi schemes and online trade in illicit goods and services across borders. These and other controversies surrounding cryptocurrencies have induced varying governance responses by central banks, government ministries, international organizations, and industry regulators worldwide. Besides formal attempts to ban Bitcoin, there have been multifaceted efforts to incorporate elements of blockchains, the peer-to-peer technology underlying cryptocurrencies, in the wider exchange, recording, and broadcasting of digital transactions. Blockchains are being mobilized to support and extend an array of governance activities. The novelty and breadth of growing blockchain-based activities have fuelled both utopian promises and dystopian fears regarding applications of the emergent technology to Bitcoin and beyond. This volume brings scholars of anthropology, economics, Science and Technology Studies, and sociology together with GPE scholars in assessing the actual implications posed by Bitcoin and blockchains for contemporary global governance. Its interdisciplinary contributions provide academics, policymakers, industry practitioners and the general public with more nuanced understandings of technological change in the changing character of governance within and across the borders of nation-states.

cogburn smart property management: *For the Common Good* Alex John London, 2021 Alex John London defends a conception of the common good that grounds a moral imperative with two requirements. The first is to promote research that enables key social institutions to effectively, efficiently and equitably safeguard the basic interests of individuals. The second is to ensure that research is organized as a voluntary scheme of social cooperation that respects its various contributors' moral claim to be treated as free and equal. Connecting research to the goals of a just social order grounds a framework for assessing and managing research risk that reconciles these requirements and justifies key oversight practices in non-paternalistic terms. The result is a new understanding of research ethics that resolves coordination problems that threaten these goals and provides credible assurance that the requirements of this imperative are being met.--

cogburn smart property management: *Nanocarriers for Drug Delivery* Shyam Mohapatra, Shivendu Ranjan, Nandita Dasgupta, Raghvendra Kumar, Sabu Thomas, 2018-10-10 Nano-carriers for Drug Delivery: Nanoscience and Nanotechnology in Drug Delivery presents recent discoveries in research on the pharmaceutical applications of the various types of nanosystem-based drug delivery systems. As many nanosystems have reached the market over the past decade, this book proves their benefits to patients. It explores these new carriers and the advances in drug delivery they have facilitated. Reflecting the interdisciplinary nature of the subject matter, the book includes experts from different fields, and with various backgrounds and expertise. It will appeal to researchers and students from different disciplines, such as materials science, technology and various biomedical fields. Coverage includes industrial applications that bridge the gap between lab-based research and practical industrial use. The resulting work is a reference and practical source of guidance for researchers, students and scientists working in the fields of nanotechnology, materials science and technology and biomedical science.

cogburn smart property management: *Digital Roots* Gabriele Balbi, Nelson Ribeiro, Valérie Schafer, Christian Schwarzenegger, 2021-09-07 As media environments and communication practices evolve over time, so do theoretical concepts. This book analyzes some of the most well-known and fiercely discussed concepts of the digital age from a historical perspective, showing how many of them have pre-digital roots and how they have changed and still are constantly changing in the digital era. Written by leading authors in media and communication studies, the chapters historicize 16 concepts that have become central in the digital media literature, focusing on three main areas. The first part, Technologies and Connections, historicises concepts like network, media convergence, multimedia, interactivity and artificial intelligence. The second one is related to Agency and Politics and explores global governance, datafication, fake news, echo chambers, digital media activism. The last one, Users and Practices, is finally devoted to telepresence, digital loneliness, amateurism, user generated content, fandom and authenticity. The book aims to shed light on how concepts emerge and are co-shaped, circulated, used and reappropriated in different contexts. It argues for the need for a conceptual media and communication history that will reveal new developments without concealing continuities and it demonstrates how the analogue/digital dichotomy is often a misleading one.

cogburn smart property management: *The Oxford Handbook of Stigma, Discrimination, and Health* Brenda Major, John F. Dovidio, Bruce G. Link, 2018 Stigma leads to poorer health. In *The Oxford Handbook of Stigma, Discrimination, and Health*, leading scholars identify stigma mechanisms that operate at multiple levels to erode the health of stigmatized individuals and, collectively, produce health disparities. This book provides unique insights concerning the link between stigma and health across various types of stigma and groups.

