companies that need marketing help: Decoding the New Consumer Mind Kit Yarrow, 2014-03-31 Take a glimpse into the mind of the modern consumer A decade of swift and stunning change has profoundly affected the psychology of how, when, and why we shop and buy. In Decoding the New Consumer Mind, award-winning consumer psychologist Kit Yarrow shares surprising insights about the new motivations and behaviors of shoppers, taking marketers where they need to be today: into the deeply psychological and often unconscious relationships that people have with products, retailers, marketing communications, and brands. Drawing on hundreds of

consumer interviews and shop-alongs, Yarrow reveals the trends that define our transformed behavior. For example, when we shop we show greater emotionality, hunting for more intense experiences and seeking relief and distraction online. A profound sense of isolation and individualism shapes the way we express ourselves and connect with brands and retailers. Neurological research even suggests that our brains are rewired, altering what we crave, how we think, and where our attention goes. Decoding the New Consumer Mind provides marketers with practical ways to tap into this new consumer psychology, and Yarrow shows how to combine technology and innovation to enhance brand image; win love and loyalty through authenticity and integrity; put the consumer's needs and preferences front and center; and deliver the most emotionally intense, yet uncomplicated, experience possible. Armed with Yarrow's strategies, marketers will be able to connect more effectively with consumers—driving profit and success across the organization.

companies that need marketing help: Aaker on Branding David Aaker, 2014-07-15 Aaker on Branding presents in a compact form the twenty essential principles of branding that will lead to the creation of strong brands. Culled from the six David Aaker brand books and related publications, these principles provide the broad understanding of brands, brand strategy, brand portfolios, and brand building that all business, marketing, and brand strategists should know. Aaker on Branding is a source for how you create and maintain strong brands and synergetic brand portfolios. It provides a checklist of strategies, perspectives, tools, and concepts that represents not only what you should know but also what action options should be on the table. When followed, these principles will lead to strong, enduring brands that both support business strategies going forward and create coherent and effective brand families. Those now interested in and involved with branding are faced with information overload, not only from the Aaker books but from others as well. It is hard to know what to read and which elements to adapt. There are a lot of good ideas out there but also some that are inferior, need updating, or are subject to being misinterpreted and misapplied. And there are some ideas that, while plausible, are simply wrong if not dangerous especially if taken literally. Aaker on Branding offers a sense of topic priorities and a roadmap to David Aaker's books, thinking, and contributions. As it structures the larger literature of the brand field, it also advances the theory of branding and the practice of brand management and, by extension, the practice of business management.
