**couch to marathon training plan 6 months:** *The Non-Runner's Marathon Trainer* David A. Whitsett, Forrest A. Dolgener, Tanjala Jo Kole, 1998-02-01 Athlete. Runner. Marathoner. Are these words you wouldn't exactly use to describe yourself? Do you consider yourself too old or too out of shape to run a marathon? But somewhere deep inside have you always admired the people who could reach down and come up with the mental and physical strength to complete such a

daunting and rewarding accomplishment? It doesn't have to be somebody else crossing the finish line. You can be a marathoner. The Non-Runner's Marathon Trainer is based on the highly successful marathon class offered by the University of Northern Iowa, which was featured in a Runner's World article titled Marathoning 101. The class has been offered five times over 10 years, and all but one student finished the marathon. That is approximately 200 students -- all first time marathoners and many with absolutely no running background. This book follows the same 16-week, four-day-a-week workout plan. What makes the success rate of this program so much higher than any other? The special emphasis on the psychological aspects of endurance activities. You don't have to love to run -- you don't even have to like it -- but you have to realize that you are capable of more than you have ever thought possible. One participant in the program explained it like this: I'm doing this for me -- not for others or the time clock. I just feel better when I run, plus it helps me to cope with things in general. The skills we've learned in this class don't apply just to marathoning -- they apply to life! Just like you never know what the next step in a marathon will bring, so too, you never know what will happen next in life. But if you don't keep going, you're never going to find out. By staying relaxed, centered, and positive you handle just about anything that comes your way. This is marathon running for real people, people with jobs and families and obligations outside of running. The Non-Runner's Marathon Trainer has proven successful for men and women of all ages. Now let it work for you.

**couch to marathon training plan 6 months: Smart Marathon Training** Jeff Horowitz, 2011-10-01 Old-school marathon training plans ask runners to crank out 70 to 100 miles a week. It's no wonder those who make it to the start line are running ragged. Smart Marathon Training maps out a healthier, more economical approach to training that emphasizes quality over quantity. With more than 75 detailed exercises plus six easy-to-follow training plans for half and full marathons, Smart Marathon Training will get you to the starting line feeling refreshed and ready to run your best race yet. This innovative program eliminates junk miles, paring down training to three essential runs per week and adding a dynamic strength and cross-training program to build overall fitness. Runners will train for their best performance in less time and avoid the injuries, overtraining, and burnout that come from running too much. Smart Marathon Training builds up a runner's body to resist injury. Runners gain the strength they need to run long using functional exercises that target the hips, glutes, and quads. Running is a full-body sport, so this training program also builds a

strong core and upper body to avoid injuries that begin above the waist. No one fakes a marathon or half-marathon--everyone has to do the work. But Smart Marathon Training replaces long, grinding miles with low-impact cross-training. Horowitz outlines a cycling plan to complement run workouts, boosting base fitness while saving runners' bodies for their best runs.

As a journalist whose career spans three decades, CNN correspondent Tom Foreman has reported from the heart of war zones, riots, and natural disasters. He has interviewed serial killers and been in the line of fire. But the most terrifying moment of his life didn't occur on the job—it occurred at home, when his 18-year old daughter asked, How would you feel about running a marathon with me? At the time, Foreman was approaching 51 years old, and his last marathon was almost 30 years behind him. The race was just sixteen weeks away, but Foreman reluctantly agreed. Training with his daughter, who had just started college, would be a great bonding experience, albeit a long and painful one. *My Year of Running Dangerously* is Foreman's journey through four half-marathons, three marathons, and one 55-mile race. What started as an innocent request from his daughter quickly turned into a rekindled passion for long-distance running—for the training, the camaraderie, the defeats, and the victories. Told with honesty and humor, Foreman's account captures the universal fears of aging and failure alongside the hard-won moments of triumph, tenacity, and going further than you ever thought possible.

Cutting-edge research has proven that triathletes and other endurance athletes experience their greatest performance when they do 80 percent of their training at low intensity and the remaining 20 percent at moderate to high intensity. But the vast majority of recreational triathletes are caught in the so-called moderate-intensity rut, spending almost half of their time training too hard--harder than the pros. Training harder isn't smarter; it actually results in low-grade chronic fatigue that prevents recreational athletes from getting the best results. In 80/20 Triathlon, Matt Fitzgerald and David Warden lay out the real-world and scientific evidence, offering concrete tips and strategies, along with complete training plans for every distance--Sprint, Olympic, Half-Ironman, and Ironman--to help athletes implement the 80/20 rule of intensity balance. Inspired by the author’s experience as a collegiate champion, the novel follows Quenton Cassidy, a competitive runner at fictional Southeastern University whose lifelong dream is to run a four-minute mile. He is less than a second away when the turmoil of the Vietnam War era intrudes into the staid recesses of his school’s athletic department. After he becomes involved in an athletes’ protest, Cassidy is suspended from his track team. Under the tutelage of his friend and mentor, Bruce Denton, a graduate student and former Olympic gold medalist, Cassidy gives up his scholarship, his girlfriend, and possibly his future to withdraw to a monastic retreat in the countryside and begin training for the race of his life against the greatest miler in history. A rare insider’s account of the incredibly intense lives of elite distance runners, *Once a Runner* is an inspiring, funny, and spot-on tale of one individual’s quest to become a champion.

Included in *Simple Marathon Training* is a day-by-day schedule which includes running assignments as well as the crucial element missing from most training plans: core strength, hip strength and hip mobility exercises. You don't have to look at a sequence of photos in the book to learn these routines, rather, you will be able to watch all these strength and mobility videos online, for free. The incorporation of training videos into a sound

marathon training program makes Simple Marathon a one of a kind system; a book that will help any committed athlete run a great marathon. The Geek Out section at the back of the book is another unique aspect of Simple Marathon Training. The Geek Outs are written by world-renowned physiologists and professional marathoners as well as Coach Jay's clients who have been using the system for several years to run PRs. You'll learn why it's best to do your hardest strength and mobility work on the same day as your workouts and long runs. You'll learn the correct method for fueling during a marathon. Information on imagery leading up to the race and mental skills to use during race day are just some of the topics in the Geek Out section. The bottom line is, if you're a busy adult with a hectic life, Simple Marathon Training is the right training book for you. Jay's training system works beautifully for runners who aim for excellence in every area of their lives-athletically, personally and professionally.