cogburn smart property management: *Change of State* Sandra Braman, 2009-08-28 How control over information creation, processing, flows, and use has become the most effective form of power: theoretical foundations and empirical examples of information policy in the U.S., an innovator informational state. As the informational state replaces the bureaucratic welfare state, control over information creation, processing, flows, and use has become the most effective form of power. In *Change of State* Sandra Braman examines the theoretical and practical ramifications of

this change of state. She looks at the ways in which governments are deliberate, explicit, and consistent in their use of information policy to exercise power, exploring not only such familiar topics as intellectual property rights and privacy but also areas in which policy is highly effective but little understood. Such lesser-known issues include hybrid citizenship, the use of functionally equivalent borders internally to allow exceptions to U.S. law, research funding, census methods, and network interconnection. Trends in information policy, argues Braman, both manifest and trigger change in the nature of governance itself. After laying the theoretical, conceptual, and historical foundations for understanding the informational state, Braman examines 20 information policy principles found in the U.S. Constitution. She then explores the effects of U.S. information policy on the identity, structure, borders, and change processes of the state itself and on the individuals, communities, and organizations that make up the state. Looking across the breadth of the legal system, she presents current law as well as trends in and consequences of several information policy issues in each category affected. Change of State introduces information policy on two levels, coupling discussions of specific contemporary problems with more abstract analysis drawing on social theory and empirical research as well as law. Most important, the book provides a way of understanding how information policy brings about the fundamental social changes that come with the transformation to the informational state.

cogburn smart property management: The Public Core of the Internet Dennis Broeders, 2016 The growth and health of our digital economies and societies depend on the core protocols and infrastructure of the Internet. This technical and logical substructure of our digital existence is now in need of protection against unwarranted interference in order to sustain the growth and the integrity of the global Internet. The Internet's key protocols and infrastructure can be considered a global public good that provides benefits to everyone in the world. Countering the growing state interference with this 'public core of the Internet' requires a new international agenda for Internet governance that departs from the notion of a global public good. Core ingredients of this strategy are: - To establish and disseminate an international norm stipulating that the Internet's public core - its main protocols and infrastructure- should be considered a neutral zone, safeguarded against unwarranted intervention by governments. - To advocate efforts to clearly differentiate at the national and international level between Internet security (security of the Internet infrastructure) and national security (security through the Internet). - To broaden the arena for cyber diplomacy to include new coalitions of states (including the so called 'swing states') and private companies, including the large Internet companies as well as Internet intermediaries such as Internet Service Providers.

cogburn smart property management: Smart Structures and Materials B. Culshaw, 1996 This book introduces the enabling concepts that make up the so-called smart structure and presents a number of brief case studies to illustrate the applications of these concepts. It examines the domains of the individual technologies and defines the challenges faced by the integrator. The book is particularly effective for the potential system user who needs a good technical general background on the subject and is also useful for students and researchers in contributory technologies who want to better understand the context of their work. Consultants in civil and structural engineering will also find it of interest.

cogburn smart property management: Digital Participatory Planning Alexander Wilson, Mark Tewdwr-Jones, 2021-09-29 Digital Participatory Planning outlines developments in the field of digital planning and designs and trials a range of technologies, from the use of apps and digital gaming through to social media, to examine how accessible and effective these new methods are. It critically discusses urban planning, democracy, and computing technology literature, and sets out case studies on design and deployment. It assesses whether digital technology offers an opportunity for the public to engage with urban change, to enhance public understanding and the quality of citizen participation, and to improve the proactive possibilities of urban planning more generally. The authors present an exciting alternative story of citizen engagement in urban planning through the reimagination of participation that will be of interest to students, researchers, and professionals

engaged with a digital future for people and planning.

cogburn smart property management: *Architectonics of Game Spaces* Andri Gerber, Ulrich Götz, 2019-10 What consequences does the design of the virtual yield for architecture and to what extent can architecture be used to turn game-worlds into sustainable places in reality? This pioneering collection gives an overview of contemporary developments in designing video games and of the relationships such practices have established with architecture.

