**collective education fund uber: The Venture Alchemists** Rob Lalka, 2024-05-14 We once idolized tech entrepreneurs for creating innovations that seemed like modern miracles. Yet our faith has been shattered. We now blame them for spreading lies, breaking laws, and causing chaos. Yesterday's Silicon Valley darlings have become today's Big Tech villains. Which is it? Are they superheroes or scoundrels? Or is it more complicated, some blend of both? In The Venture Alchemists, Rob Lalka demystifies how tech entrepreneurs built empires that made trillions. Meta started as a cruel Halloween prank, Alphabet began as a master's thesis that warned against corporate deception, and Palantir came from a campus controversy over hateful speech. These largely forgotten origin stories show how ordinary fears and youthful ambitions shaped their ventures—making each tech tale relatable, both wonderfully and tragically human. Readers learn about the adversities tech entrepreneurs overcame, the troubling tradeoffs they made, and the tremendous power they now wield. Using leaked documents and previously unpublished archival material, Lalka takes readers inside Big Tech's worst exploitations and abuses, alongside many good intentions and moral compromises. But this story remains unfinished, and The Venture Alchemists ultimately offers hope from the people who, decades ago, warned about the risks of the emerging Internet. Their insights illuminate a path toward more responsible innovations, so that technologies aren't dangerous weapons but valuable tools that ensure progress, improve society, and enhance our daily lives.

**collective education fund uber: Innovation Commons** Jason Potts, 2019 Innovation is among

the most important topics in understanding economic sustained economic growth. Jason Potts argues that the initial stages of innovation require cooperation under uncertainty and draws from insights on the solving of commons problems to shed light on policies and conditions conducive to the creation of new firms and industries. The problems of innovation commons are overcome, Potts shows, when there are governance institutions that incentivize cooperation, thereby facilitating the pooling of distributed information, knowledge, and other inputs. The entrepreneurial discovery of an economic opportunity is thus an emergent institution resulting from the formation of a cooperative group, under conditions of extreme uncertainty, working toward the mutual purpose of opportunity discovery about a nascent technology or new idea. Among the problems commons address are those of the identity; cooperation; consent; monitoring; punishment; and independence. A commons is efficient compared to the creation of alternative economic institutions that involve extensive contracting and networks, private property rights and price signals, or public goods (i.e. firms, markets, and governments). In other words, the origin of innovation is not entrepreneurial action per se, but the creation of a common pool resource from which entrepreneurs can discover opportunities. Potts' framework draws on the evolutionary theory of cooperation and institutional theory of the commons. It also has important implications for understanding the origin of firms and industries, and for the design of innovation policy. Beginning with a discussion of problems of knowledge and coordination as well as their implications for common pool environments, the book then explores instances of innovation commons and the lifecycle of innovation, including increased institutionalization and rigidity. Potts also discusses the possible implications of the commons framework for policies to sustain innovation dynamics.

**collective education fund uber:** **The School of Franz Brentano** L. Albertazzi, M. Libardi, R. Poli, 2013-04-17 The central idea developed by the contributions to this book is that the split between analytic philosophy and phenomenology - perhaps the most important schism in twentieth-century philosophy - resulted from a radicalization of reciprocal partialities. Both schools of thought share, in fact, the same cultural background and their same initial stimulus in the thought of Franz Brentano. And one outcome of the subsequent rift between them was the oblivion into which the figure and thought of Brentano have fallen. The first step to take in remedying this split is to return to Brentano and to reconstruct the 'map' of Brentanisms. The second task (which has been addressed by this book) is to revive interest in the theoretical complexity of Brentano's thought and

of his pupils and to revitalize those aspects that have been neglected by subsequent debate within the various movements of Brentanian inspiration. We have accordingly decided to organize the book into two introductory essays followed by two sections (Parts 1 and 2) which systematically examine Brentano's thought and that of his followers. The two introductory essays reconstruct the reasons for the 'invisibility', so to speak, of Brentano and set out of his philosophical doctrine. Part 1 of the book then examines the essential features of six of Brentano's most outstanding pupils (Marty, Stumpf, Meinong, Ehrenfels, Husserl and Twardowski). Part 2 contains nine essays concentrating on the principal topics addressed by the Brentanians.

**collective education fund uber:** Theory U C. Otto Scharmer, 2009-01-01 Shows how leaders can access the deepest source of inspiration and vision • Includes dozens of tested exercises, practices, and real-world examples We live in a time of massive institutional failure, one that requires a new consciousness and a new collective leadership capacity. In this groundbreaking book, Otto Scharmer invites us to see the world in new ways and in so doing discover a revolutionary approach to leadership. What we pay attention to and how we pay attention is key to what we create. What prevents us from attending to situations more effectively is that we aren't fully aware of and in touch with the inner place from which attention and intention originate. This is what Scharmer calls our blind spot. By moving through Scharmer's U process, we consciously access the blind spot and learn to connect to our authentic Self—the deepest source of knowledge and inspiration—in the realm of "presencing," a term coined by Scharmer that combines the concepts of presence and sensing. Based on ten years of research and action learning and interviews with over 150 practitioners and thought leaders, Theory U offers a rich diversity of compelling stories and examples and includes dozens of exercises and practices that allow leaders, and entire organizations, to shift awareness, connect with the best future possibility, and gain the ability to realize it.

