corporate veil and financial documents: The Economic Structure of Corporate Law

Frank H. Easterbrook, Daniel R. Fischel, 1996-02-01 The authors argue that the rules and practices of corporate law mimic contractual provisions that parties would reach if they bargained about every contingency at zero cost and flawlessly enforced their agreements. But bargaining and enforcement are costly, and corporate law provides the rules and an enforcement mechanism that govern relations among those who commit their capital to such ventures. The authors work out the reasons for supposing that this is the exclusive function of corporate law and the implications of this perspective.

corporate veil and financial documents: We the Corporations: How American

Businesses Won Their Civil Rights Adam Winkler, 2018-02-27 National Book Award for Nonfiction Finalist National Book Critics Circle Award for Nonfiction Finalist A New York Times Notable Book of the Year A Washington Post Notable Book of the Year A PBS "Now Read This" Book Club Selection Named one of the Best Books of the Year by the Economist and the Boston Globe A landmark exposé and "deeply engaging legal history" of one of the most successful, yet least known, civil rights movements in American history (Washington Post). In a revelatory work praised as "excellent and timely" (New York Times Book Review, front page), Adam Winkler, author of Gunfight, once again makes sense of our fraught constitutional history in this incisive portrait of how American businesses seized political power, won "equal rights," and transformed the Constitution to serve big business. Uncovering the deep roots of Citizens United, he repositions that controversial 2010 Supreme Court decision as the capstone of a centuries-old battle for corporate personhood. "Tackling a topic that ought to be at the heart of political debate" (Economist), Winkler surveys more than four hundred years of diverse cases—and the contributions of such legendary legal figures as Daniel Webster, Roger Taney, Lewis Powell, and even Thurgood Marshall—to reveal that "the history of corporate rights is replete with ironies" (Wall Street Journal). We the Corporations is an uncompromising work of history to be read for years to come.

corporate veil and financial documents: Legal Capital in Europe

Marcus Lutter, 2006 Europe has known very different systems of company laws for a long time. These differences do not only pertain to the board structures of public companies, where single-tier and two-tier structures can be distinguished, they also pertain to the principles of fixed legal capital. Fixed legal capital is not a traditional ingredient of English and Irish company law and had to be incorporated into these legal systems (only) for public limited companies according to the Second European Company Law Directive of 1976. Both jurisdictions have never really embraced these rules. Against this background, the British Accounting Standards Board (ASB) and the Company Law Centre at the British Institute of International and Comparative Law (BIICL) have initiated and supported a study of the benefits of this legal system by a group of experts led by Jonathan Rickford. The report of this group has been published in 2004. Its result was that legal capital was costly and superfluous; hence, the Second Directive should be repealed. The British government has adopted this view and

wants the European Commission to act accordingly. Against this background a group of German and European company law experts, academics as well as practitioners, have come together to scrutinise sense and benefits of fixed legal capital and all its specific elements guided by the following questions: What is the relevant legal concept supposed to achieve? What does it achieve in reality? What criticisms are there? Which proposals or alternatives are available? From the outset the group of experts has endeavoured to cooperate with foreign colleagues, which resulted in very fruitful and pleasant exchanges. This volume contains, besides an executive summary of the results, 16 essays on specific aspects of legal capital in Germany covering also neighbouring fields of law (e.g. accounting, insolvency); 7 reports on fixed legal capital in other jurisdictions (France, Great Britain, Italy, the Netherlands, Poland, Spain and the U.S.A.) addressing the same questions as the essays on German law. The British initiative disapproves of the Second Directive. The Directive does only deal with public limited companies in Europe, which is reflected in the analysis presented here. It is only concerned with the fixed legal capital of public limited companies, not with capital issues of private companies. The study has arrived at a result that differs completely from that of the Rickford group. It verifies the usefulness of the concept of fixed legal capital and wishes to convince the European Commission of the benefits of the Second Company Law Directive.

corporate veil and financial documents: Going for Broke Jean-Pierre Brun, Molly Silver, 2019-12-06 Going for Broke focuses on insolvency as an additional civil remedy in the arsenal of asset recovery practitioners, specifically in the context of grand corruption investigations and proceedings. The recovery of corruption proceeds is often sought through criminal prosecution and confiscation or civil lawsuits. Insolvency proceedings can also be an effective mechanism in the right circumstances, with their own advantages and disadvantages. The scenario that is most likely to benefit from this type of remedy is one in which bribes and stolen funds have been routed through special-purpose companies. This guidebook is intended as a practical tool to help policy makers, public officials, and those who have been entrusted with recovering their nations' stolen assets. It informs them about the ways that insolvency can be used to pursue proceeds of corruption. It may also serve as a quick reference for other practitioners: insolvency professionals, auditors, financial institutions, in-house counsel, and other professionals who deal with corruption.