cogburn smart property management: *Hal Wallis* Bernard F. Dick, 2014-10-17 Hal Wallis (1898-1986) might not be as well known as David O. Selznick or Samuel Goldwyn, but the films he produced—*Casablanca*, *Jezebel*, *Now, Voyager*, *The Life of Emile Zola*, *Becket*, *True Grit*, and many other classics (as well as scores of Elvis movies)—have certainly endured. As producer of numerous films, Wallis made an indelible mark on the course of America's film industry, but his contributions are often overlooked. Bernard Dick offers the first comprehensive assessment of the producer's incredible career. A former office boy and salesman, Wallis first engaged with the film business as the manager of a Los Angeles movie theater in 1922. He attracted the notice of the Warner brothers, who hired him as a publicity assistant. Within three months he was director of the department, and appointments to studio manager and production executive quickly followed. Wallis went on to oversee dozens of productions and formed his own production company in 1944. Dick draws on numerous sources such as Wallis's personal production files and exclusive interviews with many of his contemporaries to finally tell the full story of his illustrious career. Dick combines his knowledge of behind-the-scenes Hollywood with fascinating anecdotes to create a portrait of one of Hollywood's early power players.

cogburn smart property management: *Governing Cyberspace* Dennis Broeders, Bibi van den Berg, 2020-06-26 Cyber norms and other ways to regulate responsible state behavior in cyberspace is a fast-moving political and diplomatic field. The academic study of these processes is varied and interdisciplinary, but much of the literature has been organized according to discipline. Seeking to cross disciplinary boundaries, this timely book brings together researchers in fields ranging from international law, international relations, and political science to business studies and philosophy to explore the theme of responsible state behavior in cyberspace. . Divided into three parts, *Governing Cyberspace* first looks at current debates in and about international law and diplomacy in cyberspace. How does international law regulate state behaviour and what are its limits? How do cyber superpowers like China and Russia shape their foreign policy in relation to cyberspace? The second focuses on power and governance. What is the role for international organisations like NATO or for substate actors like intelligence agencies? How do they adapt to the realities of cyberspace and digital conflict? How does the classic balance of power play out in cyberspace and how do different states position themselves? The third part takes a critical look at multistakeholder and corporate diplomacy. How do global tech companies shape their role as norm entrepreneurs in cyberspace, and how do their cyber diplomatic efforts relate to their corporate identity?

cogburn smart property management: *Celebrity Politics* Mark Wheeler, 2013-08-22 In this new book, Mark Wheeler offers the first in-depth analysis of the history, nature and global reach of celebrity politics today. Celebrity politicians and politicized celebrities have had a profound impact upon the practice of politics and the way in which it is now communicated. New forms of political participation have emerged as a result and the political classes have increasingly absorbed the values of celebrity into their own PR strategies. Celebrity activists, endorsers, humanitarians and diplomats also play a part in reconfiguring politics for a more fragmented and image-conscious public arena. In academic circles, celebrity may be viewed as a 'manufactured product'; one fabricated by media exposure so that celebrity activists are no more than 'bards of the powerful.' Mark Wheeler, however, provides a more nuanced critique contending that both celebrity politicians and politicized stars should be defined by their 'affective capacity' to operate within the public sphere. This timely book will be a valuable resource for students of media and communication studies and political science as well as general readers keen to understand the nature and reach of

contemporary celebrity culture.

cogburn smart property management: *The Palgrave Handbook of Corporate Sustainability in the Digital Era* Seung Ho Park, Maria Alejandra Gonzalez-Perez, Dinorá Eliete Floriani, 2020-10-06 This handbook addresses the intersection between corporate sustainability and digital transformation. It analyzes the challenges and transformations required to be able to have sustainable businesses with a future orientation. Topics include current and potential social, demographic, technological, and managerial trends; the implications of the digital revolution in society and business; as well as the challenges of being sustainable, and profitable. Providing an understanding of the business reasons to incorporate a future orientation into the business strategy, this handbook facilitates an understanding of the need for profound changes in individual behavior, organizational culture, public policy, and business environments to adapt to the accelerated changes and manage business with orientation to the future.

cogburn smart property management: Complicite, Theatre and Aesthetics Tomasz Wiśniewski, 2016-10-27 This book presents a pioneering critical study of Complicite's work throughout the years. Drawing on an extensive overview of the available research material – including interviews, manuscripts and the company's own archive – the book is framed within a clearly defined research perspective and explores the singularity of theatre communication. The book results from an encounter between the London-based – but cosmopolitan in scope – company, and a fresh application of the form-oriented scholarship of Eastern Europe, Yuri Lotman's semiosphere in particular. Focused on the aesthetics of Complicite, this study achieves a critical distance and undertakes multidimensional scrutiny of the available research material. By identifying the principles of Complicite's aesthetics, the book attempts to grasp the company's artistic paradigm. It focuses on ways of creating, preserving, and decoding meanings, rather than on the nuances of performance or contextual issues.

