corporate real estate portfolio management: Asset Management Handbook for Real Estate Portfolios R. M. Santucci, 2013-10-14 The Asset Management Handbook is divided into three phases. Chapters 1 through 3 are conceptual introductions. Chapters 4, 5, 6 and 7 get into the meat of the policies and techniques of evaluating the capital needs of your property over the next 40 years. Chapters 8 and 9 help you identify which properties are doing well and which are the most threatened. What action should you take? What are the standard preservation and rejuvenation options available to a real estate portfolio manager? What is Asset Management? People are more accustomed to thinking about asset management of money or stocks or a package of annuity and savings accounts. Real estate asset management is a slower, longer term process. The properties in your portfolio, especially in affordable housing, have life cycles of 30, 40 or infinite time periods. Most nonprofit owners are not interested in selling to capture any appreciation on their properties. Their goal is to provide housing for the foreseeable future as long as the asset can perform. Many nonprofits and mid size property owners do not have a dedicated asset manager. It is extraordinarily important that someone take on that long-term analysis, be it for 10%, 25% or 50% of a full time employee. The next step is to benchmark your properties. How are you doing compared to the world? Not just on straight bottom line consideration, but how about in human services? Have you saved sufficient money to replace the roof or add the sprinklers that will be required at the next renovation? The Asset Management Handbook provides well-established objective criteria for 25 different variables. We've seen participants in the asset management practicum expand that up to 40 variables to analyze on an annual basis. We'll see how benchmarking and risk ranking of your portfolio are essential first steps in establishing its viability and needs. Capital Needs and Their Funds. In this meat of the manual, we walk you through essential policies that define how your properties will operate over the long term. We show how policies made by lenders, bankers and other short term partners can be self destructive and damaging to property owners holding for the long term. First example of the dichotomy, the lender is suggesting the reserve is sufficient when two years after their loan matures, the property will require \$4 million of replacement expenditures. This is fine for investment property held for resale. You just flip it and get down the road. Most affordable housing owners do not consider selling the property as a positive outcome. Even if you've never performed a property inspection before, the Handbook offers you easy methods of counting and sorting components into well established remaining economic lives. Then it is on to the massive spreadsheet that calculates the future need and the various waves in which it will appear. Exterior paint first, then roofs, windows and doors, and kitchens and baths follow and then it starts all over again. Most capital needs assessments performed by third parties make financial assumptions that are untenable. Their interest rates on earnings are overstated and their inflation rate on the components are generally understated leaving you with significant shortfalls, even if you have escrowed according to directions. We will keep you out of that trap, showing you the realistic funds that are required and the time periods when the inevitable refinancing windows will occur. Risk and Solutions. In the final section, we evaluate your primary risks. Which properties should you address first? Which properties have the strength and energy to function on their own? Then what should you do about it? Refinance? Renegotiate? Value engineer? Raise rents? In the foot race, the runner is always caught by the tsunami of required replacements. It is just a fact of the business that every 20 to 30 years you've got to re-invest a significant amount of money

corporate real estate portfolio management: Corporate Property Management Victoria Edwards, Louise Ellison, 2009-02-12 Corporate property is routinely identified as the second biggest cost within a business organization after staff. Effective management of such a major asset requires a fundamental understanding of both the operation of the property markets and the operational requirements of the business occupier. This primer on strategic property management focuses on how property held as a corporate asset can be used to add value to the primary business activity of an organization. Rather than separate the needs of the business from the management of the

business estate, the aim of Corporate Property Management is to enable the reader to directly support the primary business function through strategic management of corporate property, thereby adding value to the business as a whole. The book introduces a generic framework designed to assist in the analysis of any corporate property portfolio, working as a practical aid to decision making. The book is structured around this framework, providing a detailed review of its application and uses. This is then developed further through extensive use of five in-depth case studies that covers a wide variety of property types and property users - Borders bookshops; Cancer Research high street shops; The Youth Hostel Association; Clifford Chance's move to Canary Wharf and the Ardtornish Rural Estate in Scotland.

corporate real estate portfolio management: Facilities Management and Corporate Real Estate Management as Value Drivers Per Anker Jensen, Theo van der Voordt, 2016-10-04 Facilities Management (FM) and Corporate Real Estate Management (CREM) are two closely related and relatively new management disciplines with developing international professions and increasing academic attention. Both disciplines have from the outset a strong focus on controlling and reducing cost for real estate, facilities and related services. In recent years there has been a change towards putting more focus on how FM/CREM can add value to the organisation. It presents the state of the art of theoretical knowledge and empirical evidence about the impact of buildings and facilities on 12 value parameters and how to manage and measure these values. The findings are connected to a new Value Adding Management model. The book is research based with a focus on guidance to practice. It offers a transdisciplinary approach, integrating academic knowledge from a variety of different fields with practical experience. It also includes 12 interviews with practitioners, shedding light as to how they manage adding value in practice. This is a much needed resource for practitioners, researchers and teachers from the field of FM and CREM, as well as students at both undergraduate and postgraduate level.