**collective education fund uber: Teachers Can Be Financially Fit** Tawni Hunt Ferrarini, M. Scott Niederjohn, Mark C. Schug, William C. Wood, 2020-08-11 This book uses relatable case studies to dispense practical financial advice to educators. Written by an expert team of four award-winning economics educators, the book provides an engaging narrative specifically designed for teachers and their unique financial needs. Educators are attracted to the teaching profession for numerous reasons. Prospective teachers enter the profession believing it offers a certain level of job security and good benefits, usually including a defined-benefit, state-funded pension. But things are changing. Pensions vary widely from state to state and even within school districts. Many private schools do not offer even basic 403(b) saving plans and, when they do, they are often not very generous. Much the same can be said of many charter schools and private colleges and universities. The book consists of fourteen chapters covering a comprehensive group of topics specifically

curated for educators teaching at the K-12 and university level, including saving for retirement, managing debt, investment strategies, and real estate. Each chapter begins with a case study of an educator in a specific financial situation, which sets the scene for the introduction and explanation of key concepts. The chapters include a Q&A section to address common questions and conclude with a "Financial 911" focusing on a financial emergency related to the chapter topic.

The talented scholars in this edition, like those in previous volumes, continue to seek answers to a host of questions as to how groups evolve, how they compete with similar groups, how they influence elections, and how they lobby—across a wide range of issues.

**collective education fund uber: The Bright Side of Shame** Claude-Hélène Mayer, Elisabeth Vanderheiden, 2019-04-25 This book provides new ideas on how to work with and constructively transform shame on a theoretical and practical level, and in various socio-cultural contexts and professions. It provides practical guidelines on dealing with shame on the basis of reflection, counselling models, exercises, simulations, specific psychotherapeutic approaches, and auto-didactical learning material, so as to transform shame from a negatively experienced emotion into a mental health resource. The book challenges theorists to adopt an interdisciplinary stance and to think "outside the box." Further, it provides practitioners, such as coaches, counsellors, therapists, trainers and medical personnel, with practical tools for transforming negative experiences and emotions. In brief, the book shows practitioners how to unlock the growth potential of individuals, teams, and organisations, allowing them to develop constructively and positively.

**collective education fund uber: Green Web-II** Medani P. Bhandari, 2022-09-01 In dealing with the IUCN, one must bear in mind that there never has been, and undoubtedly never will be, any other organization even remotely resembling it. Its peculiarities, subtleties and complexities are sometimes mind-boggling (Nicholson 1990 in Holdgate 1999: ix). Green Web-II investigates IUCN's role in global biodiversity conservation policy as well as in national program development in India, Pakistan, Nepal and Bangladesh. It explores how nature protection priorities and approaches are promoted or addressed by IUCN, an international organization, and how environment conservation policies are created and maintained in states with different capacities of South Asia. It also evaluates IUCN's competency in bio-diversity, climate change, nature conservation and environmental policy formulation at global, regional and country level. This study is the first detailed scholarly study on the IUCN as an organization as well as on its efforts in biodiversity conservation. This book adds to our knowledge, firstly by contributing to a small but growing body of work on the sociology of international organizations. IOs, especially International Governmental Organizations (IGOs), have long been the subject of mostly political science. Secondly, it applies a fuller sociological imagination to the study of IOs by critically exploring one of the largest and most active nature conservation organizations in the world. Thirdly, it also explores how the IUCN actually goes about building protectoral programs with individual member nations. Additionally, the book explores the recent development of the green economy (GE) concepts into IUCN's program planning today. The green economy initiative applies a people-first approach. Although the concept is relatively new, this research explores the theoretical development of a green economy and illustrates how this theory is applied in IUCN's program planning to program implementation.

**collective education fund uber: The Adaptation Advantage** Heather E. McGowan, Chris Shipley, 2020-04-14 A guide for individuals and organizations navigating the complex and ambiguous Future of Work Foreword by New York Times columnist and best-selling author Thomas L. Friedman Technology is changing work as we know it. Cultural norms are undergoing tectonic shifts. A global pandemic proves that we are inextricably connected whether we choose to be or not. So much change, so quickly, is disorienting. It's undermining our sense of identity and challenging our ability to adapt. But where so many see these changes as threatening, Heather McGowan and Chris Shipley see the opportunity to open the flood gates of human potential—if we can change the way we think about work and leadership. They have dedicated the last 5 years to understanding how technical, business, and cultural shifts affecting the workplace have brought us to this crossroads, The result is a powerful and practical guide to the future of work for leaders and employees. The future can be better, but only if we let go of our attachment to our traditional (and disappearing) ideas about careers, and what a good job looks like. Blending wisdom from interviews with hundreds of executives, The Adaptation Advantage explains the profound changes happening in the world of work and posits the solution: new ways to think about careers that detach our sense of pride and personal identity from our job title, and connect it to our sense of purpose. Activating purpose, the authors suggest, will inherently motivate learning, engagement, empowerment, and lead to new forms of pride and identity throughout the workforce. Only when we let go of our rigid career identities can we embrace and appreciate the joys of learning and adapting to new realities—and help our organizations do the same. Of course, making this transition is hard. It requires leaders who can attract and motivate cognitively diverse teams fueled by a strong sense of purpose in an environment of psychological safety—despite fierce competition and external pressures. Adapting to the future of work has always called for strong leadership. Now, as a pandemic disrupts so many aspects of work, adapting is a leadership imperative. The Adaptation Advantage is an essential guide to help leaders meet that challenge.