cogburn smart property management: Handbook of Farm, Dairy and Food Machinery Engineering Myer Kutz, 2019-06-15 Handbook of Agricultural and Farm Machinery, Third Edition, is the essential reference for understanding the food industry, from farm machinery, to dairy processing, food storage facilities and the machinery that processes and packages foods. Effective and efficient food delivery systems are built around processes that maximize efforts while minimizing cost and time. This comprehensive reference is for engineers who design and build machinery and processing equipment, shipping containers, and packaging and storage equipment. It includes coverage of microwave vacuum applications in grain processing, cacao processing, fruit and vegetable processing, ohmic heating of meat, facility design, closures for glass containers, double seaming, and more. The book's chapters include an excellent overview of food engineering, but also regulation and safety information, machinery design for the various stages of food production, from tillage, to processing and packaging. Each chapter includes the state-of-the art in technology for each subject and numerous illustrations, tables and references to guide the reader through key concepts. - Describes the latest breakthroughs in food production machinery - Features new chapters on engineering properties of food materials, UAS applications, and microwave processing of foods - Provides efficient access to fundamental information and presents real-world applications - Includes design of machinery and facilities as well as theoretical bases for determining and predicting behavior of foods as they are handled and processed

cogburn smart property management: The WORN Archive Serah-Marie McMahon, 2014-04-29 WORN is reclaiming fashion as something that can be exciting, challenging, different, quirky, interesting, not just as something you have to consume.—Jane Pratt, from her foreword The WORN Archive: A Fashion Journal about the Arts, Ideas, and History of What We Wear is a manifesto on why fashion and clothing matter. For eight years, the Canadian magazine has investigated the

intersections of fashion, pop culture, and art. With prescient, intelligent articles, WORN Fashion Journal strives to address diverse issues such as gender, identity, and culture with openness and honesty. WORN asserts that fashion is art, history, ideas, and most of all fun—that style is a personal experience that need not align with the fashion industry. The four-hundred-page book features the best content from the journal's first fourteen issues, assembled by WORN'S founder and editor in chief, Serah-Marie McMahon. Articles penned by a host of unique contributors (academics, writers, curators, and artists) touch on topics as wide-ranging as the relationship between feminism and fashion, discourse on hijabs, how to tie a tie, the history of flight attendants, and textile conservation. With eclectic photo shoots featuring real models, striking illustrations, and whimsical layouts, every page is a joyful, creative approach to clothing. The WORN Archive is the ultimate cultural style map for those who don't want to be told how to dress but are seeking a transformative understanding of why we wear what we do.

cogburn smart property management: Animism in Art and Performance Christopher Braddock, 2017-11-27 This book explores Māori indigenous and non-indigenous scholarship corresponding with the term 'animism'. In addressing visual, media and performance art, it explores the dualisms of people and things, as well as 'who' or 'what' is credited with 'animacy'. It comprises a diverse array of essays divided into four sections: Indigenous Animacies, Atmospheric Animations, Animacy Hierarchies and Sensational Animisms. Cassandra Barnett discusses artists Terri Te Tau and Bridget Reweti and how personhood and hau (life breath) traverse art-taonga. Artist Natalie Robertson addresses kōrero (talk) with ancestors through photography. Janine Randerson and sound artist Rachel Shearer consider the sun as animate with mauri (life force), while Anna Gibb explores life in the algorithm. Rebecca Schneider and Amelia Jones discuss animacy in queered and raced formations. Stephen Zepke explores Deleuze and Guattari's animist hylozoism and Amelia Barikin examines a mineral ontology of art. This book will appeal to readers interested in indigenous and non-indigenous entanglements and those who seek different approaches to new materialism, the post-human and the anthropocene.