corporate real estate portfolio management: Handbook of Portfolio Construction

John B. Guerard, Jr., 2009-12-12 Portfolio construction is fundamental to the investment management process. In the 1950s, Harry Markowitz demonstrated the benefits of efficient diversification by formulating a mathematical program for generating the efficient frontier to summarize optimal trade-offs between expected return and risk. The Markowitz framework continues to be used as a basis for both practical portfolio construction and emerging research in financial economics. Such concepts as the Capital Asset Pricing Model (CAPM) and the Arbitrage Pricing Theory (APT), for

example, provide the foundation for setting benchmarks, for predicting returns and risk, and for performance measurement. This volume showcases original essays by some of today's most prominent academics and practitioners in the field on the contemporary application of Markowitz techniques. Covering a wide spectrum of topics, including portfolio selection, data mining tests, and multi-factor risk models, the book presents a comprehensive approach to portfolio construction tools, models, frameworks, and analyses, with both practical and theoretical implications.

What are the standard preservation and rejuvenation options available to a real estate portfolio manager? What is Asset Management? People are more accustomed to thinking about asset management of money or stocks or a package of annuity and savings accounts. Real estate asset management is a slower, longer term process. The properties in your portfolio, especially in affordable housing, have life cycles of 30, 40 or infinite time periods. Most nonprofit owners are not interested in selling to capture any appreciation on their properties.

Their goal is to provide housing for the foreseeable future as long as the asset can perform. Many nonprofits and mid size property owners do not have a dedicated asset manager. It is extraordinarily important that someone take on that long-term analysis, be it for 10%, 25% or 50% of a full time employee. The next step is to benchmark your properties. How are you doing compared to the world? Not just on straight bottom line consideration, but how about in human services? Have you saved sufficient money to replace the roof or add the sprinklers that will be required at the next renovation? The Asset Management Handbook provides well-established objective criteria for 25 different variables. We've seen participants in the asset management practicum expand that up to 40 variables to analyze on an annual basis. We'll see how benchmarking and risk ranking of your portfolio are essential first steps in establishing its viability and needs. Capital Needs and Their Funds. In this meat of the manual, we walk you through essential policies that define how your properties will operate over the long term. We show how policies made by lenders, bankers and other short term partners can be self destructive and damaging to property owners holding for the long term. First example of the dichotomy, the lender is suggesting the reserve is sufficient when two years after their loan matures, the property will require \$4 million of replacement expenditures. This is fine for investment property held for resale. You just flip it and get down the road. Most affordable housing owners do not consider selling the property as a positive outcome. Even if you've never performed a property inspection before, the Handbook offers you easy methods of counting and sorting components into well established remaining economic lives. Then it is on to the massive spreadsheet that calculates the future need and the various waves in which it will appear. Exterior paint first, then roofs, windows and doors, and kitchens and baths follow and then it starts all over again. Most capital needs assessments performed by third parties make financial assumptions that are untenable. Their interest rates on earnings are overstated and their inflation rate on the components are generally understated leaving you with significant shortfalls, even if you have escrowed according to directions. We will keep you out of that trap, showing you the realistic funds that are required and the time periods when the inevitable refinancing windows will occur. Risk and Solutions. In the final section, we evaluate your primary risks. Which properties should you address first? Which properties have the strength and energy to function on their own? Then what should you do about it? Refinance? Renegotiate? Value engineer? Raise rents? In the foot race, the runner is always caught by the tsunami of required replacements. It is just a fact of the business that every 20 to 30 years you've got to re-invest a significant amount of money.

Gene Trowbridge, Gene Trowbridge Esq, 2015-04-27 This is the definitive and essential text on creating and sponsoring real estate investment groups. Written by a nationally renowned attorney whose practice is limited to the complex legal aspects of these kinds of securities; it is a concise, easily understood and practical guide on how to proceed. It contains all the basics you need to grasp in the US Securities and Exchange Commission (SEC) regulations governing this kind of investment. The text includes details of the SEC's rules governing the Jobs Act. Long term, this federal legislation is likely to be a game-changer in the syndication of commercial real estate. Author Gene Trowbridge, Esq., CCIM, works as a lawyer for and consultant to individuals and organizations engaged in group sponsorships and conducts seminars and workshops throughout the country.