**collective education fund uber: Unleashed** Frances Frei, Anne Morriss, 2020-06-02

Unleashed is worth an afternoon of your time, whether or not you are already a leader. It is sparkily written and personal, drawing on the experiences of co-authors (and spouses) Frei and Morriss.—Financial Times Leadership isn't easy. It takes grit, courage, and vision, among other things, that can be hard to come by on your toughest days. When leaders and aspiring leaders seek out advice, they're often told to try harder. Dig deeper. Look in the mirror and own your natural-born strengths and fix any real or perceived career-limiting deficiencies. Frances Frei and Anne Morriss offer a different worldview. They argue that this popular leadership advice glosses over the most important thing you do as a leader: build others up. Leadership isn't about you. It's about how effective you are at empowering other people—and making sure this impact endures even in your absence. As Frei and Morriss show through inspiring stories from ancient Rome to present-day Silicon Valley, the origins of great leadership are found, paradoxically, not in worrying about your own status and advancement, but in the unrelenting focus on other people's potential. Unleashed provides radical advice for the practice of leadership today. Showing how the boldest, most effective leaders use a special combination of trust, love, and belonging to create an environment in which other people can excel, Frei and Morriss offer practical, battle-tested tools—based on their work with companies such as Uber, Riot Games, WeWork, and others—along with interviews and stories from their own personal experience, to make these ideas come alive. This book is your indispensable guide for

unleashing greatness in other people . . . and, ultimately, in yourself. To learn more, please visit [theleadersguide.com](http://theleadersguide.com).

**collective education fund uber: Flywheels** Tom Alberg, 2021-11-02 Once a blue-collar outpost, Seattle, home to Microsoft, Amazon, and hundreds of startups, transformed into one of the world's major innovation hubs in less than twenty years. As other cities try to solve the riddle of creating vibrant economies, many have looked to Seattle as a model for tech-driven urban renaissance. However, that success comes with skyrocketing housing costs, increasing homelessness, public safety concerns, persistent racial inequality, and a widening gap between the haves and have-nots. Against that backdrop, big tech has become a popular target. Tom Alberg, a venture capitalist who was one of the first investors in Amazon, draws on his experience in Seattle's tech boom to offer a vision for how cities and businesses can build a brighter future together. He explores ways that cities can soar to prosperity by creating the conditions that encourage innovation. Like flywheels, livable cities generate momentum by drawing creative citizens who launch businesses. Success attracts more talent, energizing local economies and accelerating further innovation. Alberg emphasizes the importance of city governments and tech companies partnering to address civic challenges. He reflects on why the benefits of the tech boom have not been distributed equally and what business and government leaders must do differently to ensure inclusive growth. The book also examines success stories from smaller cities and their lessons for other up-and-coming tech hubs. Demonstrating the need for innovative thinking that encourages livability alongside economic growth, *Flywheels* is timely reading for everyone from mayors to business leaders to engaged citizens.

**collective education fund uber: Public Broadcasting and European Law** Irini Katsirea, 2008-01-01 Although EU Member States share a tradition of regulating public broadcasting for the public interest, such regulation has been in decline in recent years. It has been challenged by the emergence of commercial television sworn to the market logic, as well as by satellite services and the Internet. EU law and policy has, under pressure from powerful global forces, abetted that decline. The question thus arises: Do cultural values still matter in European national broadcasting? This important book examines the challenges posed to public service obligations by European Union media law and policy. An in-depth analysis of the extent to which six countries (France, Germany, Greece, Italy, the Netherlands, and the United Kingdom) regulate broadcasting for the public interest reveals a range of vulnerability to national political pressures or, alternatively, to the ideology of market sovereignty. The author examines the country of origin principle and the European quota rule of the Television without Frontiers Directive, revealing the influence of European law on the definition and enforcement of programme requirements, and shows how the case law of the European Court of Justice encourages deregulation at the national level without offering adequate safeguards at the supranational level in exchange. She asks the question whether the alleged 'European audiovisual model' actually persists--that is, whether broadcasting is still committed to protecting such values as cultural diversity, the safety of minors, the susceptibility of consumers to advertising, media pluralism, and the fight against racial and religious hatred. The book concludes with an evaluation of the impact of the EU state aid regime on the licence fee based financing of public broadcasting. Despite the increasing importance of the subject, its study in a comparative context has been heretofore underdeveloped. This book fully provides that context and more, and will be of great value and interest to all parties concerned with the key role of communications in the development of European integration.