cogburn smart property management: The Color of Mind Derrick Darby, John L. Rury, 2018-01-24 American students vary in educational achievement, but white students in general typically have better test scores and grades than black students. Why is this the case, and what can school leaders do about it? In The Color of Mind, Derrick Darby and John L. Rury answer these pressing questions and show that we cannot make further progress in closing the achievement gap until we understand its racist origins. Telling the story of what they call the Color of Mind—the idea that there are racial differences in intelligence, character, and behavior—they show how philosophers, such as David Hume and Immanuel Kant, and American statesman Thomas Jefferson, contributed to the construction of this pernicious idea, how it influenced the nature of schooling and student achievement, and how voices of dissent such as Frederick Douglass, Frances Ellen Watkins Harper, and W. E. B. Du Bois debunked the Color of Mind and worked to undo its adverse impacts. Rejecting the view that racial differences in educational achievement are a product of innate or cultural differences, Darby and Rury uncover the historical interplay between ideas about race and American schooling, to show clearly that the racial achievement gap has been socially and institutionally constructed. School leaders striving to bring justice and dignity to American schools today must work to root out the systemic manifestations of these ideas within schools, while still doing what they can to mitigate the negative effects of poverty, segregation, inequality, and other external factors that adversely affect student achievement. While we cannot expect schools alone to solve these vexing social problems, we must demand that they address the dignitary injustices associated with how we track, discipline, and deal with special education that reinforce long-standing racist ideas. That is the only way to expel the Color of Mind from schools, close the racial achievement gap, and afford all children the dignity they deserve.

cogburn smart property management: Global Internet Governance Laura DeNardis, 2018-07-26 The editor of this new Routledge title argues that our economic and social lives are now utterly dependent upon the successful coordination of the Internet. Moreover, as the Internet

expands from its current form to an 'Internet of things', she suggests that its stability and security will soon be recognized as important as other global concerns, like battling terrorism and fighting climate change. Who controls the Internet? The question has profound implications for our access to knowledge, the pace of economic growth, and the protection of human rights, not least freedom of expression and the right to privacy. And the question's importance has been underscored in recent times by landmark events, including revelations about the actual and potential power of social-media companies, and the breathtaking extent of surveillance by intelligence and security organizations, such as the NSA in the United States and Britain's GCHQ. It is perhaps only in the last several years that issues about and around the governance of the Internet have entered the public consciousness, but serious academic and policy work dates back decades. And now there is a critical mass of scholarship that can usefully be collected under the rubric of 'Internet Governance'. Like the Internet itself, leading theorists and researchers in the field are distributed globally, and work in disciplines across the social sciences and humanities. Indeed, much of the relevant literature remains inaccessible or is highly specialized and compartmentalized, so that it is difficult for many of those who are interested in the subject to obtain an informed, balanced, and comprehensive overview. This new four-volume collection, published as part of Routledge's acclaimed series, *Critical Concepts in Sociology*, meets the need for a reference work to make sense of the subject's vast and dispersed literature and the continuing explosion in research output.

cogburn smart property management: *The Last Great Days of Radio* Lynn Woolley, 1994 Long-time radio personality Lynn Woolley introduces you to the laughs and times of Texas radio in its heyday. A mixture of humor, wit, and nostalgia, this book follows the career of Woolley from the smallest station in a small market to the largest radio newsroom in Texas, and back again.

cogburn smart property management: *Technocrime and Criminological Theory* Kevin Steinmetz, Matt R. Nobles, 2017-09-22 Cybercrime, computer crime, Internet crime, and technosecurity have been of increasing concern to citizens, corporations, and governments since their emergence in the 1980s. Addressing both the conventional and radical theories underlying this emerging criminological trend, including feminist theory, social learning theory, and postmodernism, this text paves the way for those who seek to tackle the most pertinent areas in technocrime. *Technocrime and Criminological Theory* challenges readers to confront the conflicts, gaps, and questions faced by both scholars and practitioners in the field. This book serves as an ideal primer for scholars beginning to study technocrime or as a companion for graduate level courses in technocrime or deviance studies.

cogburn smart property management: *Cyber Threat Intelligence* Ali Dehghantanha, Mauro Conti, Tooska Dargahi, 2018-04-27 This book provides readers with up-to-date research of emerging cyber threats and defensive mechanisms, which are timely and essential. It covers cyber threat intelligence concepts against a range of threat actors and threat tools (i.e. ransomware) in cutting-edge technologies, i.e., Internet of Things (IoT), Cloud computing and mobile devices. This book also provides the technical information on cyber-threat detection methods required for the researcher and digital forensics experts, in order to build intelligent automated systems to fight against advanced cybercrimes. The ever increasing number of cyber-attacks requires the cyber security and forensic specialists to detect, analyze and defend against the cyber threats in almost real-time, and with such a large number of attacks is not possible without deeply perusing the attack features and taking corresponding intelligent defensive actions - this in essence defines cyber threat intelligence notion. However, such intelligence would not be possible without the aid of artificial intelligence, machine learning and advanced data mining techniques to collect, analyze, and interpret cyber-attack campaigns which is covered in this book. This book will focus on cutting-edge research from both academia and industry, with a particular emphasis on providing wider knowledge of the field, novelty of approaches, combination of tools and so forth to perceive reason, learn and act on a wide range of data collected from different cyber security and forensics solutions. This book introduces the notion of cyber threat intelligence and analytics and presents different

attempts in utilizing machine learning and data mining techniques to create threat feeds for a range of consumers. Moreover, this book sheds light on existing and emerging trends in the field which could pave the way for future works. The inter-disciplinary nature of this book, makes it suitable for a wide range of audiences with backgrounds in artificial intelligence, cyber security, forensics, big data and data mining, distributed systems and computer networks. This would include industry professionals, advanced-level students and researchers that work within these related fields.

cogburn smart property management: *Sharing Cities* Duncan McLaren, Julian Agyeman, 2015-11-20 The future of humanity is urban, and the nature of urban space enables, and necessitates, sharing -- of resources, goods and services, experiences. Yet traditional forms of sharing have been undermined in modern cities by social fragmentation and commercialization of the public realm. In *Sharing Cities*, Duncan McLaren and Julian Agyeman argue that the intersection of cities' highly networked physical space with new digital technologies and new mediated forms of sharing offers cities the opportunity to connect smart technology to justice, solidarity, and sustainability. McLaren and Agyeman explore the opportunities and risks for sustainability, solidarity, and justice in the changing nature of sharing. McLaren and Agyeman propose a new sharing paradigm, which goes beyond the faddish sharing economy -- seen in such ventures as Uber and TaskRabbit -- to envision models of sharing that are not always commercial but also communal, encouraging trust and collaboration. Detailed case studies of San Francisco, Seoul, Copenhagen, Medellín, Amsterdam, and Bengaluru (formerly Bangalore) contextualize the authors' discussions of collaborative consumption and production; the shared public realm, both physical and virtual; the design of sharing to enhance equity and justice; and the prospects for scaling up the sharing paradigm through city governance. They show how sharing could shift values and norms, enable civic engagement and political activism, and rebuild a shared urban commons. Their case for sharing and solidarity offers a powerful alternative for urban futures to conventional race-to-the-bottom narratives of competition, enclosure, and division.

cogburn smart property management: Ethics and Integrity in Public Administration: Concepts and Cases Raymond W Cox, 2015-03-26 Ethics and Integrity in Public Administration presents cutting-edge perspectives on the role of ethics in public sector management - what it is and where it is going. The contributors include a cross-section of authoritative authors from around the globe, and from both the academy and government. They cover a wide range of topics, diverse theoretical and conceptual paradigms, and global examples, and provide a broader view than what is typically offered in other books. The book includes both theoretical insights and commentaries grounded in practice. Chapters are divided into three parts: Ethical Foundations and Perspectives, Ethical Management and Ethical Leadership, and International and Comparative Perspectives.

cogburn smart property management: Whiteness in Higher Education: The Invisible Missing Link in Diversity and Racial Analyses: ASHE Higher Education Report, Volume 42, Number 6 Nolan L. Cabrera, Jeremy D. Franklin, Jesse S. Watson, 2017-02-13 When issues of diversity and race arise in higher education scholarship and practice, the focus is generally on Students of Color. That being said, if there are People of Color being marginalized on college campuses, there is a structural mechanism facilitating the marginalization. This monograph explores the relevance of Whiteness to the field of Higher Education. While Whiteness as a racial discourse is continually changing and defies classification, it is both real in terms of its impacts on the campus racial dynamics. Highlighting many of the contours of Whiteness in higher education, this volume explores the influence of Whiteness on interpersonal interactions, campus climate, culture, ecology, policy, and scholarship. Additionally, it explores what can be done—both individually and institutionally—to address the problem of Whiteness in higher education. Ultimately, this monograph is offered from the perspective that racial issues concern everyone, and this engages the possibility of both People of Color destabilizing Whiteness and White people becoming racial justice allies within the context of higher education institutions. This is the sixth issue of the 42nd volume of the Jossey-Bass series ASHE Higher Education Report. Each monograph is the definitive analysis of a tough higher education issue, based on thorough research of pertinent literature and institutional

experiences. Topics are identified by a national survey. Noted practitioners and scholars are then commissioned to write the reports, with experts providing critical reviews of each manuscript before publication.

cogburn smart property management: *The Cybernetic Hypothesis* Tiqqun, 2020-04-14 An early text from Tiqqun that views cybernetics as a fable of late capitalism, and offers tools for the resistance. The cybernetician's mission is to combat the general entropy that threatens living beings, machines, societies—that is, to create the experimental conditions for a continuous revitalization, to constantly restore the integrity of the whole. —from *The Cybernetic Hypothesis* This early Tiqqun text has lost none of its pertinence. The *Cybernetic Hypothesis* presents a genealogy of our “technical” present that doesn't point out the political and ethical dilemmas embedded in it as if they were puzzles to be solved, but rather unmasks an enemy force to be engaged and defeated. Cybernetics in this context is the *teknê* of threat reduction, which unfortunately has required the reduction of a disturbing humanity to packets of manageable information. Not so easily done. Not smooth. A matter of civil war, in fact. According to the authors, cybernetics is the latest master fable, welcomed at a certain crisis juncture in late capitalism. And now the interesting question is: Has the guest in the house become the master of the house? The “cybernetic hypothesis” is strategic. Readers of this little book are not likely to be naive. They may be already looking, at least in their heads, for a weapon, for a counter-strategy. Tiqqun here imagines an unbearable disturbance to a System that can take only so much: only so much desertion, only so much destituent gesture, only so much guerilla attack, only so much wickedness and joy.

cogburn smart property management: *Woodward'S Reminiscences Of The Creek Or Muscogee Indians* Thomas Simpson Woodward, 2021-04-20 The book, Woodward'S Reminiscences Of The Creek Or Muscogee Indians: Contained In Letters To Friends In Georgia And Alabama, has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

cogburn smart property management: *Advertising and Promotion* Chris Hackley, Rungpaka Amy Hackley, 2021-01-27 Now in its fifth edition, this popular textbook continues to provide a comprehensive insight into the world of advertising and promotional communications. Unique in its approach, the authors situate the key concepts of marketing communications from the perspective of advertising agencies and provide insight into what a career within an ad agency might be like. Their critical approach grounded in up-to-date research allows the reader to develop an interdisciplinary understanding of marketing and advertising, including business, socio-cultural, media studies and consumer culture theory perspectives. Along with striking full colour visual advertisements and illustrations, new examples and case studies, this fifth edition has been fully updated to include: Two brand new chapters on Social Media Advertising and Digital Advertising Commentary on how the COVID-19 pandemic has and will impact advertising The evolving role of advertising agencies in the post digital era Emerging forms of advertising and promotion, including the role of influencers

cogburn smart property management: *Civil Society and Financial Regulation* Lisa Kastner, 2017-10-12 Coalitions of consumer groups, NGOs, and trade unions have traditionally been considered politically weak compared to well-organized and resourceful financial sector groups which dominate or capture financial regulatory decisions. However, following the 2008 financial crisis, civil society groups have been seen to exert much more influence, with politicians successfully implementing financial reform in spite of industry opposition. Drawing on literature from social movement research and regulatory politics, this book shows how diffuse interests were represented in financial regulatory overhauls in both the United States (US) and the European Union (EU). Four cases of reform in the post-crisis regulatory context are analyzed: the creation of a new Consumer Financial Protection Bureau in the US; the introduction of new consumer protection regulations through EU directives; the failure of attempts to introduce a financial transaction tax in the US; and the agreement of 11 EU member states to introduce such a tax. It shows how building coalitions with important elite allies outside and inside government helped traditionally weak interest groups transcend a lack of material resources to influence and shape regulatory policy. By engaging with a less well-known side of the debate, it explains how business power was curbed and diverse interests translated into financial regulatory policy.

Cogburn Smart Property Management Introduction

In today's digital age, the availability of Cogburn Smart Property Management books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Cogburn Smart Property Management books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Cogburn Smart Property Management books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Cogburn Smart Property Management versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation.

Furthermore, Cogburn Smart Property Management books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Cogburn Smart Property Management books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Cogburn Smart Property Management books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Cogburn Smart Property Management books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Cogburn Smart Property Management books and manuals for download and embark on your journey of knowledge?
